

Contents

Preface	v
Contributors	ix
Development and Growth of Crop Root System	1
<i>Betty Klepper</i>	
I. Introduction	1
II. Monocotyledonous Root System	2
III. Dicotyledonous Root System	9
IV. Needed Research	14
References	18
Soil Environment Constraints to Root Growth	27
<i>Richard W. Zobel</i>	
I. Introduction	27
II. The Rhizosphere Environment	29
III. Root System Morphology	36
IV. Root-Soil Interactions	37
V. Conclusions	46
References	48
Root Function in Water Transport	53
<i>J.M. Baker, J.M. Wraith, and F.N. Dalton</i>	
I. Introduction	53
II. Water Entry into Roots	54
III. Root Function During Drought	63
IV. Concluding Remarks	66
References	67

Wheel-Induced Soil Physical Limitations to Root Growth	73
<i>Ward B. Voorhees</i>	
I. Introduction	73
II. Soil Physical Limitations to Root Growth	74
III. Extent and Influence of Wheel Traffic	75
IV. Root Growth	80
V. Root Growth and Crop Yield	85
VI. Subsoil Compaction	88
VII. Conclusions	91
References	92
Soil Chemical Factors Limiting Plant Root Growth	97
<i>Charles D. Foy</i>	
I. Introduction	97
II. Soil Chemical Factors	98
III. Solving the Shallow Rooting Problem	116
IV. Challenges for Future Research	129
V. Summary	130
VI. Acknowledgments	131
References	131
Root Extraction of Nutrients Associated with Long-Term Soil Management	151
<i>A.N. Sharpley, J.J. Meisinger, J.F. Power, and D.L. Suarez</i>	
I. Introduction	151
II. Effects of Long-Term Soil Management on Root Extraction of Nutrients	152
III. Interaction Among Management Factors	189
IV. Modeling Long-Term Management Effects on Root Extraction of Nutrients	192
V. Conclusions	199
References	200
Index	219
