

TABLE OF CONTENTS

Foreword	v
International Programme Committee	vii
Local Organising Committee	viii
SECTION A. INTRODUCTION TO AI AND PMS.	
<i>Prospects for AI in PMS.</i>	3
J. Harhen (Digital Equipment Corporation)	
<i>What Difference will Expert Systems Make? The Way to Expert System Based Production Management.</i>	15
S. Augustin, B. Reminger, R. Guending, H. Huebner (Siemens AG, F.R.G.; Siemens K.K., Japan; University of Kassel, F.R.G.)	
SECTION B. MODEL BASED AND SIMULATION APPROACHES.	
<i>Model Based Expert Systems for Production Management.</i>	35
P. Cunningham, J.P. Shivnan (Trinity College Dublin, Digital Equipment International B.V., Ireland)	
<i>Model Based Reasoning in Manufacturing Systems Design.</i>	49
E. Eloranta, M. Syrjanen, S. Torma (Helsinki University of Technology, Finland)	
<i>Knowledge Acquisition by Means of Games.</i>	65
S. Merit, J.O. Riis, (Technical University of Denmark, University of Aalborg, Denmark)	
<i>A Know-How Activated Simulation Tools-System for Production Management Support.</i>	73
I. Inoue, M. Fuyuki(NEC Corporation, Kansai University, Japan)	

<i>Expert Systems in Manufacturing Simulation.</i> J. O. Strandhagen (NTH-SINTEF, Norway)	83
<i>Integrating Simulation and AI into a Production Scheduling System.</i> C. Walter (University Federal do Rio Grande do Sul, Brasil)	95
SECTION C. AI AND SCHEDULING.	
<i>A Constraint Based Scheduling System for VLSI Wafer Fabrication.</i> P. Elleby, H.E. Fargher, T.R. Addis (University of Reading, England)	107
<i>State Transition Table as a Data Structure for Adding Intelligence to Material Flow Control in Production Management Systems.</i> C.L. Moodie, J. Drolet, Y-B. Moon, D. Upton (Purdue University, U.S.A.)	115
<i>Hybrid Knowledge-Based/Analytical Approach to Production Management Systems Design.</i> A. Villa (Politecnico di Torino, Italy)	133
<i>Expert System for Production Planning and Scheduling.</i> P. Lecocq, T. Guiot (CRIF, Belgium)	153
<i>The Scheduler's Knowledge of Uncertainty : The Missing Link.</i> K.N. McKay, J.A. Buzacott, F.R. Safayeni (University of Waterloo, Canada)	171
<i>Job Shop Dynamic Scheduling. The Knowledge Based Approach of SONIA.</i> B. Sauve (Laboratoires de Marcoussis, France)	191
<i>An Intelligent System for Parallel Machine Scheduling.</i> R. Karni, I. Hayeems (Technion, Israel)	207
<i>An Intelligent Knowledge Based System for the Scheduling of a Cell with Parallel Facilities.</i> H.S. Jagdev (UMIST, England)	223

SECTION D. AI AND PRODUCTION PLANNING.

AI and Capacity Planning with G.T. and Period Batch Control. **247**
J. L. Burbidge (Cranfield Institute of Technology, England)

*A Systematization of Knowledge for the Selection and
Implementation of Materials Management Software.* **265**
I.P. Tatsiopoulos (National Technical University of Athens, Greece)

SECTION E. THE GRAI METHOD.

*"Knowledge Based System for the Design of Production
Management Systems."* **281**
G. Doumeingts, M. Roboam, J.L. Wagner, D. Darricau (University of
Bordeaux, France)

*Using GRAI to Specify Expert Systems for the Control and
the Supervision of Flexible Flow Lines.* **295**
A. Huber, D. Buenz (Philips GmbH Forschungslaboratorium
Hamburg, F.R.G.)

SECTION F. AI APPLICATIONS IN FMS.

Goal Identification for Flexible Manufacturing System Control. **311**
P. J. Sackett, I-S. Fan (Cranfield Institute of Technology, England)

Object Oriented Design of a Flexible Manufacturing System. **329**
H. Stienen, P.R. van der Weerd (Technical University of Delft,
The Netherlands)
