Preface	v
CHAPTER 1	
Introduction	1
1.1 Signal Processing in Unknown Environments	1
1.2 Two Examples	2
1.3 Outline of the Text	5
References	7
CHAPTER 2	
The Mean Square Error (MSE) Performance Criteria	8
2.1 Introduction	8
2.2 Mean Square Error (MSE) and MSE Surface	9
2.3 Properties of the MSE Surface	16
2.4 The Normal Equations	22
2.5 Further Geometrical Properties of the Error Surfaces	24
Problems	30
References	32
CHAPTER 3	
Linear Prediction and the Lattice Structure	34
3.1 Introduction	34
3.2 Durbin's Algorithm	35
3.3 Lattice Derivation	40
Problems	44
References	45

CHAPTER 4	
The Method of Steepest Descent	46
4.1 Introduction	46
4.2 Iterative Solution of the Normal Equations	47
4.3 Weight Vector Solutions	52
4.4 Convergence Properties of Steepest Descent	59
4.5 Mean Square Error Propagation	62
Problems	65
References	66
CHAPTER 5	
The Least Mean Squares (LMS) Algorithm	68
5.1 Introduction	68
5.2 Effects of Unknown Signal Statistics	70
5.3 Derivation of the LMS Algorithm	73
5.4 Convergence of the LMS Algorithm	74
5.5 LMS Mean Square Error Propagation	79
Problems	83
References	85
CHAPTER 6	
Applications of the LMS Algorithm	87
6.1 Introduction	87
6.2 Echo Cancellation	88
6.3 Adaptive Waveform Coding	90
6.4 Adaptive Spectrum Analysis	93
References	98
CHAPTER 7	
Gradient Adaptive Lattice Methods	99
7.1 Introduction	99
7.2 Lattice Reflection Coefficient Computation	100
7.3 Adaptive Lattice Derivations	104
7.4 Performance Example	107
Problems	108
References	109
CHAPTER 8	
Recursive Least Squares Signal Processing	111
8.1 Introduction	111
8.2 The Recursive Least Squares Filter	113
8.3 Computational Complexity	119
Problems	121
References	121

CHAPTER 9	
Vector Spaces for RLS Filters	123
9.1 Introduction	123
9.2 Linear Vector Spaces	124
9.3 The Least Squares Filter and Projection Matrices	127
9.4 Least Squares Update Relations	133
9.5 Projection Matrix Time Update	135
Problems	139
References	140
CHAPTER 10	
The Least Squares Lattice Algorithm	142
10.1 Introduction	142
10.2 Forward and Backward Prediction Filters	143
10.3 The LS Lattice Structure	146
10.4 Lattice Order and Time Updates	148
10.5 Examples of LS Lattice Performance	150
Problems	152
References	152
CHAPTER 11	
Fast Transversal Filters	154
11.1 Introduction	154
11.2 Additional Vector Space Relations	155
11.3 The Transversal Filter Operator Update	161
11.4 The FTF Time Updates	163
11.5 Further Computational Reductions	172
Problems	174
References	176
Index	177
