

# CONTENTS

## Chapter 1 – Flexible assembly systems

<b>The use of modular flexible assembly systems as a half-way path between special design and robots ....</b>	<b>3</b>
F. J. Riley, The Bodine Corporation, USA	
<b>Meeting a variety of future needs with flexible assembly .....</b>	<b>11</b>
M. Schröder, Robert Bosch GmbH, West Germany	
<b>Conception and realisation of flexible assembly systems .....</b>	<b>21</b>
R. Goebel, Burkhardt and Weber GmbH, West Germany	
<b>Design of a flexible assembly system for a small company .....</b>	<b>37</b>
S. J. Mallin, Orbit Controls Ltd, UK and P. J. Sackett, University of Bath, UK	
<b>Flexible assembly system for unmanned factory .....</b>	<b>45</b>
H-J. Warnecke, R. D. Schraft, E. Abele and J. Spingler, Fraunhofer Institut für Produktionstechnik und Automatisierung (IPA), West Germany	

## Chapter 2 – Assembly applications

<b>The development of an automatic assembly line for VTR mechanisms .....</b>	<b>53</b>
T. Ohashi, S. Miyakawa, Y. Arai, S. Inoshita and A. Yamada, Hitachi Ltd, Japan	
<b>Motor fan flexible automatic manufacturing system .....</b>	<b>63</b>
I. Del Gaudio and S. Del Sarto, Olivetti Controllo Numerico – Divisione Robotica, Italy	

<b>Automated assembly in the electrical industry</b> .....	75
B. Lotter, EGO Elektrogerätebau GmbH, West Germany	
<b>Versatile assembly by dedicated programmability</b> ....	93
W. B. Heginbotham, D. Gatehouse, D. Law and G. Wakefield, PERA, UK	

## **Chapter 3 – Design for assembly**

<b>Design of data processing equipment for automated assembly</b> .....	105
F. L. Bracken and G. E. Insofia, IBM Corporation, USA	
<b>Product design for automatic assembly</b> .....	127
T. Lund and S. Kähler, Danish Technology Ltd, Denmark	
<b>Assembly oriented design</b> .....	143
W. Eversheim and W. Müller, Technical University Aachen, West Germany	
<b>Design for automation: The competitive edge</b> .....	155
J. A. Behuniak, Digital Equipment Corporation, USA	

## **Chapter 4 – Sensors in assembly**

<b>Adaptive robot and sensory system for the attachment of electrical connectors to solar arrays</b> .....	161
T. Brooks and R. Cunningham, Jet Propulsion Laboratory, USA	
<b>A research programme in sensor guided assembly</b> ...	183
A. Pugh, P. M. Taylor, J. J. Hill, G. E. Taylor, D. G. Whitehead, A. M. Ali, I. Mitchell, D. C. Burgess, K. K. W. Selke, D. R. Kemp and C. Stubbings, University of Hull, UK	
<b>A modular programmable assembly station</b> .....	197
R. C. Smith and D. Nitzan, SRI International, USA	
<b>Precise assembly by low precision machines</b> .....	217
A. Romiti, G. Belforte and N. D'Alfio, Politecnico di Torino, Italy	

## **Chapter 5 – Parts handling and feeding**

<b>Computer-controlled magazinging system</b> .....	233
M. Schweizer and I. Schmidt, Fraunhofer Institut für Produktionstechnik und Automatisierung (IPA), West Germany	
<b>Programmable feeder for non-rotational parts</b> .....	247
D. Pherson, G. Boothroyd and P. Dewhurst, University of Massachusetts, USA	

<b>A computer controlled reconfigurable gripper</b> .....	257
A. Butcher and P. Fehrenbach, GEC Research Laboratories/ Marconi Research Centre, UK	
<b>The flexible parts feeder which helps a robot assemble automatically</b> .....	267
T. Suzuki and M. Kohno, Hitachi Ltd, Japan	
<b>Development of a flexible parts feeding system</b> ....	281
S. Hara, K. Azuma and K. Hironaka, Mitsubishi Electric Corporation, Japan	

## **Chapter 6 – Economics**

<b>Equipment justification for an assembly system</b> .....	291
C-S. Ho, Unimation Inc, USA	
<b>Automatic or manual assembly? Boundaries of economy at middle or low batch production</b> .....	305
D. Elbracht and H. Schacher, University of Duisburg, West Germany	
<b>Automated assembly can equate with short payback periods</b> .....	315
A. E. Owen, Tony Owen MBA Ltd, UK	

## **Chapter 7 – Social aspects**

<b>People performance in automated assembling</b> .....	327
J. Wood, Rank Xerox Ltd, UK	
<b>Perspectives and social implications of assembly automation in West Germany</b> .....	333
D. Seitz and V. Volkholz, Gesellschaft für Arbeitsschutz und Humanisierungsforschung (GfAH), West Germany	
<b>Changes in assembly work environments</b> .....	343
R. G. Davison, University of Salford, UK
