

Contents

Trends in electronic measurement and control	1
Prof. Dr. Joachim Hesse, Hanau	
Electronic process measurement	17
Georg H. Endress, Maulburg	
In-Process measuring techniques for automated production	37
Prof. Dr.-Ing. Tilo Pfeifer, Aachen	
Numerical control and feedback control systems	57
Prof. Dr.-Ing. Günter Pritschow, Stuttgart	
Electronic instrumentation and control systems in plants of the processing industries	77
Dr.-Ing. Hans-Werner van den Boom, Frankfurt am Main	
Signal processing in measurement – concepts and components	99
Prof. Dr.-Ing. Franz Mesch, Karlsruhe	
Automation for the process industry	113
Erwin Buxmeyer, Münster	
Communication systems in automatic control	137
Dr. Hartwig U. Steusloff, Karlsruhe	
Systems technology and process control	157
Prof. Dr. Martin Polke, Leverkusen	
Microcomputers and personal computers for measurement and control	179
Prof. Dr.-Ing. Georg Färber, München	
The use of microelectronics and in particular microprocessors in automative engineering	193
Dr.-Ing. Karsten Ehlers, Wolfsburg	
Curricula vitae	211
