

# Contents

## 1. Myxobacteria: A Most Peculiar Group of Social Prokaryotes

*Hans Reichenbach*

Gliding Motility . . . . .	1
Morphogenesis . . . . .	4
Intercellular Communication . . . . .	36
Ecology . . . . .	45
Physiology, Isolation, and Cultivation . . . . .	47
Phylogeny and Taxonomy . . . . .	48

## 2. Structure and Function of Myxobacteria Cells and Fruiting Bodies

*David White*

Structure of Vegetative Cells and Myxospores . . . . .	52
Structure of Fruiting Bodies . . . . .	64
Conclusions . . . . .	66

## 3. Genome of *Myxococcus xanthus*

*Thomas Yee and Masayori Inouye*

Coordination of DNA Replication with Cell Division . . . . .	69
Base Composition . . . . .	75
Genome Size . . . . .	78
DNA Methylation . . . . .	83
Phase Variation and DNA Rearrangement . . . . .	84
Small Homogeneous DNA Fragment in Total Chromosomal DNA Preparations . . . . .	87
Conclusion . . . . .	89
Note Added in Pages . . . . .	90

<b>4. Nutrition, Metabolism, and the Initiation of Development</b>	
<i>Lawrence J. Shimkets</i>	
Nutrition .....	92
Intermediary Metabolism .....	93
Regulation of Nutritional Downshift in Other Bacteria .....	99
Nutritional Control of Fruiting Body Formation .....	101
Intercellular Communication in Other Bacteria .....	103
Intercellular Signals Initiating Development of Myxobacteria .....	104
Conclusion .....	106
<b>5. Antibiotics and Lytic Enzymes</b>	
<i>Eugene Rosenberg and Mazal Varon</i>	
Lytic Phenomena .....	109
Lytic Agents Produced by Myxobacteria .....	113
Role of Lytic Enzymes and Antibiotics in Nutrition .....	123
Development: Role of Lytic Enzymes and Antibiotics .....	124
<b>6. Pigments of Myxobacteria</b>	
<i>Hans Reichenbach and Hans Kleinig</i>	
Chemical Structures and Biosynthesis .....	128
Physiology .....	135
<b>7. Gliding Motility and Taxes</b>	
<i>Robert P. Burchard</i>	
Description of Movements .....	139
Biological, Physical and Chemical Conditions that Affect Gliding .....	144
Gliding Motility Mutants .....	146
Mechanistic Theories of Myxobacterial Gliding .....	147
Tactic Responses .....	155
Conclusion .....	160
Acknowledgments .....	161
<b>8. Genetics of Myxobacteria</b>	
<i>Dale Kaiser</i>	
Transducing Phages and Transduction .....	166
Transposon Tn5 in <i>Myxococcus xanthus</i> .....	168
Gene Mapping by Cotransduction .....	172
Tandem Duplications .....	174
Cloning Myxobacterial Genes .....	176
Extracellular Complementation .....	179
Summary .....	183
Acknowledgment .....	184

**9. Developmental Program of *Myxococcus xanthus****David R. Zusman*

Development in <i>Myxococcus xanthus</i> .....	185
Biochemical Markers of Development .....	191
Analysis of the Developmental Program with Mutants .....	202
Outlines of a Developmental Program .....	211
Acknowledgments .....	213

**10. Social Adaptations in Myxobacteria***Amotz Zahavi and Dina Ralt*

Group Selection and Individual Selection .....	216
Social Behavior During Growth .....	217
Social Behavior During Development .....	218
Conclusion .....	220

**11. Research on the Myxobacteria: Past, Present, Future***Martin Dworkin*

The Distant Past .....	222
The Recent Past .....	223
The Present .....	229
The Future of Myxobacterial Research .....	238
Conclusion .....	244
Acknowledgments .....	245

**Appendix A. Selected Reviews on Myxobacteria .....** 247**Appendix B. Media Useful for the Cultivation of  
*Myxococcus xanthus* .....** 249**Appendix C. Techniques for Inducing Myxospores and  
Fruiting Bodies in *Myxococcus xanthus* .....** 251**Appendix D. Techniques for Culturing *Stigmatella* .....** 253**Appendix E. Gene and Protein Structure of Protein S .....** 257  
*Sumiko Inouye***References .....** 263**Index .....** 295
