

## CONTENTS

### Structure and Molecular Organization

#### Molecular organization of the estrogen receptor system

AKIRA MURAYAMA . . . . . 1

#### Structure, properties and subcellular localization of the chick oviduct progesterone receptor

JAN MESTER, JEAN-MARIE GASC, THIERRY BUCHOU, JACK-MICHEL RENOIR, IRENE JOAB, CHRISTINE RADANYI, NADINE BINART, MARIA-GRAZIA CATELLI and ETIENNE-EMILE BAULIEU . . . . . 31

#### Studies of the subunit composition of the 8.5S rabbit uterine progesterin receptor

LEE E. FABER, PINE-K., K. TAI, YOSHIAKI MAEDA and JOHN E. MYERS . . . . . 61

#### Alterations in mouse glucocorticoid receptor structure: Effects of various hydrolytic enzymes

WAYNE V. VEDECKIS, BRANKA KOVACIC-MILIVOJEVIC, MARGOT C. LaPointe and CHERYL E. REKER . . . . . 85

#### Affinity labeling steroids as biologically active probes of glucocorticoid receptor structure and function

S. STONEY SIMONS, JR . . . . . 111

#### The physiological significance of the structure of glucocorticoid and progesterone receptors

CORIANNE M. SILVA and JOHN A. CIDLOWSKI . . . . . 141

### Activation/Transformation

#### An allosteric regulatory mechanism for estrogen receptor activation

ANGELO C. NOTIDES, SHLOMO SASSON and STEVE CALLISON . . . . . 173

#### Specific effects of monovalent cations and of adenine nucleotides on glucocorticoid receptor activation, as studied by aqueous two-phase partitioning

P.A. ANDREASEN and K. JUNKER . . . . . 199

<b>Low-molecular-weight and macromolecular translocation modulators affecting the binding of activated receptor-glucocorticoid complex to nuclei, chromatin and DNA</b> FUMIHIDE ISOHASHI and YUKIYA SAKAMOTO . . . . .	225
<b>The important role of cytoplasmic modulators in the pathway for steroid receptor to be converted to the biologically active form</b> BUNZO SATO, YASUKO NISHIZAWA, KEIZO NOMA, MAKATO NAKAO, SUSUMU KISHIMOTO and KEISHI MATSUMOTO . . . . .	249
<b>Phosphorylation</b>	
<b>Phosphorylation on tyrosine of the 17<math>\beta</math>-estradiol receptor</b> FERDINANDO AURICCHIO, ANTIMO MIGLIACCIO, ANDREA ROTONDI and GABRIELLA CASTORIA . . . . .	279
<b>Phosphorylation of progesterone receptor</b> JOHN J. DOUGHERTY . . . . .	299
<b>Purification, activation and phosphorylation of the glucocorticoid receptor</b> THOMAS J. SCHMIDT and GERALD LITWACK . . . . .	309
<b>Interaction of nucleotides with steroid hormone receptors</b> VIRINDER K. MOUDGIL . . . . .	351
<b>Regulation and Biological Responses</b>	
<b>Steroid hormone receptor dynamics: The key to tissue responsiveness</b> THOMAS G. MULDOON . . . . .	377
<b>An endogenous ligand for type II binding sites in normal and neoplastic tissues</b> BARRY M. MARKAVERICH and JAMES H. CLARK . . . . .	399
<b>Regulation of mammary responsiveness to estrogen: An analysis of differences between mammary gland and the uterus</b> GOPALAN SHYAMALA . . . . .	413
<b>Progesterone regulation of nuclear estrogen receptors: Evidence for a receptor regulatory factor</b> WENDELL W. LEAVITT . . . . .	437

Receptors and biological responses of estrogens, antiestrogens and progesterone in the fetal and newborn uterus  
 CHARLOTTE SUMIDA and JORGE RAUL PASQUALINI . . . . . 471

**Nuclear Components and Gene Expression**

Steroid receptor-DNA interactions  
 S. ANAND KUMAR and HERBERT W. DICKERMAN . . . . . 505

The rat pituitary estrogen receptor: Role of the nuclear receptor in the regulation of transcription of the prolactin gene and the nuclear localization of the unoccupied receptor  
 JAMES D. SHULL, WADE V. WELSHONS, MARA E. LIEBERMAN and JACK GORSKI . . . . . 539

Characterization of different forms of the androgen receptor and their interaction with constituents of cell nuclei  
 EPPO MULDER and ALBERT O. BRINKMAN . . . . . 563

Differential sensitivity of specific genes in mouse kidney to androgens and antiandrogens  
 JAMES F. CATTERALL, CHERYL S. WATSON, KIMMO K. KONTULA, OLLI A. JANNE and C. WAYNE BARDIN . . . . . 587

**Pharmacology and Clinical Correlations**

Molecular pharmacology of tamoxifen; an antiestrogen with antitumor properties in animals and man  
 V. CRAIG JORDAN . . . . . 603

Studies on glucocorticoid receptors in normal and neoplastic rodent and human leukocytes: Structure, degradation, kinetics of formation and activation  
 NIKKI J. HOLBROOK, JACK E. BODWELL, DIRK B. MENDEL and ALLAN MUNCK . . . . . 637

Progestin treatment, progesterone receptors, and breast cancer  
 KATHRYN B. HORWITZ, SCOT M. SEDLACEK, CAROYLN D'ARVILLE and LISA L. WEI . . . . . 659

## Neurotransmission

## Steroid hormones, receptors and neurotransmitters

GARY DOHANICH, BRUCE NOCK and BRUCE S. McEWEN . . . . . 701

## New Systems, Techniques

The steroid receptor of *Achlya ambisexualis*

ROBERT M. RIEHL and DAVID O. TOFT . . . . . 733

The receptor for 2,3,7,8-tetrachlorodibenzo-p-dioxin: Similarities  
and dissimilarities with steroid hormone receptors

LORENZ POELLINGER, JOHAN LUND, MIKAEL GILLNER  
and JAN-AKE GUSTAFSSON . . . . . 755

Separation and characterization of isoforms of steroid hormone  
receptors using high performance liquid chromatography

JAMES L. WITTLIFF . . . . . 791

Author Index . . . . . 815

Subject Index . . . . . 817
