

Table of Contents

Introduction	9
Chapter 1 Understanding toxin action: <i>Clostridium botulinum</i> neurotoxins, their structures and modes of action	11
C. C. Shone	
1.1 Introduction	11
1.2 Human botulism	12
1.3 <i>Clostridium botulinum</i> culture types	12
1.4 Structures	13
1.5 Modes of action	24
1.6 Concluding remarks	41
Acknowledgement	42
References	43
Chapter 2 Assessing toxin intake: estimating the consumer's intake of metals	58
J. C. Sherlock	
2.1 Introduction	58
2.2 The basis of estimating intake	59
2.3 The analyst and intake studies	59
2.4 Food consumption	60
2.5 Food consumption by the general population	61
2.6 Intake	65
2.7 Other methods of estimating intake	70
2.8 The bioavailability to man of metals in food	71
References	74

Chapter 3 Identifying toxins and their effects: glucosinolates	76
R. K. Heaney and G. R. Fenwick	
3.1 Introduction	76
3.2 Chemical nature and occurrence	77
3.3 Biosynthesis and catabolism	81
3.4 The glucosinolate contents of plant-derived foods and feedingstuffs	84
3.5 Factors affecting glucosinolate content	87
3.6 Analysis	87
3.7 Glucosinolates and flavour	89
3.8 Glucosinolate toxicity	90
3.9 Overview	99
Acknowledgement	99
References	100
Chapter 4 Effects on nutritional balance: antinutrients	110
A. E. Bender	
4.1 Introduction	110
4.2 Protease inhibitors	112
4.3 Amylase inhibitors	115
4.4 Tannins (polyphenols)	115
4.5 Antivitamins	116
4.6 Goitrogens	118
4.7 Phytate	119
4.8 Oxalate	120
4.9 Availability of iron	121
4.10 Pellagra	122
References	123
Chapter 5 Influences of metabolism: aflatoxin metabolism and its possible relationships with disease	125
G. E. Neal	
5.1 Introduction	125
5.2 Human diseases in which exposure to aflatoxins has been implicated	127
5.3 Metabolic pathways for aflatoxins present in animal species	131
5.4 Human studies	144
5.5 Conclusions	155
References	156

Chapter 6 New quality control methods: detecting bacterial toxins in food	169
H. S. Tranter, N. K. Modi and P. Hambleton	
6.1 Introduction	169
6.2 Food safety	170
6.3 Food poisoning	175
6.4 <i>Staphylococcus aureus</i>	177
6.5 <i>Clostridium botulinum</i>	189
6.6 <i>Bacillus cereus</i>	194
6.7 Other bacterial toxins	196
6.8 Recent developments in the detection of bacterial toxins	198
References	203
Chapter 7 Tolerances: glycoalkaloids in potatoes	221
M. R. A. Morgan and D. T. Coxon	
7.1 Potato glycoalkaloids	221
7.2 Toxicology	222
7.3 Flavour properties	223
7.4 Tolerance for TGA levels in potatoes destined for consumption	223
7.5 Analysis of potato glycoalkaloids	224
7.6 Immunoassay studies of glycoalkaloids in man	225
7.7 Toxicity of potato glycoalkaloids: current position	226
References	227
Chapter 8 Prevention: effects of biocides and other agents on mycotoxin production	231
M. O. Moss and M. Frank	
8.1 The use of biocides in agriculture and food	231
8.2 The nature of mycotoxins	233
8.3 Factors influencing mycotoxin production	235
8.4 Future prospects for the control of mycotoxin production	244
References	247
