

CONTENTS

Computer Integrated Manufacturing

Quality management systems	
J. Porfert, ASK Computer Systems Inc., Los Altos, CA	1
Data capture for MRP-II systems	
D. Hurwitz, ASK Computer Systems Inc., Los Altos, CA	3
CIM – The importance of connecting both the physical environment and the knowledge worker ‘issues in computer integrated manufacturing’	
E. Roberts, ASK Computer Systems Inc., Los Altos, CA	7
Winning in the 80s – Beyond MRP-II	
D. Mangan, ASK Computer Systems Inc., Los Altos, CA	9
New technologies – The key to CIM integration	
J. K. Burns, J. Stuckey and G. Willis, Arthur Andersen & Co., Chicago, IL	11
Technology management and factory automation	
W. T. Muir, Price Waterhouse, Detroit, MI	19
Digital’s CIM architecture	
U. Flatau, Digital Equipment Corp., Marlboro, MA	29
Digital Equipment Corporation’s success road to CIM	
P. Byrd, Digital Equipment Corp., Marlboro, MA	77
The factories of the future	
T. H. Goodrich, Comserv Corp., St. Paul, MN	87
The system of the future for the factory of the future	
J. Musolf and T. Goodrich, Comserv Corp., Eagan, MN	91
Product design and development for manufacturing	
S. Polsgrove, IBM Corp., Lexington, KY	101
Cost management in the factory of the future	
A. Bonsack, Arthur D. Little Inc., Los Angeles, CA	111
Computer integrated flexible manufacturing – 1985	
H. J. May, The Ingersoll Milling Machine Co., Rockford, IL	119
Computer integrated manufacturing highways	
J. Wejman and B. C. Smith, Arthur Andersen & Co., Chicago, IL	139
Start by using an external perspective	
C. P. Kipp and W. F. Schilling, General Electric Co., Schenectady, NY	147

Computer Aided Design

Integrating CAD into the manufacturing process	
G. G. Adams, Autodesk Inc., Sausalito, CA	151
PC-CAD/CAM for tool designers	
T. Lazear, T&W Systems Inc., Huntingdon Beach, CA	157
Low cost CNC machining for integrated CAD/CAM applications	
S. Yen, DYNA Mechnronics, Santa Clara, CA	161
Linking CAD to MRP-II – A real step toward CIM	
J. T. Scheele, Comserv Corp., Eagan, MN	165
The emergence of raster based CAD technology	
C. Schroeder, Infodetics Corp., Anaheim, CA	175
Computer graphics as the foundation for CIM	
W. L. Howard, Coopers & Lybrand, Washington, DC	197

Computer Aided Manufacture

DNC for complex contouring (10,000 feet programs)	
S. J. Vitt, Ex-Cell-O Corp., Anaheim, CA	207
DNC for the small shop	
J. Payne, United Centrifugal Pump	211
Distributed numerical control – A practical building block approach	
P. J. Voice, Ex-Cell-O Corp., Anaheim, CA	217
The impact of tooling in flexible manufacturing systems	
V. P. Rovito and S. L. Hankins, Manufacturing Systems Div., Cincinnati Milacron	249
Planning models for designing FMS	
V. P. Rovito and R. E. Dvorsky, Manufacturing Systems Div., Cincinnati Milacron	273
Computer controlled cells or computer controlled shops	
J. Sim and D. Lindblom, WCI Controls & Data Systems Div., Rockford, IL	305
An approach to monitoring programmable controller controlled machines using microcomputers	
J. M. McLoughlin, Price Waterhouse, Detroit, MI	311
Applications in the material cutting industry	
R. Jordan, Ingersoll-Rand Waterjet Cutting Systems, Baxter Springs, KS	321
Waterjet and abrasivejet cutting applications with industrial robots	
E. A. Marx, Flow Systems, Kent, WA	331
Introduction to waterjet cutting technology	
R. B. Adams, Ingersoll-Rand Waterjet Cutting Systems, Baxter Springs, KS	345

Manufacturing Planning and Control Systems

Implementing just-in-time (JIT) – Opportunities, concerns and a strategy for success P. W. Blevins, Compufact, subsidiary of Computer Sciences Corp., Garden Grove, CA	355
The future role of manufacturing software: Decision support and communication R. Kneppelt, Management Science America Inc., Winston-Salem, NC	371
Bar codes role in MRP-II and just-in-time business systems R. G. Donoghue, Industrial Data Management Corp., Farmington Hills, MI	377
Buick City: A step forward in CIM A. Aiyer, P. Friedman, T. Milburn, O. Zyngier, Integrated Automation, Alameda, CA	383
Just-in-time and manufacturing control: The evolution of America's manufacturing industry J. G. Shobe, MDS Quantel Inc., Hayward, CA	427
A modular approach to FMS control systems D. D'Amore and G. Coleman, Industrial Automation Systems Div., Allen Bradley Co., Cleveland, OH	435
Cost management in a JIT/CIM environment J. K. Burns, D. A. Crow and S. M. Hronec, Arthur Andersen & Co., Chicago, IL	445
The role of manufacturing workstations in CIM W. T. Leavy, Hewlett-Packard Co., Palo Alto, CA	453
Deriving the need for CIM from the needs of the business K. C. Mead, Index Systems Inc., Cambridge, MA	459
The paperless factory C. Barr, ASK Computer Systems Inc., Los Altos, CA	473
Integrating suppliers into CIM strategies W. J. Ainsworth and J. C. Weinberg, Peat, Marwick, Mitchell & Co., Chicago, IL	477
The role of the 'MRP II' vendor in a world of 'CIM' T. M. Womerdorff, Cincom Systems Inc., Cincinnati, OH	485
Successful automatic identification systems development R. Bravman, Symbol Technologies Inc., Bohemia, NY	491
MRP-JIT-CIM: Choosing the 'right' strategy T. R. Schultz, The Forum Ltd., Milwaukee, WI	505
Artificial intelligence on factory floor: A success story R. L. Moore and R. Khanna, LISP Machine Inc., Andover, MA	509
Just-in-time manufacturing – A winning formula for success J. F. Proud, Xerox Computer Services, Los Angeles, CA	517
Computer integrated maintenance management system K. Bagadia, Unik Associates, Brookfield, WI	523
Integrating total quality control into the manufacturing process M. Lum, MDS Quantel Inc., Hayward, CA	529
Voice recognition in integrated manufacturing systems E. G. Marcato and J. R. Moser, Kurzweil Applied Intelligence Inc., Waltham, MA and J. C. Shepard, ASK Computer Systems Inc., Bedford, MA	533

Group Technology

Group technology, design retrieval, process planning and standardization C. Boyle, OIR/Organization for Industrial Research, Itasca, IL; J. Wolfberg, Digital Equipment Corp., Marlboro, MA; S. Bushong, OIR/Organization for Industrial Research, San Diego, CA and M. Medaglia, OIR/Organization for Industrial Research, Waltham, MA	545
--	-----

Robotics

Why robotics rather than hard automation K. R. Fisher, GMF Robotics, Spring Valley, OH	559
Managing a successful robot/CIM installation G. W. Potok, J. A. Pelusi and K. Shea, GMF Robotics Corp., Troy, MI	563
Robot vision systems M. Narayanan, Miami University, Oxford, OH	589
Robotic vision systems – Fundamentals of machine vision lighting A. Novini, Penn Video Inc., Akron, OH	591
Adaptive weld path control S. Melton, ASEA Robotics Inc., New Berlin, WI	603
Three-D robot vision for automotive glass insertion M. Russo and B. Thorvaldsson, ASEA Robotics Inc., New Berlin, WI	613
Applications in robotic welding H. Cary, D. Conklin and S. Barhorst, Hobart Brothers Co., Troy, OH	623
Maximizing productivity with programmable flexibility L. E. Shaum, SMI, Elkhart, IN	635

Automated Material Handling

Integration of MRP with the flexible manufacturing system	
R. A. Sampson, Burroughs Corp., Flemington, NJ	669
How automated storage and retrieval supports computer integrated manufacturing	
C. D. Wenzel, SPS Technologies, Hatfield, PA	683
Computer integrated flexible assembly systems	
R. L. Cooper and T. L. Tyler, Shuttleworth Inc., Huntingdon, IN	691
Movement of small loads in light manufacturing	
R. J. McLendon, TransLogic Corp., Denver, CO	705
Automated materials handling contemporary material handling concepts	
R. Holmberg, J. B. Webb & Co., Farmington Hills, MI	715

Computer Technology

Micro mainframe links - Micro-based MRP solution	
D. A. Meyer, Micro-MRP Inc.	719
A design and programming tool for workcell control	
M. Nissim, Hewlett-Packard, Cupertino, CA	727
Simulation in manufacturing	
R. J. Blightman, P-E Consulting Services Ltd., Egham, Surrey, England	733
Real-time data collection via mobile wireless computer terminals	
R. A. Scaringe, LXE/Div. of Electromagnetic Sciences Inc., Norcross, GA	745
Adaptive control and coordination in a distributed network environment	
M. Ohlson and K. Lemone, Worcester Polytechnic Institute, Worcester, MA	751
A perspective on the evolving role of artificial intelligence technology in manufacturing	
Yoh-Han Pao, Case Western Reserve University, Cleveland, OH	763
Managing multiple databases in CIM	
R. MacDow and A. Dirk, Prime Computer Inc., Natick, MA	767
Telecommunications as a competitive weapon in the manufacturing industry	
L. J. Bolick, Coopers & Lybrand, New York, NY	775
Integration: Making your factory a competitive weapon	
F. G. Loper, Honeywell Information Systems Inc., Phoenix, AZ	781
Factory automation integration	
R. C. Baron, Honeywell, Manufacturing Systems Div., Phoenix, AZ	791
Decision support from the MRP II database	
J. N. Petroff, Comserv Corp., Eagan, MN	797
MAP interoperability and conformance testing	
D. E. Morgan, Motorola New Enterprises, Schaumburg, IL	805
Opportunities for expert systems in a CIM environment	
L. Mannis and J. Morris, Management Science America Inc., Winston-Salem, NC	813
Real time control systems for multi-vendor manufacturing cells	
A. K. Agrawal and G. Watt, GCA Corp./Industrial Systems Group, Aurora, IL	829
