

CONTENTS

Studies in Surface Science and Catalysis.....	IX
Foreword.....	XI
Préface.....	XIII
Catalysis by solid bases and related subjects (K. Tanabe).....	1
A TPD, FT-IR and catalytic study on the interaction of methanol with pure and KOH doped TiO ₂ anatase (G. Busca, P. Forzatti, J.C. Lavalley and E. Tronconi).....	15
Acid and base strength of alumina-magnesia mixed oxides (J.A. Lercher, Ch. Colombier, H. Vinek and H. Noller).....	25
Influence of the operating conditions on the morphology and acidity of K ₂ CO ₃ /γ Al ₂ O ₃ (X. Montagne, C. Durand and G. Mabilon)....	33
Acidic reactions on some transition metal oxide systems (B. Grzybowska-Swierkosz).....	45
Modification of the acidity and basicity of the surface oxide catalysts (S. Malinowski).....	57
Basic molecular sieve catalysts/side-chain alkylation of toluene by methanol (J.M. Garces, G.E. Vrieland, S.I. Bates, F.M. Scheidt)...	67
Importance of the acid strength in heterogeneous catalysis (D. Barthomeuf).....	75
Structure and acidic properties of high silica faujasites (F. Maugé, A. Auroux, J.C. Courcelle, Ph. Engelhard, P. Gallezot and J. Grosmangin).....	91
Acidity in zeolites (A.G. Ashton, S. Batmanian, D.M. Clark, J. Dwyer, F.R. Fitch, A. Hinchcliffe and F.J. Machado).....	101
Acidic and basic properties of aluminas in relation to their properties as catalysts and supports (H. Knözinger).....	111
Reactivity of isopropanol on K- and Cs-exchanged ZSM-5 and mordenite (J.B. Nagy, J.-P. Lange, A. Gourgue, P. Bodart and Z. Gabelica)....	127
Quantitation and modification of catalytic sites in ZSM-5 (E.G. Derouane, L. Baltusis, R.M. Dessau and K.D. Schmitt).....	135

Characterization of acidic properties of heteropoly compounds in relation to heterogeneous catalysis (M. Misono).....	147
Heteropoly compounds : solid acids with guarded protons (J.B. Moffat).....	157
Heteropolyacids as solid-acid catalysts (Y. Ono, M. Taguchi, Gerile, S. Suzuki and T. Baba).....	167
New covalent boron (III)-molybdenum (VI) mixed oxo model compounds as eligible hetero bimetallic catalysts for propylene epoxidation (E. Tempesti, L. Giuffre, C. Mazzocchia and F. Di Renzo).....	177
Catalytic activities and selectivities of crystalline ϵ -Zr(HPO ₄) ₂ (K. Segawa, Y. Kurusu and M. Kinoshita).....	183
Calorimetric study of adsorption of ammonia at 420 K on bismuth molybdate (2 : 1) (L. Stradella).....	191
Skeletal isomerization of n-butene over modified boron phosphate (B.P. Nilsen, M. Stoecker and T. Riis).....	197
Catalytic application of hydrophobic properties of high-silica zeolites. II. Esterification of acetic acid with butanols (S. Namba, Y. Wakushima, T. Shimizu, H. Masumoto and T. Yashima)...	205
The mechanism of n-pentane transformation over solid superacids Al ₂ O ₃ /AlCl ₃ (M. Marczewski).....	213
Factors affecting the deactivation of zeolites by coking (E. G. Derouane).....	221
Valorisation des oléfines : oligomérisation catalysée par le trifluorure de bore (C. Marty et Ph. Engelhard).....	241
Upgrading of C ₄ cracking cuts with acid catalysts (B. Juguin, B. Torck and G. Martino).....	253
Hydrocracking of n-heptane on Pt-HZSM-5. Effect of calcination and reduction conditions (G. Giannetto, G. Perot and M. Guisnet).....	265
Transition ions exchanged zeolites as cracking catalysts (D. Cornet and A. Chambellan).....	273

Characterization of acid catalysts by use of model reactions (M. Guisnet).....	283
Application de la résonance magnétique nucléaire à l'étude de la distribution et de l'acidité de l'eau de constitution des solides (C. Doremieux-Morin et J. Fraissard).....	299
Microcalorimetric characterization of acidity and basicity of various metallic oxides (A. Auroux and J.C. Vedrine).....	311
Determination de l'acidité de catalyseurs solides en milieu aqueux à l'aide d'un marqueur cinétique (R. Durand, P. Geneste, C. Moreau et S. Mseddi).....	319
Degradation mechanism of 3-methyl-pentane on a supported superacid catalyst studied by the ^{13}C isotopic tracer technique (F. Le Normand and F. Fajula).....	325
Relationship between catalytic activity and acid strength of LaHY zeolites in cumene cracking and o-xylene isomerization (She Li-Qin, Hung Su and Li Xuan-Wen).....	335
Acid properties of a bidimensional zeolite (D. Plee, A. Schutz, G. Poncelet and J.J. Fripiat).....	343
Thermal stability and acidity of Al^{3+} cross linked smectites (D. Tichit, F. Fajula, F. Figueras, J. Bousquet and C. Gueguen)....	351
Mechanisms of the acid-catalyzed isomerization of paraffins (F. Fajula).....	361
Acidic catalysis and radical assistance (D. Brunel, H. Choukroun, A. Germain and A. Commeyras).....	371
Alkylation of benzene with propene on benzyl sulfonic acid siloxane catalysts (A. Saus, B. Limbäcker, R. Brülls and R. Kunkel).	383
The conversion of dimethylether over Pt/H-ZSM5. A bifunctional catalyzed reaction (C.W.R. Engelen, J.P. Wolthuizen and J.H.C. Van Hooff).....	391
Acid-catalyzed conversion of n-decane over high-silica faujasites (P.A. Jacobs, J.A. Martens and H.K. Beyer).....	399

VIII

A new approach to the cracking of alkanes as a test reaction for solid acid catalysts (A. Corma and V. Fornés).....	409
Comparison of the reactions of ethylcyclohexane and 2-methylheptane on Pd/LaY zeolite (J. Weitkamp and S. Ernst).....	419
Primary cracking modes of long chain paraffinic hydrocarbons in open acid zeolites (J. A. Martens, J. Weitkamp and P.A. Jacobs)....	427
Catalyseurs isolants et acidité - les acides paradoxaux (Y. Trambouze).....	437
