

# Table of Contents

Problems with raster graphics algorithms Wm. Randolph Franklin	1
Display algorithms for quadtrees and octrees and their hardware realisation Martin A. Oliver	9
Intermediate data structures for display algorithms Marloes L.P. van Lierop	39
Data structures for ray tracing Frederik W. Jansen	57
An approach for a PHIGS machine Salim S. Abi-Ezzi and Michael A. Milicia	75
Using linear quadtrees to store vector data Hanan Samet, Clifford A. Shaffer, and Robert E. Webber	91
A model for raster graphics language primitives Wim J.M. Teunissen and Jan van den Bos	125
Pattern representation Paul J.W. ten Hagen and Toos Trienekens	143
A 3D animation system Pascal Leray	165
Applications of the method of invariants in computer graphics Kees van Overveld	173
Bibliography on quadtrees and related hierarchical data structures Hanan Samet	181
