

CONTENTS

PART ONE - PROCESSING: SHAPING OPERATIONS

Current Trends in the Analysis of Polymer Shaping
Operations (Invited Lecture). 1
M.R. Kamal and G.L. Bata

The Conductivity Distribution in Injection Moulded
LDPE and HDPE Containing Carbon Black 47
C. Klason and J. Kubát

High Pressure Injection Moulding of
Polyethylene. 53
J. Kubát, J.-A. Manson, and M. Rigdahl

Irradiation of High Density Polyethylene Filled
with Colloidal Silica 61
G. Akay, F. Cimen, and T. Tincer

The Role of Melt Rheology in Parison Formation. 71
J.M. Dealy and N. Orbey

Melt Rheology and Processability of Polyethylenes 79
L.A. Utracki, A.M. Catani, J. Lara, and
M.R. Kamal

Void Formation in Extruded Bars 89
G. Titomanlio, S. Piccarolo, and G. Marrucci

Utilization of Rheological Real Time and Sampling
Measurements for Quality Control of Polymer
Materials and Processes (Abstract) 97
J.M. Starita

PART TWO - PROCESSING: OPERATIONS OTHER THAN SHAPING

Polymer Processing Operations Other Than Shaping
(Invited Lecture) 101
C.D. Denson

Mechanochemical Degradation of Glass Fibre Reinforced Polypropylene Melts During Flow.	115
G. Akay, D.W. Saunders, T. Tincer, and F. Cimen	
Applications of a RIM Process Model.	123
S.R. Estevez and J.M. Castro	
Design Principles for Barrier-Screw Extruders (Abstract) . . .	131
J.T. Lindt and B. Elbirli	
Continuous Processing of Polymerizing Fluids IV: Continuous Mechanism in a Channel of a Screw- Extruder	133
J.T. Lindt and B. Elbirli	
Processing of Thermosets	143
J.C. Halpin, A. Apicella and L. Nicolais	
Adapting a Microprocessor System to Autoclave Processing . . .	153
R.E. Coulehan	
PART THREE - RELATIONSHIPS BETWEEN PROCESSING AND PROPERTIES	
Heat Transfer and Kinetics of Flow Induced Crystallization as Intertwined Problems in Polymer Melt Processing (Invited Lecture)	159
H. Janeschitz-Kriegl and F. Kügler	
On the Deformation of Polycarbonate in the Glassy State.	183
K. Bielefeldt, B.-J. Jungnickel, and J.H. Wendorff	
The Development of Super-Strong Polymers in Planar Directions (Abstract).	197
A.E. Zachariades	
Relationship Between Processing Induced Morphology, Molecular Orientations and Mechanical Behaviour of Amorphous Polymers	199
K.P. Großkurth	
Effects of Processing on the Structure and Properties of PVC	207
B. Terselius and J.-F. Jansson	
Correlation of Non-Linear Rheological Properties of Polymer Melts with Weld-Line Strength.	215
R. Pisipati and D.G. Baird	

Melt Strength and Extensibility of High-Density Polyethylene.	229
F.P. La Mantia and D. Acierno	

PART FOUR - PROPERTIES OF POLYMERIC MATERIALS

New Findings on the Mechanical Behaviour of Plastics (Invited Lecture)	239
R. Knausenberger, T. Krehwinkel, G. Menges, E. Schmachtenberg, and U. Thebing	
Viscoelasticity, Ultimate Mechanical Properties and Yielding Mechanisms of Thermally Crystallized Polyethylene Terephthalate	261
G. Groeninckx	
Shear Strength Characteristics and Shear Creep Modeling of Low Density Rigid Polyurethane Foam.	271
P. Mäkeläinen and O. Holmijoki	
Blends of Polystyrene and Thermotropic Liquid Crystals - Phase Relations and Rheological Properties.	279
R.A. Weiss, W. Huh, and L. Nicolais	
Shear Behaviour of Molten Linear Low Density Polyethylene.	285
D. Acierno, A. Brancaccio, D. Curto and F.P. La Mantia	
Analysis of Failure Behavior of Polymeric Composite Materials with the Method of Acoustic Emissions (Abstract)	293
C. Caneva, M. Mazzola, E. Martuscelli, and M. Malinconico	
Plasticizers Migration from PVC: Correlations with Structure and Service-Performance	295
G. Pastuska	
Time-Dependent Properties of Statically Deformed Glassy Polymers: Dynamic Modulus and Gas Transport	301
T.L. Smith and Theonis Ricco	
Nonlinear Viscoelastic Characterisation of Polymeric Materials	311
H.F. Brinson, C.C. Hiel, A.H. Cardon, and W.P. De Wilde	

Describing the Long Term Nonlinearity of Plastics.	319
O.S. Brüller	
Origins of the Toughness of Fibrous Composites	329
P.W.R. Beaumont and J.K. Wells	
Positive and Negative Shear of the Vinyl Chloride.	337
Zdeněk Sobotka	

PART FIVE - STRUCTURAL MODELING OF POLYMER PROPERTIES

Structural Modelling of Polymer Properties (Invited Lecture) .	347
A.J. de Vries	
The Role of the Binder in the Ageing of a Filled Elastomer.	379
Z. Laufer, Y. Diamant, S. Gonen and D. Katz	
Molecular Field Theory for the Rheological Properties of Moderately Concentrated Polymer Solutions (Abstract)	387
W. Hess	
A Treatise on the Elastic and Hygroexpansional Properties of Paper by a Composite Laminate Approach	389
L. Salmén, A. de Ruvo, and L. Carlsson	
Viscoelastic Properties of Copolymers: Relations with Structure	399
J.P. Montfort, J. Lebez, G. Marin, and Ph. Monge	
Relationship Between Ptitsyn-Eizner λ Parameter and Conformational Transition.	405
I. Katime, P. Gutierrez Cabañas, and C. Ramiro	
Properties of PMMA Stereocomplex in Solid State and Solution	413
I. Katime and J.R. Quintana	
The Effect of Plasticization on the Structure of Highly Crosslinked Materials, and the Formation of the Interphase in Two-Phase Systems (Abstract)	419
B. Kefalas	
Generalized Anisotropic Descriptions for the Dynamic Mechanical Properties of Crystalline Polymers.	421
J.C. Seferis, A.E. Elia, and A.R. Wedgewood	

Mechanism of Moisture Absorption in Metal-Filled Epoxies	439
P.S. Theocaris, G.C. Papanicolaou, and E.A. Kontou	
INDEX	449
