

CONTENTS

<i>Preface</i>	v
Analysis of high velocity impact testing <i>J. Dear and H. MacGillivray</i>	1
Cleavage fracture in steel specimens under short stress pulse loading <i>H. Homma, Y. Kanto and K. Tanaka</i>	11
Crack propagation and arrest study at stress pulse loading <i>R. Clos, U. Schreppel, U. Zencker, T. Rahmel, K. Klenk, U. Mayer</i>	26
Dynamic crack propagation and crack arrest in a structural steel: Comparison between isothermal and thermal shock tests <i>M. Di Fant, A. Fontaine and A. Pineau</i>	42
On the practical significance of crack arrest <i>T. Varga and G. Schneeweiss</i>	57
Influence of grain size on triaxial dynamic behavior of alumina <i>J. Cagnoux and A. Cosculluela</i>	73
High speed double torsion testing of pipe grade polyethylenes: – Experiment and analysis <i>M. A. Wheel and P. S. Leever</i>	85
Dynamic fracture toughness of filled polymers using a global energetic criterion <i>G. Pluinage and R. Nevire</i>	100
Dynamic failure mechanisms in gallstones using lithotripsy <i>S. J. Burns, S. M. Gracewski, N. Vakil and A. R. Basu</i>	114
Stress wave focusing induced fracture – A photoelastic study <i>H. P. Rossmannith and R. E. Knasmillner</i>	127

Nonlinear effects of fracture of ceramics in stress waves	139
<i>V. Belyaev and O. Naimark</i>	
Photomechanics of surface-crack – wave interaction phenomena	151
<i>H. P. Rossmanith and R. E. Knasmillner</i>	
Measurement of transient crack tip fields using the Coherent Gradient Sensor.	182
<i>A. J. Rosakis, S. Krishnaswamy and H. V. Tippur</i>	
FE-Investigation on caustics for measuring impact fracture toughness	204
<i>S. Aoki and T. Kimura</i>	
Some experiments on measurement of dynamic stress intensity factor of fast propagating cracks	219
<i>S. Suzuki and S. Fukuchi</i>	
Experimental and numerical studies on fast curving fracture	232
<i>T. Nishioka, R. Murakami, T. Murakami and K. Sakakura</i>	
Study of dynamic crack propagation in polystyrene by the method of dynamic caustics	248
<i>G. A. Papadopoulos</i>	
Recent advances in data processing from caustics	260
<i>H. P. Rossmanith and R. E. Knasmillner</i>	
The transient analysis of a subsurface inclined crack subjected to stress wave loading	273
<i>C.-H. Tsai and C.-C. Ma</i>	
Numerical modeling of dynamic failure of elastic-plastic materials by Godunov's method	283
<i>X. Lin and J. Ballmann</i>	
Transient viscoelastodynamic response of cracked bodies	296
<i>H. G. Georgiadis</i>	
Dislocation generation by dynamically-loaded cracks and its effects on fracture characterization	309
<i>L. M. Brock</i>	
Dynamic interaction between dislocation and mode-III crack.	326
<i>M. K. Kuo</i>	

Micromechanics of craze-aided ductility of rubber-toughened plastics under dynamic loading	339
<i>J. Shioiri, T. Seki and M. Hirai</i>	
Microscopic fracture modes of brittle polymers in dynamic crack propagation	351
<i>T. Shioya and R. Ishida</i>	
Simulation of a fast Dugdale crack motion with varying velocity	362
<i>A. Neimitz and Z. Lis</i>	
Modelling dynamic fracture in polymers using a local modulus concept .	378
<i>A. Ivankovic and J. G. Williams</i>	
Author Index.	397
