

Table of Contents

Preface	v
Knuth's Problem R.S. Bird	1
The Derivation of Hierarchies of Algorithms on Matrices J. Jeuring	9
Intersections of Sets and Bags of Extended Substructures – A Class of Problems E.A. Boiten	33
Towards the Synthesis of Static Parallel Algorithms: A Categorical Approach P.G. Harrison	49
A Note on Similarity of Specifications and Reusability of Transformational Developments H.A. Partsch, E.A. Boiten	71
Structure and Design of Problem Reduction Generators D.R. Smith	91
Type Analysis and Data Structure Selection J. Cai, P. Facon, F. Henglein, R. Paige, E. Schonberg	125
DTRE – A Semi-Automatic Transformation System L. Blaine, A. Goldberg	165
Functional Specifications for Mathematical Computations J.M. Boyle, T.J. Harmer	205
Transformational Implementation of Historical Reference M.S. Feather	225
Integrating REFINE Prototypes in a VDM Development Framework Y. Ledru, M.-H. Liégeois	243
Program Transformation Expressed in the DEVA Meta-Calculus R. Gabriel	267
Relational Catamorphisms R.C. Backhouse, P.J. de Bruin, G. Malcolm, E. Voermans, J. van der Woude	287

Partial Relations for Program Derivation – Adequacy, Inevitability and Expressiveness A.M. Haeberer, P.A.S. Veloso	319
Relations as a Program Development Language B. Möller	373
Transforming Algebraic Specifications – Lessons Learnt from an Example P. Pepper	399
Synthesizing Abstract Data Type Representation in the DEVA Meta-Calculus D. Bert, S. Sebbar	427
Declarative Programming in a Type Theory E. Tyugu	451
Improvements in Program Synthesis Using Fine-Grain Sorted Logic J. Burghardt	473
Discussion Transcripts	497
Discussion 1: What Are Formal Methods?	499
Discussion 2: What Good Are Formal Methods?	503
Discussion 3: Formal Methods: Whence and Whither	509
Author Index	515
