

## TABLE OF CONTENTS

Chapter 1.	<u>INTRODUCTION</u> .....	7
	1. Background.....	7
	2. Environmental and health effects.....	8
	3. Alternatives to lead to boost gasoline octane.....	10
	4. Diesel engines and fuels.....	11
	5. Two-stroke engines.....	12
	6. Gaseous fuels for automobiles: Compressed natural gas and liquified petroleum gas.....	12
	7. Technological developments.....	13
	8. The COMPASS Transportation Report.....	14
Chapter 2.	<u>THE OECD COMPASS PROJECT AND TRANSPORTATION END-USE</u> .....	16
	1. OECD energy use for transportation.....	16
	2. End-use approach.....	18
	3. Automobile ownership and use in the OECD region.....	19
	4. Relationships of fuel consumption to vehicle emissions.....	20
Chapter 3.	<u>POTENTIAL ENVIRONMENTAL AND HEALTH EFFECTS OF PRIVATE VEHICLE TRANSPORTATION</u> .....	26
	1. Introduction.....	26
	2. Matrix of areas of environmental impact and transportation stages.....	26
	3. Health and environmental effects.....	32
	4. Standards and regulations to mitigate environmental effects.....	38
	5. Overflow of transportation impacts to other systems.....	39
	6. Urban concentration of impacts.....	39
	Bibliography.....	41
Chapter 4.	<u>LEAD IN GASOLINE: THE PROBLEMS AND ALTERNATIVES</u> .....	44
	1. Introduction.....	44
	2. The concepts of engine "knock", octane numbers, and lead additives to gasoline.....	45
	3. Environmental implications of lead in gasoline.....	46
	4. Possible control strategies.....	50
	5. Standards for lead in gasoline.....	56
	6. Balancing the costs and effects.....	58
	7. Conclusions in the COMPASS context.....	64
	Bibliography.....	67
Chapter 5.	<u>DIESEL ENGINES AND FUELS</u> .....	70
	1. Introduction.....	70
	2. Engine efficiencies.....	71
	3. Characteristics of diesel fuels.....	73

	4. Environmental effects of diesel emissions compared with those from other engines.....	77
	5. Technologies to improve emissions.....	81
	6. Increase in the use of diesel engines.....	84
	7. Costs.....	86
	8. Conclusions in the COMPASS context.....	87
	Bibliography.....	89
Chapter 6.	<u>TWO-STROKE ENGINES</u> .....	94
	1. Introduction.....	94
	2. Performance of two-stroke engines.....	95
	3. Exhaust emissions.....	96
	4. Noise.....	97
	5. Conclusions in the COMPASS context.....	98
	Bibliography.....	99
Chapter 7.	<u>LPG AND CNG AS AUTOMOTIVE FUELS</u> .....	101
	1. Availability of gaseous fuels.....	101
	2. LPG and CNG as automotive fuels.....	103
	3. Costs.....	104
	4. Safety.....	106
	5. Vehicle emissions.....	109
	6. Popular use of gaseous fuelled vehicles.....	111
	7. Conclusions in the COMPASS context.....	113
	Bibliography.....	115
Chapter 8.	<u>ASSESSMENT OF TECHNOLOGICAL DEVELOPMENTS IN, AUTOMOBILE DESIGN AND ITS RELATION TO FUEL CHARACTERISTICS AND EMISSION CONTROL</u> .....	117
	1. Introduction.....	117
	2. Reduction in fuel consumption.....	118
	3. Changes in fuel quality.....	144
	4. Emissions : regulations and technical solutions.....	146
	5. Conclusions in the COMPASS context.....	151
	Annex 1 : Exhaust Catalyst Control Technology.....	153
	Annex II: Other Pollution Control Technologies.....	157
	Bibliography.....	159
Chapter 9.	<u>COMPARISON OF MOTOR VEHICLE ALTERNATIVES AND GENERAL CONCLUSIONS</u> .....	162
	1. Introduction.....	162
	2. Economic tradeoffs in the motor vehicle..... transportation "package"	163
	3. Tradeoffs between motor vehicle and..... fuel alternatives	167
	4. Conclusions in the COMPASS context.....	170
