

## CONTENTS

Foreword	v
Committees	vii
<b>Session I: Concepts and Maintenance Strategies in CIM Systems</b>	
Computerised Maintenance Management Systems – The Human Factor M.F. Green	3
Automatic Condition Monitoring in the Hot Strip Mill of Rautaruukki oy Raabe Steel Works M. Pajukoski	13
The Future of Maintenance – An Overview D. Stanivuković	25
<b>Session II: Computer Simulation and Diagnostics</b>	
New Diagnostic Methods of Faults External to the Controller at Manufacturing Systems A. Storr, M. Härdtner, G. Diehl and J. Schneider	43
Safecontrol – A Millwide Condition Monitoring System A. Ollila	63
On-Line Acquisition and Analysis of Mechanical Failure Data T.R. Moss	75

**Session III: Computer Integrated Maintenance Systems****Organisational Aspects of Computer Applications  
in Maintenance Management**

K. Smit 89

**Overall Monitoring System by Means of Sound Recognition**

S. Takata and J.H. Ahn 99

**Pattern Recognition Based Learning and Decision Making in Complex  
Machine Tool Monitoring Systems**

L. Monostori 113

**Using Expert Systems in Decision Making in Maintenance Management**

L. Mann 125

**Session IV: Expert Systems in Maintenance****The Future of Computerised Maintenance**

V. Milačić and V. Majstorović 139

**Building an Expert System for Maintenance**

G. Spur, D. Specht and T. Göbler 183

**Predictive Maintenance: A New Paradigm for Diagnostic  
Expert Systems**

G.M.P. O'Hare, W.J. Black and G.V. Conroy 205

**EIDEMON – An Expert System for Fault Diagnosis**

R.E. King 219

**An Expert System in Diagnosis for Rotating Machines through  
the Vibration Measurements**

D. Menexiadis, C. Tahon and R. Soenen 227

**An Expert Diagnostic System of Mechanical Equipment\***

Wang Hangong and Yang Chun 239

**Round Table Discussion**

245

**List of Participants**

247

**Detailed Report**

**249**

**\* Late paper**
