

# Contents

## Chairman: M. Píchal

M. Píchal	Optical methods in fluid and solid dynamics research .....	1
A. Leipertz J. Haumann G. Wu	Space resolved probing of gas concentration and temperature structures .....	5
Y. M. Chen F. Mayinger	Holographic interferometry studies of the temperature field near a condensing bubble .....	13
A. Leipertz	Laser raman techniques for gas phase fluid dynamics and combustion research .....	21
J. J. Timkó	Applied holography for drop formation of non-newtonian fluids in centrifugal atomizers .....	29

## Chairman: A. Lagarde

K. Antropius A. Paslerová	Holographic mode shape investigation of aircraft engine impellers .....	35
M. Pavelek M. Liška	A study of heat transfer from a horizontal vibrating cylinder by means of holographic interferometry..	43
Yu. P. Lagutov L. G. Gvozdeva A. I. Kharitonov T. V. Bazhenova	Study of diffraction of shock waves at rounded corners by means of schlieren and interferometric methods .....	51
V. P. Fokees L. G. Gvozdeva A. A. Kalachev A. I. Kharitonov V. S. Sukhorukikh	Study of shock wave reflection in rectangular channels by means of Cranz-Schardin system in parallel beams .....	59
J. Gardavský V. Daněk J. Máša J. Plašek	Experience with laboratory LDA by measuring flow fields in rotating turbomachinery .....	65

## Chairman: F. Durst

P. Moraes	Application of laser-dual-focus velocimetry in a counterflow .....	75
C. E. Costic D. P. Telionis	Laser-doppler velocimetry and flow visualization of 3-D flows.....	83
O. V. Achasov N. A. Fomin S. A. Labuda D. S. Ragozin R. I. Soloukhin	Laser diagnostics of molecular states in non-equilibrium gas flows .....	95
M. Elena J. Gaviglio	Experimental study of a turbulent boundary layer-shock wave interaction, using a monodimensional laser velocimeter .....	103
M. Hrabovský	Solution of diffuser inlet velocity field of radial impeller centrifugal turbine pumps by means of the LDA method .....	113

## Chairman: A. A. L. Matiukas

T. Inoue S. Kotake	Measurement of unstationary size-distribution of submicron droplets in rarefaction-wave condensation by laser scattering .....	121
A. S. Besov E. I. Bichenkov V. K. Kedrinskii Ye. I. Palchikov	Investigation of initial stage of cavitation by diffraction optic method .....	129
A. R. Bergart E. I. Bichenkov V. K. Kedrinskii F. I. Palchikov	Optic and x-ray investigation of water fracture in rarefaction wave at later stages .....	137
A. Henckels H. Grönig	Experimental studies of stress waves in elastic plates with curved boundary .....	143

## Chairman: W. Merzkirch

J.M. Hodgkinson J.G. Williams	Laser-doppler velocimetry applied to the impact testing of polymers .....	151
N.A. Fomin U. Wernekinck W. Merzkirch	Speckle photography of a turbu- lent density field .....	159
B. Střiž V. Humen R. Vrzala	Experimentally and theoretically generated isochromatic fringe loops of cracks propagating at a constant velocity .....	167
Hanna A. Hanna	Stresses and deformation pattern investigated by the Moire optical method in gears .....	175
J. Buchar V. Humen Z. Bilek	Photoelasticity studies of a new method of fracture toughness eva- luation of high loading rates .....	185

## Chairman: J. Träger

J. Beneš H. Šebková	A new approach to evaluation of measurement in dynamic photo- elasticity .....	191
M. Cottron J.R. Blais A. Lagarde	Optimization of a stiffener to stop a propagating crack .....	201
K. Takayama O. Onodera	Holographic interferometric study on propagation and focusing of underwater shock waves by micro- explosions .....	209

## Chairman: D.P. Telionis

R. Ermshaus C. Knisely E. Naudascher	Flow visualization in the wake of three-dimensional bodies under- going self-sustained oscillations...	217
P.A. Thompson Y.G. Kim G.E.A. Meier	Flow visualization of a shock wave by simple refraction of a back- ground grid .....	225

J. Ježek	Flow visualization in steel casting .....	233
J. Swirydczuk	Behaviour of the vortex layer generated in the flow by an impulse change of circulation around a profile .....	241
T. Drozd	Flow visualization of turbulent boundary layer on flat and cylindrical heated walls .....	249
L. I. Kiss R. Postásy	Investigation of transient phenomena in heat transfer .....	257
Chairman: T. V. Bazhenova		
M. Štastný K. Pekárek	Flow visualization in a steam turbine profile cascade using a colour schlieren method .....	267
J. D. Chashechkin	Colour schlieren method .....	275
B. Košťák J. Kozák	Photoelastic analysis of a seismoactive crack .....	283
Chairman: H. Zeller		
P. Macura	Study of flow of metal and stress conditions at rolling by means of optical methods .....	293
P. Šafařík V. Vlček	Using interferometric measurements in calculation of aerodynamic forces .....	301
G. Frankowski D. Vogel P. Will	Holographic interferometer to investigate deformations of mechanical and thermal stressed motorcar-cylinders .....	307
H. Schwieger	A new application of differential interferometry for dynamic stress analysis .....	315

J.Blaha	Laser beam monitoring of shock waves .....	323
Chairman: S.Kotake		
C.K.Zoltani K.J.White	Tomography of transient events .....	333
J.Balaš M.Držík	Application of new photo-electric method to the measurement of dynamic stress intensity factor .....	341
Chairman: J.Balaš		
A.V.Eremin V.S.Ziborov I.M.Naboko	Experimental study of optical features of shock-heated jets .....	349
V.V.Golub I.M.Naboko A.M.Shulmeister	An investigation of impulse jet outflowing from multi-nozzle blocks by means of the schlieren installation .....	357
H.Zeller M.-zh Tang	Karman vortex street in the supersonic wake a rough flat plate .....	365
V.Delitzsch H.Eckelmann W.Wuest	Migration of droplets under reduced gravity .....	373
V.Gabrenis A.A.L.Matiukas V.Makarevicius A.Stravinskas	The methods for diagnosing velocity and temperature in the high-temperature gas flow .....	379
