

Contents

Preface	7
1. Introduction	9
2. Material and Methods	12
3. Development of height of autopsied children	22
4. Height of autopsied adults	25
5. Discussion	29
5.1 Development of height	29
5.2 Decrease of height with age	30
5.3 Secular acceleration	30
6. Body weight of autopsied children	32
7. Body weight of autopsied adults	36
7.1 Secular acceleration of body weight	40
7.2 Body weight and height	41
8. Discussion	44
9. Brain weight in autopsied children	45
10. Brain weight in autopsied adults	47
11. Discussion	53
12. Heart weight in autopsied children	55
13. Heart weight in autopsied adults	58
14. Discussion	64
15. Liver weight in autopsied children	67
16. Liver weight in autopsied adults	70
17. Discussion	75
18. Spleen weight in autopsied children	78
19. Spleen weight in autopsied adults	81
20. Discussion	86
21. Lung weight in autopsied children	87
22. Lung weight in autopsied adults	91
23. Discussion	97
24. Kidney weight in autopsied children	99
25. Kidney weight in autopsied adults	104
26. Discussion	114
27. Synopsis of organ weight/body weight in autopsied children	116
References	118
Index	125
