

Table of Contents

Foreword	9
H.DAVSON, Department of Physiology, King's College, London WC2R 2LS, UK	
Editors' Introduction	11
Acknowledgements	14
PART I — THE NORMAL BARRIER	
Chapter 1 The Blood—Brain Barrier; A modified Tight Epithelium	17
C. CRONE, Institute of Medical Physiology, University of Copenhagen, Denmark	
Chapter 2 The Development of the Blood—Cerebrospinal Fluid Barrier: The Relationship Between Structure and Function in the Rat Choroid Plexus	41
R. F. KEEP, R. D. CAWKWELL and HAZEL C. JONES, Department of Zoology, University of Hull, Hull, HU6 7RX, UK	
Chapter 3 Comparative Physiology of the Blood—Brain Barrier	52
N. JOAN ABBOTT, Department of Physiology, King's College, London WC2R 2LS, UK, M. BUNDGAARD, Institute of Medical Physiology, Panum Institute, Blegdamsvej 3c, DK2200 Copenhagen, N. Denmark and HELEN F. CSERR, Section of	

Physiology and Biophysics, Brown University, Providence, RI 02912, USA.

- Chapter 4 Transport of Glucose across the Blood—Brain Barrier in Relation to Brain Metabolism** 73
 JILL E. CREMER, Medical Research Council, Toxicology Unit, MRC Laboratories, Woodmansterne Road, Carshalton, UK, SM5, 7EF, UK
- Chapter 5 Movement of Vitamins across the Blood—Brain Barrier** 87
 O. E. PRATT and J. GREENWOOD, Department of Neuropathology, Institute of Psychiatry, De Crespigny Park, London SE5 8AF, UK
- Chapter 6 Neuropeptides and the Blood—Brain Barrier** 98
 D. J. BEGLEY, Department of Physiology, King's College, London WC2R 2LS, UK and B. V. ZLOKOVIC, Institute of Medical Physiology, Visegradska 26/11, 11,000 Beograd, Yugoslavia
- Chapter 7 Absorptive Transport of Prostaglandins and other Eicosanoids across the Blood—Brain Barrier System and its Physiological Significance** 109
 L. Z. BITO, Department of Ophthalmology Research Division, College of Physicians and Surgeons, Columbia University, 630 West 168th Street, New York, NY10032, USA
- PART II — PATHOLOGICAL CHANGES IN THE BARRIER**
- Chapter 8 Appraisal of the Role of Endothelial Cells and Glia in Barrier Breakdown** 124
 M. W. B. BRADBURY, Department of Physiology, King's College, London WC2R 2LS, UK
- Chapter 9 Evaluation of Blood—Cerebrospinal Fluid Barrier Dysfunctions in Neurological Diseases** 132
 H. REIBER, Neurochemistry Laboratory, University Hospital, Göttingen, West Germany
- Chapter 10 The Blood—Cerebrospinal Fluid Barrier in Chronic Relapsing Experimental Allergic Encephalomyelitis** 147
 A. J. SUCKLING and M. G. RUMSBY, Department of Biology, University of York, York YO1 5DD, UK and H. REIBER, Neurochemistry Laboratory, University Hospital, Göttingen, West Germany
- Chapter 11 The Blood—Central Nervous System Barrier in Acute Experimental Allergic Encephalomyelitis** 158
 D. K. C. LAM, Division of Biochemistry, UMDS, St. Thomas' Hospital Medical School, London SE1 7EH, UK

Chapter 12	The Effects of Methylmercury on Glucose Transport, Glucose Metabolism and Blood Flow in the Central Nervous System of the Rat.	165
	R. HARGREAVES, S. R. MOORHOUSE, S. D. GANGOLLI, and D. PELLING, Pharmacology Dept., BIBRA, Woodmansterne Road, Carshalton, Surrey SM5 4DS, UK	
Chapter 13	The Use of Positron Emission Tomography for Studying Blood—Brain Barrier Function in Human Subjects	177
	D. J. BROOKS, R. P. BEANEY, A. A. LAMMERTSMA, D. R. TURTON, P. HORLOCK, M. J. KENSSETT, S. K. LUTHRA and T. JONES, MRC Cyclotron Unit, Hammersmith Hospital, London W12 0HS, UK and J. MARSHALL and D. G. T. THOMAS, Institute of Neurology, Queen Square, London WC1N 3BG, UK	
Chapter 14	The Immunopathological Significance of Leucocyte—Endothelial Interactions.	188
	K. A. BROWN, and D. C. DUMONDE, Department of Immunology, St. Thomas' Hospital, London SE1 7EH, UK	
Index		204
