Contents

Introduction: Questions of Quest *Stafford Beer* 1

THEORY

Information Theory *Henri Atlan* 9
History 9
Basic Elements of Information Theory 10
Recent Developments 24
Notes 41

Dynamical Systems Theory *Franz Pichler* 43
Introduction 43
Mathematical Definition 43
Classification 46
Behavior 48
Realization 48
Simulation 50
Homomorphisms 51
Composition 52
Decomposition 53
Conclusion 55

The Theory of Adaptive and Learning Systems *Y. Z. Tsypkin* 57
Introduction 57
Learning Problems 57
Algorithms of Learning 59
Learning Conditions and Limiting Potentialities of Learning Algorithms 62
Systems of Estimation of Random Process Characteristics 66
Pattern Recognition Systems 69

Bibliografische Informationen
http://d-nb.info/840053398

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

Learning Models 75
Inventory Control Systems 82
Usage of A Priori Information 84
Conclusion 89

General Systems Concepts *George J. Klir* 91
Introduction 91
Primitive Concepts 93
Primitive Systems 96
Systems Epistemological Levels 99
Classes of Systems Problems 105
Primary and Secondary Systems Traits 105
Classification of Systems Concepts 108
Systems Models 109
Goal and Performance 109
Goal-Oriented Generative Systems 110
Adaptive Systems 112
Systems Complexity 112
Systems Problem Solving 113
Historical and Bibliographical Survey 117

Methods of Systems Analysis and Model Building *J. Michael McLean* 121
Introduction 121
Temporal Change and Feedback 123
Graphs and Networks 125
Descriptions and Prescriptions 127
Empirical and Rational Approaches to Systems Analysis 128
Making Use of Mental Models 132
The Limitations of Systems Analysis 134

APPLICATIONS

Cybernetics and Biology: Classic Attempts at Neuronal Modeling 141
Luigi M. Ricciardi
Introduction 141
The Discovery of the Neuron 142
Models of Neurons and Neural Network 145
Bibliographical Notes 157

Cybernetics in Psychology and Education *Gordon Pask* 159
Introduction 159
Generalities 159
Specific Applications of the Emergent Discipline of General System Theory 160
Background Orientation 165
Conversation Theory and Its Methods 166
Results from Very Limited Systems 168

Knowledge Representation 172
Results from a Liberalized Situation 172
Some Overall Discussion 176
Acknowledgement 176

Cybernetics in the Social Sciences *Maria Nowakowska* 177
Introduction 177
Classification of Models 177
A Model of Voice Allocation in Discussion 180
Prosocial Behavior—A Decision Theoretic Model 182
A Systemic Approach to Analysis of Behavior 191
Conclusions and Summary 231

Cybernetics and Health Care *John H. Milsum and Charles A. Laszlo* 235
Introduction 235
Cybernetics of Health 236
Cybernetics of the Health Care System 244
Information and Health Care: The Crucial Connection 253
Health Technology 257

Cybernetics in Management and Organization *Raul Espejo* 263
Introduction 263
Cybernetics and Organization 264
Cybernetics and Management 275
Conclusion 288

Engineering Cybernetics *Manfred Peschel* 291
Engineering Cybernetics Today 291
The Main Features of Quantified Systems Behavior 294
Fuzziness in Engineering Cybernetics 306
Polyoptimization in Engineering Cybernetics 313
Industrial Robots and Engineering Cybernetics 319

Cybernetics and Linguistics *Igor A. Mel'čuk* 323
Natural Language 323
Linguistics 324
General Conclusion 336
Acknowledgements 336
Abbreviations 337
Notes 337
Additional Note 337

Cybernetics and Artificial Intelligence
Donald C. Gause and Gary Rogers 339
Introduction 339
Cybernetic and Intelligent Systems 339

Learning Mechanisms and Approaches 342
Examples: Conversational and Question-Answering Systems 347
Examples: Man-Machine Symbiotic Systems 354

Cooperative Computation and the Cybernetic Society
Michael A. Arbib 361
Introduction 361
Changing Concepts of Cybernetics 362
The Computer Revolution 364
The Design of Social Systems in a Free Society 365
Networks in National and International Politics 366
Public Information Networks 368
Perspective 372

Cybernetics and Global Planning *Ervin Laszlo* 373
On Global Planning 373
A Paradigm for Global Planning 374
The Application of the Systems Paradigm in Global Planning 380
Conclusions 393
Notes 394

Cybernetics and the Future *Harold A. Linstone* 397
Introduction 397
The Legacy of the Past 401
Keys to the Future 403
A Pointillist View of the Future 405
Fears and Dangers 410
