

TABLE OF CONTENTS

SESSION 1: Kinematics and Dynamics Modelling (Part 1)

Chairman: B.R. FOX

Computational aspects in robot dynamics modelling M.J. ALDON and A. LIEGEOIS	3
Tools for modelling the kinematics of multi-body systems E.J. SOL, F.E. VELDPAUS, and J.D. JANSSEN	15
Dynamic modelling of manipulators with flexible members M. GERADIN, G. ROBERT, and C. BERNARDIN	27

SESSION 2: Adaptive Control

Chairman: P. GASPART

A relational control mechanism for flexible assembly B.R. FOX and C.Y. HO	43
Adaptive digital control for a heavy manipulator P. VÄHÄ and A. HALME	55
Optimal-adaptive control for a flexible transmission in a mechanical articulation R. ARACIL and J.A. ZANINI	69
Self-tuning adaptive control of manipulators G.G. LEININGER	81

SESSION 3: Languages (Part 1)

Chairwoman: G. GINI

LM-GEO. Geometric programming of assembly robots E. MAZER	99
A distributed system for symbolic computation in robotic vision G. ADORNI, S. GAGLIO, L. MASSONE, and R. ZACCARIA	111
Design of the structured robot language (SRL) C. BLUME and W. JAKOB	127

SESSION 4: Kinematics and Dynamics Modelling (Part 2)*Chairman: A. LIEGEOIS*

Dynamic modelling of robot manipulators containing closed kinematic chains S. MEGAHED and M. RENAUD	147
Software for solving the inverse kinematic problem for robot manipulators in real time L. VAN AKEN and H. VAN BRUSSEL	159

SESSION 5: Geometric Modelling*Chairman: M. PARENT*

Trajectories calculations in the joint space of robots W. KHALIL	177
On the collision free movement of a manipulator H. OZAKI, A. MOHRI, and M. TAKATA	189
Automatic grasping: A case study in accessibility analysis C. LAUGIER and J. PERTIN	201
A robot language system with a colour graphic simulator T. ARAI	215

SESSION 6: System Architecture*Chairman: A. DANTHINE*

Software system for modular robots T.W. THATCHER, R.H. WESTON, P.R. MOORE, and A.D. GASCOIGNE	229
Some computing issues in multiple robot systems S. SEDILLOT	245

SESSION 7: Computing aspects of sensing devices*Chairman: H. VAN BRUSSEL*

Robot control algorithms for visual edge tracking D. GELBGRAS, M. BOGAERT, and G. CLERMONT	263
---	-----

A sensor information preprocessing system for manipulators based on distributed microcomputers P. KÄRKKÄINEN	279
Turbine blade image processing/robot vision system N.S. PAGE, W.E. SNYDER, and S.A. RAJALA	289
SESSION 8: Languages (Part 2)	
<i>Chairman:</i> M. LECOQ	
A multi-robot high level programming system for assembly C.W. BURCKHARDT and C. MARCHIANDO	301
The tools of synchronization of the LMAC system for the cooperation of industrial robots J.C. BONIN, J.P. ELLOY, A. HAURAT, P. MOLINARO, and M.C. THOMAS	311
Requirements for robot off-line programming shown at the example ROBEX M. WECK, W. EVERSHEIM, T. NIEHAUS, D. ZÜHLKE, and M. KALDE	321
SESSION 9: Artificial Intelligence	
<i>Chairman:</i> D. RIBBENS	
A model for representing and invoking robot bodily skills H. JÄPPINEN	333
On the problem of identifying an object in a robotics scene from a verbal imprecise description H. FARRENY and H. PRADE	343
General approach to assembly robot control G. REYMAN	353
Author Index	365
List of Participants	367
