

# CONTENTS

Introduction . . . . .	vii
<b>1. Improvements in or Relating to the Operation of High-Power Lasers . . . . .</b>	<b>1</b>
1.1. Gas lasers . . . . .	1
1.2. Control systems . . . . .	9
1.3. Various devices and elements of laser systems . . . . .	30
<b>2. Materials Processing by Laser Systems . . . . .</b>	<b>43</b>
2.1. Processes, devices, materials in general . . . . .	43
Surface treatment in general . . . . .	56
Annealing . . . . .	62
Hardening . . . . .	64
Cooling . . . . .	65
Heat treatment . . . . .	67
Material removal . . . . .	69
Drilling . . . . .	70
Punching . . . . .	71
Scratching . . . . .	74
Etching . . . . .	75
Deburring . . . . .	77
Coating . . . . .	78
Sealing . . . . .	80
Protective measures . . . . .	81
Lens protection . . . . .	84
Covers . . . . .	87
Coupling . . . . .	88
Application of auxiliary gas . . . . .	90
Dividing gas-filled tubes . . . . .	92
2.1.1. Welding and soldering by laser systems . . . . .	94
2.1.2. Cutting by laser systems . . . . .	121
2.1.3. Marking by laser systems . . . . .	139
2.2. Isotope separation; general methods . . . . .	147
2.2.1. Isotopes of uranium . . . . .	166
2.2.2. Isotopes of carbon . . . . .	179

2.2.3. Isotopes of hydrogen . . . . .	182
2.2.4. Isotopes of zirconium . . . . .	186
2.2.5. Isotopes of various other elements . . . . .	188
2.3. High-power lasers adapted to nuclear fusion . . . . .	195
2.4. Diverse applications of laser systems . . . . .	201
List of Patentees . . . . .	209
References . . . . .	225
