

Contents

Introduction	1
References	3
1 Basic Methods and Aspects in Immunological Reagent Preparation	5
1.1 Evaluation of Antigens and Antibodies	5
1.1.1 Gel electrophoresis	6
1.1.2 Immunelectrophoretic analysis and double diffusion in gels	9
1.1.3 Radial immunodiffusion	11
1.1.4 Electroimmunodiffusion	12
1.2 Purification of Antigens	13
1.2.1 Ion exchange chromatography	17
1.2.2 Gel filtration technique	19
1.2.3 Chromatofocusing	23
1.2.4 Preparative polyacrylamide gel electrophoresis	26
1.2.5 Affinity chromatography	28
1.3 Preparation of Immune Sera and Antibodies	31
1.3.1 Lymphoid cells and antibody production	31
1.3.2 Hyperimmunization of animals: polyclonal and monoclonal antibodies	32
1.3.3 Isolation of antibodies by affinity chromatography	36
References	38
2 Preparation of Immunohistological Reagents	43
2.1 Marker Molecules in Light and Electron Microscopy	43
2.2 Coupling Reagents and Conjugation Procedures	46
2.2.1 "One-stage" and "two-stage" reactions	47
2.2.2 Antibody-enzyme conjugation by use of glutaraldehyde	48
2.3 Purification and Characterization of Enzyme Conjugates	50
2.3.1 Purification by gel filtration	50
2.3.2 Gel filtration and lectin binding technique	50
2.3.3 Qualitative and quantitative characterization of conjugates	51

2.4	Production of Soluble Peroxidase-Antiperoxidase Complexes	55
	References	57
3	Histological Immuno Enzyme Techniques	61
3.1	Direct and Indirect Immunocalizations	61
3.2	Enzyme Cytochemistry Procedures	63
3.3	Control of Specificity	66
3.4	Microscopy, Counterstaining and Microphotography	67
	References	69
4	General Preparation of Biological Specimens	71
4.1	Tissue Fixation	72
4.2	Tissue Dehydration	75
4.3	Tissue Embedment	76
4.4	Antigen Protective Measures	79
	References	83
5	Immunoperoxidase Histology in the Light Microscope	85
5.1	General Methods of Antigen Detection in Paraffin Sections	85
5.2	Immunoperoxidase Localization of Cell-associated Marker Molecules (Mucus Neutral Glycoproteins) in Gastrointestinal Mucosa	87
5.3	Antigen Detection in Semithin Resin Sections	96
5.4	Immunocalization of Antigens in Monolayer Cultures	101
	References	103
6	Immunohistological Assays for Electron Microscopy	107
6.1	Immuno-staining in Preembedment Period	108
6.2	Immuno-staining in Postembedment Period	116
6.3	Immuno-staining in Cryo-ultramicrotomy	121
6.4	Miscellaneous Techniques	125
	References	125
7	Immunohistological Specificity	131
7.1	False Positive Staining	131
7.2	False Negative Staining	135
	References	136
8	Practical Aspects	137
8.1	Polyacrylamide Gel Electrophoresis	137
8.2	Immunological Gel Diffusion	139
8.3	Immunological Precipitation of Antigen and Antibody	141
8.4	Chromatography and Gel Filtration	142
8.5	Spectrophotometrical Methods	143

8.6	Histological Preparations	146
	References	154
