

TABLE OF CONTENTS

Foreword		ix
1. EXPLORING THE QUARK STRUCTURE OF MATTER AT VERY HIGH ENERGY		
Results from UA1 W and Z Production and Decay	J. Colas	3
UA2 Latest Results	G. Sauvage	25
Hard Collision Phenomenology	M. Fontannaz	55
Jet Fragmentation	G. Flügge	79
Hard Scattering Processes and Jet Fragmentation*	J. Sass	113
Structure Functions: Deep Inelastic Scattering on Nucleons and Nuclei	R. Voss	141
Structure Functions and the EMC effect*	J. Feltesse M. Ericson	171
Quark Effects in Nuclei	B. Povh	221
2. THE STUDY OF QUARK PROPERTIES		
Electroweak Interactions of Quarks and Leptons	A. Blondel	239
Electroweak Properties of Fermions*	F. Büsser	269
Excitation of Heavy Flavours*	F. Richard	293
Quark Spectroscopy	J.E. Augustin	323
Quark Spectroscopy*	K.R. Schubert	355
3. HADRONIC MATTER AND THE QUARK-GLUON PLASMA		
Critical Behaviour in Statistical QCD	H. Satz	385
QCD, the Lattice Approach*	A. Billoire	401
Nuclear Collisions at Very High Energies	H. Specht	417

	Heavy Ion Collisions*	U. Lynen	431
4.	GETTING AT THE QUARK STRUCTURE OF MATTER FROM SOFT HADRON PRODUCTION AND LOWER ENERGY PHENOMENA		
	Soft Hadron Physics*	G. Ekspong C. Geich-Gimbel	455
	Physics at LEAR*	H. Koch E. Pauli	495
	Strange Quark Physics*	T. Walcher	523
	Medium Energy Physics*	F. Scheck	533
	Heavy-Ion Physics in the Intermediate Energy Domain	H. Doubre	543
5.	BEYOND THE STANDARD MODEL OF QUARKS AND LEPTONS		
	Beyond the Standard Model	E. Reya	569
	Beyond the Standard Model*	R. Peccei	611
	Supergravity Models*	J. Wess	633
6.	LOOKING AHEAD ON THE EXPERIMENTAL SIDE		
	Fixed Target Physics at the CERN 400 GeV SPS*	K. Winter	653
	Instrumentation for New Colliders*	A. Walenta	689
7.	PHYSICS AT HERA		
	Physics at HERA – Present Prospects from a Theorist's Point of View	R. Rückl	717
	Physics at HERA – the Experimental Programme Shaping Up*	P. Petiau	755
	List of Participants		779

* Corresponds to a summary or a set of contributions written or edited by the relevant convener.
