

CONTENTS

<i>Preface</i>	v
----------------	---

KEYNOTE PAPERS

Some Mechanics Problems of Multi-Layered Materials <i>C.F. Shih</i>	3
The Mechanical Properties of Brittle Matrix Composites <i>A.G. Evans</i>	13
Ductile Fracture Behavior near the Crack-Tip - An Overview of Recent Japanese Research <i>M. Sakata</i>	23
Fracture of Polymers at Interfaces <i>H.H. Kausch and W.J. Cantwell</i>	29

INVITED PAPERS

Mixed-Mode Interfacial Fracture Mechanics <i>C.F. Shih and L. Cheng</i>	41
New Insights on Interfacial Fracture Mechanics <i>W. Yang</i>	51
A Theory of Fatigue Crack Initiation <i>T. Mura, S. Qin and H. Fan</i>	57
Stress Intensity Distributions around Surface Flaws in Motor Grain Geometries <i>C.W. Smith and L. Wang</i>	69

FRACTURE OF METALLIC MATERIALS

Study on the Ductile Fracture of Aluminium Alloy <i>M. Kikuchi and H. Miyamoto</i>	77
---	----

Fracture Toughness Transition Curve Shape for Ferritic Structural Steels <i>K. Wallin</i>	83
Fracture Initiation and Steady Crack Propagation of Elastic-Plastic Material in Plane-Stress Case <i>T. Zhuang and Z.F. Wang</i>	89
Fracture Toughness of Double Austenitized AISI M2 High Speed Tool Steel <i>E. Tekin and B. Ogel</i>	99
Elastic-Plastic Asymptotic Solution for Crack under Triaxial Stress Constraint <i>W.L. Guo and X.J. Fu</i>	107
Influence of Nickel on the Fracture Behaviour of Fe-0.2C Alloy <i>M. Srinivas, G. Malakondaiah and P. Rama Rao</i>	113
Fracture Toughness Simulation of Low Alloy Steel <i>M. Ayoub, H. Hamed and M. El-Nagar</i>	119
Effects of Cooling Rate on Fracture Toughness <i>M.O. Lai, H.S. Fong and W.Y. Lee</i>	125
Dynamic Fracture Study on CrNiMoV Alloy Steel under Different Heat Treatments and Impact Rates <i>Y.B. Sun, K.H. Lee and T.E. Tay</i>	130
A Study of Fracture Behaviour of Steel in Metal Cutting <i>H.Z. Wu and Z.W. Chen</i>	139

FRACTURE OF COMPOSITES AND POLYMERS

On the Fibre Pullout and Pushin Problem in Composite Materials with Controlled Interfaces <i>M.G. Lau and Y.W. Mai</i>	147
Crack Tip Plasticity in Unidirectional Metal Matrix Composites <i>S. Venkatakrisnaiah, M.W. Kennett, R.A. Dupuy and L.R. Dharani</i>	153
Stiffness Change and R-Curve Behaviour due to Matrix Cracking in Off-Axis Plies of Glass/Epoxy Laminates <i>P. Lee-Sullivan and A. Poursartip</i>	159

The Influence of Loading Rate on the Strength of Composite Materials <i>C.R. Chiang</i>	165
Stresses of Composite Laminates Containing Holes and Cracks <i>H.Y. Yeh and M.D. Le</i>	170
A Probabilistic Approach to Tensile Fracture of Composites with Holes <i>K.Y. Lin and M.C. Cheng</i>	176
The Effect of Ductile Innerlayer on the Fatigue and Transverse Tensile Behavior of Fiber-Reinforced Composite Materials <i>M.B. Hsu</i>	182
Fatigue of an Aluminium Alloy Reinforced with Oxide Ceramic Microspheres <i>M.J. Couper, B.R. Crawford, J.R. Griffiths and K. Xia</i>	188
Influence of Microstructure on Cyclic Stress Response and Cyclic Fracture Behavior of Aluminium Alloy Metal-Matrix Composite <i>T.S. Srivatsan, R. Auradkar, A. Prakash and E.J. Lavernia</i>	194
Effects of Internal/Residual Stresses on the Crack-Tip Failure Micromechanisms of Engineering Materials <i>I.M. Low and X.S. Li</i>	203
Static and Fatigue Damage Progression in Graphite Fibre Reinforced Peek <i>F. Aymerich, F. Ginesu, P. Priolo and S.W. Ming</i>	209
The Fatigue Crack Propagation Behaviour of Short Carbon Fibre Reinforced PEEK Composites <i>K.S. Saib, W.J. Evans and D.H. Isaac</i>	215
Applicability of Fracture-Based and Strength-Based Criteria to Debonding in Fibrous Composites <i>C.Y. Yue and W.L. Cheung</i>	221
Deformation and Fracture related to Friction and Wear of Aluminium Alloy (2014)-50 Vol% Graphite Particle Composites <i>Y.B. Liu</i>	228
Effects of Temperature and Humidity on Fracture Behavior of Thermoplastic Film <i>K. Kishimoto, M. Notomi and T. Koizumi</i>	237

Creep Rupture Modelling of Polyacetal <i>S.H. Teoh and W. Michaeli</i>	243
An Investigation of Damage Accumulation in Cross-Ply Glass/Epoxy Laminates <i>K.H. Leong and J.E. King</i>	251
Effects of Rate and Temperature on the Impact Fracture Toughness of Short Fibre Reinforced Plastics <i>I.M. Low and X.S. Li</i>	257

FRACTURE OF BIMATERIALS & ELECTRONIC MATERIALS

Mixed-Mode Fracture Analysis of Debonding and Matrix Crack Processes by the Virtual Crack Closure Method <i>F.G. Buchholz</i>	265
Three-Dimensional Fracture Analysis of a Thin Film on a Rigid Substrate <i>T. Nakamura</i>	271
Stress Concentration Prediction at a Fracture Site in Composite Bimaterial Plates under Axial Load <i>A. Harrison</i>	277
A Method for Evaluating the Lower Bound of Thermal Fatigue Life in Microelectronic Package Metals <i>R. Ohtani and T. Kitamura</i>	283
A Penny-Shaped Crack at a Transversely Isotropic Bimaterial Interface <i>Y. Wang and R.K.N.D. Rajapakse</i>	289
A Rigid Line Inclusion between Dissimilar Media <i>C.P. Jiang and C.T. Liu</i>	295

FRACTURE OF CERAMICS AND CONCRETE

Theoretical Modeling of Fracture Toughness of Fiber Reinforced Ceramics <i>A.A. Rubinstein</i>	303
An Evaluation of Static Fatigue Characteristics of Glass Ceramics in Water <i>Y. Kimura, T. Yagasaki, M. Ito and M. Watanabe</i>	309

Cycle Dependence in Fatigue Strength of Smooth Round Bar Specimens and Crack Growth Characteristics <i>A. Otsuka, H. Sugawara and T. Amano</i>	315
Creep and Static Fatigue of Magnesia-Partially-Stabilized Zirconia at Room Temperature <i>T.R. Finlayson, J.R. Griffiths, A.K. Gross and C.S. Lim</i>	321
Computer Simulation of Piezoceramic Fracture <i>D.N. Karpinsky and I.A. Parinov</i>	327
Fracture Process Zone for Mode I Concrete Fracture <i>Z.K. Guo, A.S. Kobayashi and N.M. Hawkins</i>	332
Some Observations on Microcracking in Concrete under Uniaxial Compression <i>Y.H. Loo</i>	338
Size and Notch Effects in Cementitious Materials <i>B. Cotterell and Y.W. Mai</i>	348
Evaluation of Fracture Toughness for Large Size Concrete Structures <i>R. Kumar and G.C. Nayak</i>	355
Indentation Fracture of High-Energy Ion Implanted Alpha-Alumina Single Crystals <i>R. Nowak, Y. Horino, K. Ueno, M. Kinoshita, W. Ensinger and M. Satou</i>	361
FRACTURE OF ADHESIVE JOINTS	
A Fracture Mechanics Approach to Adhesion at Steel-Polymer Interface <i>P. Balladon, J. Heritier, Y.T. Sun and A. Bonnard</i>	369
A Stress Analysis of a Butt Adhesive Joint Filled with Rigid Circular Fillers in an Adhesive <i>T. Sawa, K. Temma and T. Hiroshima</i>	375
Fracture Mechanics of Adhesive Joints - Effects of High Loading Rates and Low Temperatures <i>D. Grapotte and J-L. Lataillade</i>	381

Thermal Stress Distribution in Butt Adhesive Joints having a Circular Hole in an Adhesive <i>Y. Nakano, F. Nakagawa and T. Sawa</i>	387
The Application of Linear Elastic Fracture Mechanics to the Investigation of the Thermal Degradation of Adhesive Joints <i>Y.Q. Ye and B.W. Cherry</i>	393
The Fracture Strength of Circular Flange Joints Combining an Adhesive with Bolts <i>T. Sawa and K. Muto</i>	399

COMPUTATIONAL FRACTURE MECHANICS

Three-Dimensional Finite Element Analysis of Surface Cracks under Tension <i>A. Carpinteri</i>	407
Finite Element Analysis of Nonuniform Deformation of Laminated Plate <i>S. Aoki, K. Kishimoto and Y. Moriya</i>	413
Boundary Element Elastic Fracture Mechanics Analysis of Cracks at Inclusions <i>C.L. Tan, X.J. Zheng and Y.L. Gao</i>	419
The Dynamic Behavior of the Middle or Side Impact Loaded 3-Point Bend Specimen <i>H.R. Kao</i>	425
The Numerical Solution of Some Problems in Dynamic Fracture Mechanics <i>V.G. Boriskovski and V.Z. Parton</i>	431
On Calculating Forces on Dislocations with FEM <i>P. Stahle</i>	437
Crack Closure Studies of Bending Plate using a Mongrel Singular Finite Element <i>C.H. Kang, Z.Q. Feng, G. de Saxce and H. Nguyen-Dang</i>	443
Finite Deformation Analysis of Crack Tip Opening in a Power Hardening Material <i>F.S. Ma and Z.B. Kuang</i>	450

Modelling the True Microstructural Role in Deformation-Fracture Process of Real Compound Engineering Materials <i>V.N. Ivanov</i>	456
Finite Element Analysis of a Cracked Body with Residual Stresses Z.M. Wu, B.H. Zheng, Z.Y. Zhao and S.Y. Du	462

EXPERIMENTAL FRACTURE MECHANICS

Predicting Compressive and Shear Strengths of Anisotropic Sheets from Off-Axis Tensile Tests <i>J. Pouyet and R. Huchon</i>	471
Relationship between the Shape of Load-Deflection Curves and Fracture Surface observed using Instrumented Impact Testing <i>T. Varga, Q.C. Liu and F. Loibnegger</i>	479
Damage Detection using Holography and Shearography <i>S.L. Toh, H.M. Shang, F.S. Chau, C.J. Tay and T.E. Tay</i>	489
Digital Photoelastic Determination of SIFs for a Crack Arbitrarily inclined to and Terminated at a Bimaterial Interface <i>W.C. Wang and J.T. Chen</i>	497
Fracto-Electron Emission during Fracture of Engineering Ceramics <i>Y. Enomoto and M.M. Chaudhri</i>	503
Anomalous Post-Yield Brittle Fracture in Textured Zinc - Application of Neutron and X-Ray Analysis <i>R. Nowak and R. Wawszczak</i>	511
Fracture Toughness of Thin CCT Specimen <i>K. Machida, M. Kikuchi and H. Miyamoto</i>	517
A Study of the Loading Rate Effect on the Crack Growth Behavior in a Composite Solid Propellant <i>H.Y. Yeh, M.D. Le and C.T. Liu</i>	523
The Growth of the Surface Crack on Shaft Component and a Reliability Analysis of Fracture Parameter <i>K.J. Peng, Y.J. Zhao and Y.L. Wei</i>	529

FATIGUE FRACTURE

Cumulative Damage Effects in High Cycle Multiaxial Fatigue <i>D.L. McDiarmid</i>	537
---	-----

The Mixed Mode II/III Threshold for Mild Steel <i>A. Hellier, M. Young and D. Corderoy</i>	543
The Effect of Repeated Annealing on Fatigue Behavior in Extremely Low Cycle Fatigue <i>J. Komotori, H. Hongo and M. Shimizu</i>	551
Load Interaction Toughening under Monotonic and Cyclic Conditions <i>Y. Katz, M. Kupiec and A. Bussiba</i>	558
Estimation of the Maximum Crack Length for Prediction of Remaining Life based on Statistics of Extremes <i>M. Ichikawa, T. Takamatsu and T. Sawada</i>	564
Cyclic Properties and Hysteresis Energy Accumulation in Selected Sintered Steels <i>J. Kaleta, A. Piotrowski and H. Harig</i>	570
Experimental Study on Fatigue Crack Closure of Small Cracks at Notches <i>Y.Q. He, Z.N. Li, C.H. Kou and Q.Z. He</i>	576
Shape-Optimized Frameworks with Increased Fatigue Life <i>A. Baumgartner and C. Mattheck</i>	582
Simplified Elastoplastic Analysis of Three-Dimensional Fatigue Crack Growth <i>C. Poette</i>	585
Negative Overload Effects in Fatigue Crack Growth <i>H.J.C. Voorwald and M.A.S. Torres</i>	591
CREEP FRACTURE	
Near-Tip Fields around Cracks Growing Steadily in Creeping Materials with Damage <i>K.C. Hwang, W. Jiang and T.F. Guo</i>	599
Creep Fracture by Finite Element Method <i>A.T. Chang and Y. Kim</i>	605
Effect of Substructure on Creep Ductility <i>L.C. Lim, H.H. Lu and O. Ajaja</i>	611
Creep Fracture Resistance of Uranium Dioxide <i>T.E. Chung and T.J. Davies</i>	619

Investigation on the Grain Boundary Cracking Mechanism of Cyclic Creep in an Al-4% Mg Solid Solution Alloy	625
<i>S.W. Nam, S.I. Park and D.H. Lee</i>	

FRACTURE OF WELDMENTS AND HEAT AFFECTED ZONES

The Fracture Mechanics of Electron Beam Welded Rotors	633
<i>P.A. Coulon</i>	
Fatigue Analysis of Unstress-Relieved Cruciform Welded Joints	639
<i>H.L.J. Pang and T.G.F. Gray</i>	
Brittle Fracture Initiation in Local Brittle Zones	645
<i>P. Woollin and J.F. Knott</i>	
Fracture Behaviour of the Heat Affected Zone (HAZ) of Boron Treated QT Steel	653
<i>J.G. Youn and J.F. Knott</i>	
Crack Initiation Mechanisms in Duplex Stainless Steel HAZ Microstructures	659
<i>S. Atamert and J.E. King</i>	
Cleavage Initiation in Simulated HAZ Microstructures	665
<i>V.M. Linton and J.E. King</i>	

FRACTURE OF AEROSPACE AND ADVANCED MATERIALS

The Growth of Microstructurally Small Cracks in a Near Alpha Titanium Alloy	673
<i>S.H. Spence, W.J. Evans and P.J. Nicholas</i>	
Fracture Mechanics Characterization of Intermetallic Ti_3Al Compounds at High Temperatures	679
<i>K. Hirano</i>	
Growth of Fatigue Cracks Emanating from Notches in Titanium Aluminide	685
<i>B.K. Parida and T. Nicholas</i>	
Cyclic Stress Response and Fatigue Fracture Characteristics of 7150 Aluminium Alloy	691
<i>T.S. Srivatsan, D. Lanning, V.K. Vasudevan and G.B. Viswanathan</i>	

The Role of Crack Closure in Corrosion Fatigue of Aluminium Alloy Plate for Aerospace Structures <i>R.M.J. Kemp, R.N. Wilson and P.J. Gregson</i>	700
Some Features of Fatigue Fracture of the Superalloy Monocrystals <i>R. Tkachenko and M. Rozanov</i>	706
The Mechanism and Kinetics of Propagation - Low Cycle Fatigue Cracks in the Components of Jet Engine <i>I. Birger and T. Balepina</i>	711
Biaxial Fatigue Testing of a High Strength Titanium Alloy <i>W.J. Evans and M.R. Bache</i>	714
Effect of Heat Treatment on Tensile Properties and Fracture Behaviour of Titanium Alloys VT9 and IMI685 <i>M. Tavafoghi, A.K. Singh, C. Ramachandra and V. Singh</i>	720
Effect of Cold Work after Quenching on the Fatigue Life of a Type 7475 Aluminium Alloy <i>A. Zangrandi and A.M.M. Nazar</i>	726

ENVIRONMENTAL EFFECTS ON FRACTURE

Hydrogen-Assisted Fatigue Crack Growth in Structural Steel <i>M.W. Carroll and J.E. King</i>	735
Fatigue Behaviour of Structural Carbon Steel under Corrosive Media <i>M. Ayoub, M. WI-Nagar and H. Hamed</i>	741
The Combined Effects of Ageing and Hydrogen Embrittlement on Fatigue Crack Propagation in a Duplex Stainless Steel <i>T.J. Marrow and J.E. King</i>	747
Cracking of 5052 Al Alloy in 3% NaCl <i>K.S. Khawaja and F. Sarioglu</i>	753
Corrosion Fatigue and Fracture Behaviour of Shot Peened Carbon Steels <i>M.C. Sharma and N.K. Mittal</i>	758

FAILURE CRITERIA AND DAMAGE MECHANICS

Two-Parameter Fracture Mechanics: A Comparison of Continuum and Micromechanics Approaches <i>T.L. Anderson</i>	767
---	-----

A New Concept to Determine the Fracture Load of Cracked and Notched Components <i>H.A. Richard and G. Kullmer</i>	773
Study on the Fracture Criterion of a Completely Brittle Crack by Considering the Restraining Stress between Atomic Planes <i>K. Watanabe, Y. Sato and Y. Sasaki</i>	779
A New Fracture Theory for Solids and Composite Systems <i>C.C. Hsiao</i>	785
The Prediction of Low Cycle Fatigue Life by Continuum Damage Mechanics <i>Q. Gao, J. Zhai and G.Q. Wang</i>	792
A General Ductile Damage Model for Engineering Materials <i>T.J. Wang</i>	798
Energy Based Z-Criterion in Fracture Analysis of Composite Plate under Bending <i>S.Q. Zhang, Y.Z. Zhu and W.Y. Yang</i>	804
Deformation of Cavitated Superplastic Alloys <i>A.R. Ragab and M. Zaki</i>	810
Instabilities in Fracture of Elastic-Softening Structures <i>L. Biolzi and J.F. Labuz</i>	821
Fracture of Brittle Materials under Compression <i>L.V. Nikitin</i>	827
Statistical Theory of Fracture of Structural Materials at Damage Accumulation <i>I.M. Dunaev</i>	832
Continual Theory of Fracture of Composite Materials at Bearing Strain of End Faces in Compression <i>A.N. Guz</i>	838
Delayed Fracture of High Strength Steels and its Criteria <i>V.I. Sarrak, V.M. Mishin and A.Y. Spector</i>	844

METHODS AND APPLICATIONS

Leak-Area Evaluations in Fast Breeder Reactor Piping <i>S. Bhandari, J.P. Debaene, C. Faidy and L. Grueter</i>	853
---	-----

Applications of Fracture Mechanics in Residual Stress Measurement of Cold Worked Holes <i>M.O. Lai, J.T. Oh and A.Y.C. Nee</i>	859
Some Observations of Damaged Bridge Specimens subjected to Repeated Loading <i>T.S. Lok, J.A.J. Hamel, J.R. White and G.A. Nield</i>	866
Failure Prevention by Shape Optimization on the Basis of Biological Growth <i>F. Walther and C. Mattheck</i>	876
Stress Conditions at Propagating Fatigue Cracks <i>Y. Lin, S. Wu and A. Abel</i>	882
Shear Stress Distribution in Notch Problem under Sliding Mode Case <i>W.Z. Lin, K.H. Lee, S.T. Chow and Y.Z. Chen</i>	888
Analysis of a Flat Annular Crack under Skew-Symmetric Loading <i>H.G. Beom and Y.Y. Earmme</i>	895
An Engineering Method for Elastic-Plastic Fracture Analysis and Integrity Assessment of Surface Cracked Structures <i>Ning Jie</i>	901
Crack Border Stresses in Three-Dimensional Elastic Bodies <i>W.L. Guo and X.J. Fu</i>	907
Prediction of Carrying Capacity Loss in Metal Structures during their Service <i>V.Y. Mikhailov and V.P. Larionov</i>	913
Using The Bessel Integral Equation to Solve the Orthotropic Plate with Crack Problem in Equivalent Space <i>Z.R. Tian</i>	917
A General Method for Multiple Crack Problems in a Finite Plate <i>Y.H. Wang and C.Z. Li</i>	923
