PREFACE	
PROGRAMME	657
ICP MEMBERS MEETING	665
OPENING SESSION	673
ICP AWARD CEREMONY	683

INTRODUCTORY REPORTS

Němec, J.: Investigation of mechanical properties of plastics for industrial applications	11
Dietz, A.G.H.: Past, Present and Future in Plastics in Building	689

GENERAL REPORTS

Langlie, C.: Symbiosis of architecture and engineering in structures of plastics	705
Czarnecki, L.: Material engineering in plastics-based materials	723
Gamski, K.: Plastics and the saving of energy	735

T O P I C 1

SYMBIOSIS OF ARCHITECTURE AND ENGINEERING IN STRUCTURES OF PLASTICS

Introductory Lecture:

Makowski, Z.S.: Symbiosis of architecture and engineering in the development of structural uses of plastics	59
---	----

Subtopic A: Engineering and Architecture

Csorba, E.M.: UNIDO Housing projects using plastic materials	29
Dieterich, G.: Polyurethane foam antenna shields	35
Ekchian, R.: FRP at the conquest of the Alps	39
Filipkowski, J., Markowski, H.: Roof over open-air theatre in Polczyn-Zdroj /Poland/ and some experimental investigation	43

<i>*Pre-symposium volume</i>	Part I	1 - 542	
	Part II /late papers/	543 - 652	
<i>Post-symposium volume</i>	Part III	653 - 954	
<i>/Other late papers, Introductory Reports, General Reports and Introductory Lectures - unless included in the first part - together with communications and discussions/</i>			

Pift, V.: Formfinding of membrane structures	49
Kupilik, V.: Health hazards produced by the use of plastics	55
Paillere, A.M., Rizoulieres, Y.: Effectiveness of products used for repairing concrete structures	73
Patfoort, G.A.: Structural synergism of form and function	79
Suchomel, M.: Use of polymer concretes in reproduction of sculptures	87
Cadolini, M.: Valences of plastic structural types in architecture	547
Englebert, J.: The C.R.A.U. System	563
Gamski, K.: Structural epoxy binders in designing and in engineering of joints, repair reinforcement and to protect the concrete structures	571
Lasovský, J.: Plastics and architecture	579
Urbánek, F.: Plastics in interiors of buildings - aesthetic and functional qualities	583
Berglund, S.: How to connect polymer thinking with the building trades	773
Ondráček, R.: Problems of utilization of plastics in the restoring and preservation of artistic relics - sculptures, painting, artisan's works of art and historical style architecture	779

Subtopic B : Foils in Structures

Bartůšek, J.: The use of plastic foils in the Czechoslovak hydraulic engineering	93
Faure, Y.: Discharge estimation and flow pattern in the case of a leak across an impermeable sheet	99
Gourc, J.P., Maticard, Y., Perrier, H.: Reinforcement of unpaved roads by geotextiles	105
Gudev, N.K.: Behaviour of hydroinsulating sheets of thermoplastics directly laid in thermoinsulating slabs of foam plastics	109
Zibbat, H.: Plastic coating used as wearing course and impervious blanket in railroad bridge construction	115

Subtopic C . Sandwich Structures

Chistyakov, A.M., Panferov, K.V., Guryev, V.V.: Form stability of foam heater in sandwich panels	123
Freidin, A.S., Vuba, K.T.: Prediction of long-term strength and deformational properties of structural adhesives joints	127
Liška, E.: The component system of reinforced polyester tanks	131

Taranu, N., Budescu, M.: Experimental work on structural properties of GRP and rigid polyurethane foam sandwich elements	135
Bobryashov, V.M.; Yermolov, S.B., Bondar, S.V.: Creep of rigid polyurethane foam core in sandwich panels	593
Halahyja, M., Bečko, B., Sternová, Z.: An application of the foam polystyrene in external walls of apartment buildings	599
Lavička, J.: Sandwich panels for external walls	605
Petersson, B-A.: Moisture mechanics and thermal insulation properties of expanded plastics used as thermal insulation in upside-down roofs	789
Courtade, R.M., Hamelin, P.: Sandwich structures with a foamed core - some results on their viscoelastic behaviour	795
<u>Subtopic D : Bearings in Structures</u>	
Müller, F.A.: Elastomer-bearings for precast concrete columns function and dimensioning	141
Sasse, H.R.: Polymer bearings in building constructions. Materials, dimensioning, application, testing	149
Schrage, I., Sasse, H.R.: On the slip resistance of non-anchored elastomer bearings for civil engineering	155
<u>Subtopic E : Analysis of Structures and Elements from plastics</u>	
Doubravazky, H.: Recovery analysis of plastic structures	161
Einsfeld, U.: Experiences about the application of GRP-structural members	167
Franke, L.: Behaviour and design of high-quality glass-fiber composite rods as reinforcement for prestressed concrete members	171
Garay, L.: Design requirements for load-carrying plastic structures	175
Hollaway, L., Ishakian, V.G.: The analysis of GRP skeletal/continuum structures	183
Rübben, A.: Load carrying plastics - possibilities of dimensioning and construction	195
Ryska, J.: Design of construction of glass/epoxy composites under repeated loading	201
Boemer, J.A.: New constructive conception for folded plastic structures	613
Teters G., Kregers, A.: A structural model of spatially reinforced composites	801
<u>Communications and Discussions</u>	
<u>Summary of the Work of Section 1</u>	805

T O P I C 2

MATERIAL ENGINEERING IN PLASTICS-BASED MATERIALS

Introductory Lecture

Kukacka, L.E.: Concrete-polymer composites; current status and future research needs 815

Subtopic A : Rheology, Viscoelasticity, Durability

Hristova, J.: The temperature-time analogy in the case of polymer concrete 211

Hugo, J., Sova, M.: Time-dependent damage of thermoplastics composites 217

Ghosh, R.K., Pant, C.S., Chatterjee, M.R.: Laboratory and field investigations with synthetic resins 223

Minster, J.: The application of analogy methods to the prognosis of rheological properties of viscoelastic materials 229

Rigo, J.M.: New way of measure in rheology of fresh concrete 235

Sasse, H.R., Schrage, I.: Ageing of polymer's in building 239

Seliaev, V.P., Solomatov, V.I., Weiss, V.: Statistical models for strength and degradation of structural plastics 249

Skupin, L.: Some examples of application of plastics to building structures in Czechoslovakia 259

Veselý, K.: Polyolefin composites 267

Opočenský, V.: Photodegradation of insulated skin of the cladding element from PVC 621

Subtopic B: Polymer Impregnated Concrete

Alexeev, A.S., Boichenko, J.P., Kestelman, V.N., Jakshin, K.V.: Radiation-hardened compositional building materials 275

Avram, C., Bob, C., Rosu, M.: Some properties of polymer impregnated concrete 627

Maximov, Y.V.: Effect of monomer use for cement concrete impregnation 279

Staynes, B.W.: Vacuum impregnated epoxide composite for superconducting turbogenerators 283

Subtopic C: Polymer Concrete

Borislavskaya, I.V.: Corrosion resistance of polymer concretes 293

Hop, T., Miodyński, Z.: Phenolic mortars for acid resistant floors 297

Jokiel, M., Kachlicki, B., Rożycki, J., Sychala, A.: Some strength bearing properties of polyester concrete 301

Kapasný, L.: Design of the optimum grading of aggregates for resin mortars	307
Kawakami, M., Tokuda, H., Kagaya, M.: Some physical properties of light weight polymer concrete	311
Ohama, Y., Demura, K., Terata, O.: Penetration resistance test for determining working life of polyester concrete	317
Paturoev, V.V., Soloviev, G.K., Krasilnikova, O.M.: Optimization of dielectric properties of polymer concrete	321
Schwabe, A.: The production of polymer concrete	315
Seljaev, V.P., Solomatov, V.I., Juravleva, V.N.: Polymer concrete durability in aggressive media	333
Speck, E.: Cost saving technologies. New application of polymer concrete	337
Uriev, N.B., Chernomaz, V.E.: Structure and mechanical properties of filled epoxy compositions	341
<u>Subtopic D: Structure of Materials</u>	
Bareš, R.A.: Classification of composite materials and plastics composites	345
Chistyakov, A.M., Nepesov, M.A.: Structure of cellular polymers	359
Kabelka, J.: Thermo-elastic characteristics of composite material with textile reinforcement	365
Kestelman, V.N.: Modification of polymeric materials	369
Lašková, E., Novák, J., Weiss, V.: Crack propagation in reinforced plastic strips under tension	375
Raab, M., Vojta, V.: Theoretical models of experimental scatter of mechanical strength of polymeric materials	381
Sukhareva, L.A., Taraskina, N.G., Zubov, P.Z., Paturoev, V.V.: Physico-mechanical ways of reducing internal stresses in concretes with thixotropic binders	385
Banichuk, N.V.: Optimization of internal structure of reinforced plastics	631
Bouška, P., Zilvar, V.: Epoxy resin fatigue at higher temperatures	635
Ganev, P.L.: Deformation hysteresis of polymer materials	859
<u>Subtopic E : Varia</u>	
Vancrombrugge, R.: Brittle fracture propagation in plastics pipes	389
Akhverdov, I.N., Lavrega, L.J., Borislavskaya, I.V.: Aerosil modification of physical and mechanical properties of polymeric compounds	403
Heymann, J., Meyer, R.: The application of a phase grating moiré technique for the study of material contents	407

Lavrega, L.Y.: Polymer cement concrete	411
Paillere, A.M., Serrano, J.J.: Special binder for grouting ducts in prestressed concrete structures	415
Paturoev, V.V., Volgushev, A.N., Matkov, N.G.: The use of polymer solutions in the column joints of frames of multistory buildings	419
Prost, J., Benneton, J.P., Paillere, A.M.: Study of the tensile characteristics of polymers in thin films	423
Teodorescu, D., Popescu, A., Ionescu-Homoriceanu, S., Beschea, T.: Behaviour of anticorrosive protective systems /acetal based resins/ against natural aggressivities	427
Tutova, O.N., Znakomskaya, V.M.: The study of effectiveness with applying polymer admixtures in concretes	435
Barth, J.: Extrusion, calibration and cooling of PVC profiles	639
Osipchuk, L.N.: Flexible PVC pipes of new design in deep horizontal drainage	853 /645/
<u>Communications and Discussions</u>	827
<u>Summary of the Work of Section 2</u>	865

T O P I C 3

PLASTICS AND THE SAVING OF ENERGY

Introductory Lecture

Schaefer, H.: Plastics and the saving of energy	447
---	-----

Subtopic A: Plastics and Energy

Dleseck, V.: Plastic materials and energy consumption	455
Kloecker, W.: Light-weight concrete based on cellular unsaturated polyester - ten years experience	465
Koski, L., Pajakala, P.: Energy content of plastic foams and their use in sandwich structures	477
Nikitina, L.M., Popov, G.G., Timoshenko, A.T., Tolstiaikov, D.N.: Combining heat insulators as an effective way for decreasing the heat diffusivity of high fencing structures	483
Patfoort, G.A.: Low energy housing with composites	489
Simeonov, I.T.: Possibilities for expedient application of plastics in structural engineering and industry	495
Schaefer, H.: The influence of window design in saving energy especially considering rigid PVC windows	503
Řehánek, J., Janouš, A., Šála, J.: Influence of foamed polystyrene in external walls on energy requirements for the heating of buildings	647

Subtopic B : Reconstructions

Van Gemert, D.A.: Repairing of concrete structures by externally bonded steel plates	519
Mouton, Y., Durrieu, F., Prin, D.: Efficiency of cracked concrete repair by epoxy binder injection	527

Subtopic C : Fire Behaviour

Hourlay, P.: Effects of a fire paint on the behaviour of conglomerated panels on fire	533
Kupilik, V.: Products of heat decomposition of plastics during their burning	

<u>Communications and Discussions</u>	871
---------------------------------------	-----

<u>Summary of the Work of Section 3</u>	891
---	-----

COMMERCIAL REPORTS

Mohler, M.V.: Plastic windows /REHAU/	901
Scheibel, H.: Plastic windows - a modern components for contemporary facades /VEKAPLAST/	907
RECEPTION - Memorial Plaques Ceremony	913
CLOSING SESSION	919
EPILOQUE	927
List of Participants	929
List of Exhibitors /Plastics in Building 81/	946
List of Books Exhibitors	947
Name Index	949
Subject Index	951
