

Contents

Chapter 1. Chemistry and Biochemistry of Calcium	
<i>W. G. Robertson</i>	1
Introduction	1
Evolutionary Aspects of Calcium	2
Chemical Properties	4
Extracellular Calcium	16
Intracellular Calcium	17
Calcium as a Second (or Third?) Messenger	20
Calcium Ionophores	21
Calcium Antagonists	22
Calcium in Other Living Organisms	22
Chapter 2. Calcium-Regulating Hormones: Vitamin D	
<i>D. R. Fraser</i>	27
Introduction	27
Structure and Synthesis	28
Vitamin D Formation in Skin	29
Metabolism of Vitamin D	31
Regulation of Vitamin D Metabolism	33
Vitamin D Function	34
Vitamin D Deficiency	36
Chapter 3. Calcium-Regulating Hormones: Parathyroid Hormone and Calcitonin	
<i>G. D. Aurbach</i>	43
Introduction	43
Parathyroid Hormone.....	43
Parathyroid Hormone and the Kidney	50
Actions of Parathyroid Hormone on Bone	52
Effects in Other Tissues	54
Mechanism of Action of Parathyroid Hormone.....	54
Calcitonin	59
Physiology of Calcitonin.....	63

Chapter 4. Calcium-Regulating Hormones: General	
<i>P. H. Adams</i>	69
Introduction	69
Adrenal Corticosteroids	69
Thyroid Hormone.....	74
Hormones of the Anterior Pituitary Gland	77
Insulin	81
Sex Steroids	82
Chapter 5. Gastrointestinal Absorption of Calcium	
<i>F. Bronner</i>	93
Introduction	93
Calcium Absorption	94
Active Calcium Transport.....	101
Development Aspects.....	108
Analysis of Whole Animal Absorption Studies	111
Altering Calcium Absorption	113
Therapeutic Considerations	118
Chapter 6. Renal Excretion of Calcium	
<i>M. Peacock</i>	125
Introduction	125
Calcium Excretion	125
Form and Measurement of Calcium in Urine.....	127
Expression of Urinary Calcium	129
Variation in Daily Calcium Excretion	133
Renal Excretion of Calcium	138
Regulation of Plasma Calcium by the Kidney	151
Hypercalciuria	154
Diseases Affecting Urinary Calcium.....	158
Chapter 7. Calcified Tissues: Chemistry and Biochemistry	
<i>A. L. Boskey</i>	171
Introduction: Composition of the Calcified Tissue	171
Comparative Histogenesis of the Calcified Tissues.....	173
Calcification Mechanisms	175
Remodelling.....	180
Conclusions.....	181
Chapter 8. Calcified Tissues: Cellular Dynamics	
<i>F. Melsen and L. Mosekilde</i>	187
Introduction	187
Primary Bone Formation	187
Postnatal Development of Bone	188
Internal Reorganization	188
Metabolic States Mainly Characterized by Altered Bone Turnover	199
Metabolic States Mainly Characterized by Disturbed Osteoid Mineralization	202
Metabolic States Mainly Characterized by a Reduction in Bone Mass	205

Chapter 9. Calcified Tissues: Structure-Function**Relationships**

<i>J. Dequeker</i>	209
Introduction	209
Macroanatomy.....	209
Age-Related Changes in Bone Mass.....	212
Age-Related Fracture and Osteoporosis	222
Bone Mass and Risk of Fractures.....	226
Identification of Those at Risk for Fractures.....	228
Treatment of Osteoporosis	230

Chapter 10. Calcium in Extracellular Fluid: Homeostasis

<i>G. Schaafsma</i>	241
Introduction	241
Plasma Calcium Homeostasis	242
Effects of Non-nutritional Factors on Plasma Calcium	
Homeostasis.....	249
Effects of Nutritional Factors on Plasma Calcium	
Homeostasis.....	252

Chapter 11. Calcium as an Intracellular Regulator

<i>A. K. Campbell</i>	261
Intracellular Calcium and Cell Behaviour	261
The Cell Biology of Intracellular Calcium.....	262
The Evidence for Calcium as an Intracellular Regulator.....	267
How to Measure Free Calcium in Living Cells	273
The Source of Intracellular Calcium for Cell Activation	291
How Calcium Acts	300
The Pathology of Intracellular Calcium	303
Pharmacology of Intracellular Ca^{2+}	307
Perspectives	308

Chapter 12. Cellular Calcium: Muscle

<i>S. Ebashi</i>	317
Historical Survey of Calcium Research in Muscle	317
Troponin	319
Myosin-Linked Regulation	323
Ca^{2+} Regulation in Smooth Muscle.....	325
Actomyosin in Non-muscle Tissue	327
Excitation-Contraction Coupling.....	328
Ca^{2+} Control of Metabolic Processes in Muscle	330
Calcium Antagonists	331

Chapter 13. Cellular Calcium: Nervous System

<i>M. P. Blaustein</i>	339
Introduction	339
Regulation of Intracellular Calcium in Nerve Cells	340
Physiological Role of Intracellular Calcium in Nerve Cells....	353
Summary and Conclusions	360

Chapter 14. Cellular Calcium: Secretion of Hormones	
<i>W. J. Malaisse</i>	367
Introduction.....	367
Evidence that Calcium Participates in Secretion.....	368
Calcium Fluxes in Endocrine Cells.....	371
Targets for Cytosolic Ca^{2+}	376
Concluding Remarks.....	380
Chapter 15. Cellular Calcium: Action of Hormones	
<i>R. H. Wasserman</i>	385
Introduction.....	385
Control of Intracellular Calcium.....	387
Modulation of Intracellular Free Ca^{2+} Concentrations.....	388
Calmodulin and Other Calcium-Binding Proteins.....	389
The Phosphoinositide Cycle.....	391
G Proteins Linking Receptors to Enzyme Activation.....	393
Phospholipase C Activation and Phosphoinositide Second Messengers.....	395
Hormone-Stimulated Ca^{2+} Fluxes.....	397
Diacylglycerol and Protein Kinase C.....	402
Physiological and Biochemical Responses to Ca^{2+} - Mobilizing Agonists in Selected Systems.....	404
Epilogue.....	414
Chapter 16. Cellular Calcium: Cell Growth and Differentiation	
<i>T. Fujita</i>	421
Introduction.....	421
Extracellular Calcium and Cellular Calcium Requirement....	421
Intracellular Calcium and Calcium Influx.....	423
Calmodulin and Other Calcium-Binding Proteins.....	424
Calcium and Cyclic Nucleotides.....	426
Phospholipid and Protein Phosphorylation.....	428
Calcium and Immune Function.....	429
Oncogenes and Growth Factors.....	430
Bone Cell Differentiation.....	432
Calcium-Regulating Hormones.....	433
Calcium Deficiency and Neoplasia.....	436
Summary.....	437
Chapter 17. Dietary Requirements for Calcium	
<i>B. E. C. Nordin and D. H. Marshall</i>	447
Introduction.....	447
Calcium Absorption.....	447
Calcium Excretion.....	450
Effects of Calcium Deficiency.....	452
Calcium Requirements and Recommended Allowances.....	458
Comparison with Current Intakes and Recommended Allowances Worldwide.....	464
Subject Index	473
