CONTENTS

Preface v

Commitees vii

List of Referees ix

Session 1 Distributed Systems

1.1 *On Optimal File Allocation with Sharing* 1
S. TRIPATHI, Y. HUANG, University of Maryland, and
D. TOWSLEY, University of Massachusetts, U.S.A.

1.2 *Shared Data Structures in a Distributed System – Performance Evaluation and Practical Considerations* 15
P. STENSTRÖM, Lund University, Sweden, D. VRSALOVIC and
Z. SEGALL, Carnegie Mellon University, U.S.A.

Session 2 ISDN

2.1 *ISDN Services and Network Evolution in Japan* 31
K. OKADA, NTT Telecommunication Networks Laboratories,
Japan

2.2 *Achievability of Performance Objectives in ATM Switching Nodes* 45
S. SUMITA and T. OZAWA, NTT Communication Switching
Laboratories, Japan

2.3 *Performance Analysis of Buffered Banyan Networks* 57
T.H. THEIMER, E.P. RATHGEB and
M.N. HUBER, University of Stuttgart, F.R.G.

2.4 *Performance Analysis of A Virtual Data Queue Access Scheme for Integrated Voice/Data LAN's* 73
Y.S. SUN and M. GERLA, University of California, Los Angeles,
U.S.A.

Session 3 Multi-Processors

3.1 *An Approach to Monitoring and Modeling of Multiprocessor and Multicomputer Systems* 91
R. HOFMANN, R. KLAR, N. LUTTENBERGER,
B. MOHR and G. WERNER, Universität Erlangen-Nürnberg,
F.R.G.

Bibliografische Informationen
http://d-nb.info/1051353149

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.2 *Performance Analysis of Hierarchical Cache-Consistent Multiprocessors* 111
M.K. VERNON, University of Wisconsin-Madison,
R. JOG, Hewlett Packard System Performance Lab., and
G.S. SOHI, University of Wisconsin-Madison, U.S.A.

Session 4 Polling Systems

4.1 *Analysis of Cyclic-Polling Systems with Binomial-Gated Service* 127
H. LEVY, Tel Aviv University, Israel

4.2 *An Approximation Procedure for Cyclic Service Queues with Limited Service* 141
D. EVERITT, Telecom Australia Research Laboratories, Australia

4.3 *Stochastic Bounds for Vacation Models with Limited Service* 157
L.D. SERVI, GTE Laboratories Incorporated, and
D.D. YAO, Harvard University, U.S.A.

Session 5 Queueing Systems

5.1 *A Cyclic-Service Tandem Queueing Model with Semi-Exhaustive Service* 183
T. KATAYAMA, NTT Communication Switching Laboratories, Japan

5.2 *A Queueing Analysis of a Go-Back-N Protocol* 197
P. ROBERT, INRIA, France

5.3 *Partial Preemption in a System with Two Processors* 207
H.R. GAIL, S.L. HANTLER, IBM Thomas J. Watson Research Center, and B.A. TAYLOR, University of Michigan, U.S.A.

Session 6 Queueing Networks

6.1 *Equivalencies between Open and Closed Queueing Networks with Finite Buffers* 223
R.O. ONVURAL and H.G. PERROS, North Carolina State University, U.S.A.

6.2 *Approximation Method for Queueing Networks with Nonpreemptive Priority* 241
H. YOSHINO, NTT Communication Switching Laboratories, Japan

6.3 *Throughput and Response Time Optimization in Queueing Network Models of Computer Systems* 251
I.F. AKYILDIZ, Georgia Institute of Technology, U.S.A., and
G. BOLCH, Universität Erlangen-Nürnberg, F.G.R.

6.4 *Multiclass Discrete Time Queueing Systems with a Product Form Solution* 271
G. PUJOLLE, University of Paris VI, France

Session 7 Petri Nets

7.1 *Reducing Timed Petri Nets for Response Time Estimation* 281
W.H. CHUNG, H.R. OH, K.H. PARK and M. KIM, KAIST, Korea

7.2 *The Performance Evaluation of Design Alternatives for the SUPERMINI Architecture Using TPQS* 295
C.-R. CHOU and D.-L. MAO, National Chiao Tung University, Republic of China

7.3 *Applications of Generalised Semi Markow Processes to Stochastic Petri Nets* 315
W. HENDERSON and D. LUCIC, University of Adelaide, Australia

Session 8 Multiple Access Protocols

8.1 *Ultimate Characterizations of Interval Searching Algorithms for Distributed Systems* 329
P. JACQUET, INRIA, France, and W.SZPANKOWSKI, Purdue University, U.S.A.

8.2 *Analysis of a Class of Distributed Queues with Applications* 345
M.L. MOLLE, University of Toronto, Canada

8.3 *Improving the Response Time of the Proposal-Petition Protocol by Using a Three Code Alphabet Search. Description and Performance Evaluation* 361
J. FUERTES, Lawrence Berkeley Lab., U.S.A., and R. PUIGJANER, Universitat de les Illes Balears, Spain

Session 9 Software Systems

9.1 *Performance Analysis of A Message-Oriented Knowledge-Base* 375
W. WONG, T. SUDA and L. BIC, University of California, Irvine, U.S.A.

9.2 *Memory Cost Minimization in Serializable Database Schedulers* 391
T. KAKESHITA and Y. KAMBAYASHI, Kyushu University, Japan

Session 10 Parallel Processing

10.1 *Exploiting Parallelism Across Program Execution: A Unification Technique and Its Analysis* 407
V. REGO and A.P. MATHUR, Purdue University, U.S.A.

10.2 *Parallel Parsing on the Hypercube* 423
O.H. IBARRA, T.-C. PONG and S.M. SOHN, University of Minnesota, U.S.A.

10.3 *A New Systolic Structure for the Realisation of Recursive Discrete Fourier Transform* 439
K.L. WONG and W.C. SIU, Hong Kong Polytechnic, Hong Kong

10.4 *Spinning Versus Blocking in Parallel Systems with Uncertainty* 455
J. ZAHORJAN, E.D. LAZOWSKA, University of Washington,
U.S.A., and D.L. EAGER, University of Saskatchewan, Canada

Session 11 Interconnection Networks

11.1 *File Access and Paging Behavior of Diskless Workstations on an Ethernet* 473
R. GUSELLA, University of California, Berkeley, U.S.A.

11.2 *Estimating the Average Delay in a Delta Interconnection Network Operating according to the Cut-Through Packet Switching Technique* 491
M. AJMONE MARSAN, Università di Milano,
G. BALBO, G. CHIOLA, Università di Torino, A. CICCARDI,
Politecnico di Torino, and G. CONTE, Università di Salerno, Italy

11.3 *Performance of Stochastic Rendezvous Networks with Priority Tasks* 511
J.W. MIERNIK, C.M. WOODSIDE,
J.E. NEILSON and D.C. PETRIU, Carleton University, Canada
