

CONTENTS

Foreword	v
Acknowledgements and Committees	ix
On the Consistency of Data in Integrated CAD Systems J. Mermet and I. Ania	1
Design Management Support by Advanced Database Facilities J.A. Mülle, K.R. Dittrich, and A.M. Kotz	23
Design and Data Management in 1-Megabit SRAM Design H. Van Der Gaag and W.G.L. Mol	51
EDIF Notation for Layout/Circuit Relations J. Blödel, R.W. Hartenstein, W. Nebel, and M. Ryba	67
Object-Oriented Programming for VLSI CAD Tool Integration M. Marchesi, P. Antognetti, G.M. Bisio, D.D. Caviglia, and P. Traverso	85
IREEN – A Datamodel for Tool Integration in Open Microelectronic CAD-Systems R. Piloty, B. Weber	105
Open Framework of Interactive and Communicating CAD Tools L. Claesen, R. Severyns, P. Six, W. De Rammelaere, H. De Man, J. Cockx, Ph. Reynaert, and G. Schrooten	133
The NMP-CAD Base System – An Open and Integrating Framework for CAD Tools J. Haabma	157
The Cadlab Workstation CWS – An Open, Generic System for Tool Integration K. Gottheil, G. Kachel, T. Kathöfer, H.J. Kaufmann, B. Kleinjohann, E. Kupitz, J. Miller, B. Nelke, F.J. Rammig, B. Steinmüller, and C. White	167

Data Management for VLSI Design: Conceptual Modeling, Tool Integration and User Interface P. Van Der Wolf, N. Van Der Meijs, T.G.R Van Leuken, I. Widya, and P. Dewilde	185
Knowledge-Based Toolbox Management System E. Moser, H. Rust, and U. Golze	211
The AMPLO System – An Integrated Environment for Digital Systems Design F.R. Wagner, C.M.D.S. Freitas, and L.G. Golendziner	221
Integrated Tools for Automatic Design for Testability D. Schmid, H.-J. Wunderlich, F. Feldbusch, S. Hellebrand, J. Holzinger, and A. Kunzmann	233
Design Analysis at RT Level Using Correlated Representation Methods P. Bakowski	259
Combined Hardware/Software Design with DACAPO-III C. Ohsendoth and J. Poppensieker	267
ELLA's Application Support Environment and Its User Interface J.E. Richards and C.M. Evans	281
The Overseer: An Approach to Design Management R.M. Marshall and G. Brégant	289
VFMON – A Monitor for the VENUS-F System K. Schmidinger and H.-W. Drumm	311
