

Contents

1. Management Considerations

- Coping with new technology: The need for training** 3
P.J. Senker (University of Sussex, UK)
- Employment skills for the robot age** 13
D.A. Bell (University of Hull, UK)
- The human side of robotics: How workers react to a robot** 19
L. Argote, P.S. Goodman and D. Schkade (Carnegie-Mellon University, USA)
- Preparing for new technology** 33
A.W. Mullin (Ford of Europe, UK)
- Man is not a robot** 43
K. Cure (Amalgamated Union of Engineering Workers, UK)

2. Training Programmes in Industry

- How to design and conduct an in-house robotics training programme** 51
V. Altamuro (GMI Engineering and Management Institute, USA)
- Training – The key to success in the use of robots** 61
D.M. Osborne (ASEA Inc., USA)
- Training strategies for robotic implementation** 69
P.J. Rosato (Unimation Inc., USA)
- Robotics training in the US automotive industry** 81
J.D. Lane (Robotic Integrated Systems Engineering, USA) and
R.S. Richards (Ford Motor Company, USA)

Training for new technology – Robots and control systems operation and maintenance	91
R. Basey (Ford Motor Company, UK)	
Computer-based education for skilled trades	103
C. Wintermeyer (General Motors of Canada)	
Retraining the designer	109
J.M. Watt (CADCentre Consultants, UK)	

3. College and University Programmes

Time for a renaissance in education	117
K. Rathmill (Renishaw Research, UK)	
An analysis of robotics automation education in the USA: Facilities in colleges and universities	129
L. Heath (Indiana State University, USA)	
Robotics technician training in two-year colleges	139
R.L. Hoekstra (Southern Ohio College, USA)	
Hands-on maintenance training utilising industrial robots	145
W.L. Meier (Waukesha County Technical Institute, USA)	
Robotic education for engineers in manufacturing	155
G.C. Hammond (GMI Engineering and Management Institute, USA)	
An approach to FMS teaching using an iconic model	165
A. Davies (UWIST, UK)	
Computer graphics simulation in robotic education	175
S.J. Derby (Rensselaer Polytechnic Institute, USA)	

4. National and International Strategies

Education efforts and implications facing the world's robotic industry	187
J.D. Lane (Robotic Integrated Systems Engineering, USA)	
G. Lundstrom (Ny Teknik, Sweden) and W.I. Warnat (US Department of Education, USA)	
Robotics education and training in Japan	197
S. Kigami (Kyoritsu Engineering Company Ltd, Japan)	

Application of computers to manufacturing engineering – A new SERC initiative	209
P.C.L. Smith (ACME Directorate, UK)	
A national model for training Robotics/Automated Systems Technicians	217
D. Hull and J. Lovett (Centre for Occupational Research and Development, USA)	
Employment projections/education implications for the robotics industry in the USA	225
W.I. Warnat (US Department of Education, USA)	
FMS education in developing countries	
I. Basic issues	235
II. Developments and coping with indigenous needs	251
G. Arndt (University of Auckland, New Zealand)	
5. Appendices	
The ABCs of educational robots	267
R. Schreiber (Robotics Today, USA)	
A. Educational robot manufacturers/suppliers in the USA and UK	273
B. Robotics/Automated Systems Technician job competencies	279
C. Robotics/Automated Systems specialty course outlines	287
D. Robotic education institutions	299
Authors' organisations and addresses	309
Source of material	313
