<b>Part I General Properties of the Brain</b>	<b>1</b>
<b>1. Introducing the Problem</b>	<b>3</b>
1.1 Standpoints	3
1.2 Procedures and General Plan	6
1.3 The Beyond-the-Physics Problem	9
<b>2. Structural and Functional Properties</b>	<b>12</b>
2.1 The Brain Mass	12
2.2 Structures and Functions	13
2.2.1 Speech Characterizes Humans	14
2.3 Connectivity and Integration	15
2.3.1 Feedback	19
2.4 The Neurochemical Aspects of Brain Organization	21
2.5 Nerve Impulses and Signals	23
2.6 What Shall We Substitute for Structure?	26
<b>3. The Key Property: Organization</b>	<b>28</b>
3.1 Brain Functions Are Unitary Processes	28
3.1.1 Unity of Psyche	32
3.2 A Whole Is More Than the Sum of Its Parts	34
3.3 Maturation and Learning	36
3.4 "Human Whole" and "Brute Whole"	40
<b>4. Short Review of Approaches and Methods</b>	<b>42</b>
4.1 The Standpoint "Structure = Function"	42
4.2 Electrophysiological Methods	44
4.2.1 Analytical Neurophysiology	44
4.2.2 Microelectrodes	47
4.3 System Analysis	48
4.4 Brain Waves	50
4.5 Methods of Quantification of Nervous Activity	53
4.5.1 Quantification of Nerve Impulses	53
4.5.2 Quantification of Continuous Time Functions	54
4.5.2.1 Frequency Domain Methods	54
4.5.2.2 Time Domain Methods	55

4.5.2.3	Cortical "Evoked Response" Potentials . . . . .	56
4.5.2.4	The Method of Correlation Between Brain Activities . . . . .	57
<b>5.</b>	<b>Multidimensionality, Homogeneity and Fields . . . . .</b>	<b>60</b>
5.1	Multidimensionality Versus Unidimensionality . . . . .	60
5.2	Can We Work with Simpler Systems? . . . . .	61
5.3	The Problem of Homogeneity . . . . .	63
5.4	The Hypothesis of the Continuum . . . . .	64
5.5	Unstructured Activity and the Noise Problem . . . . .	66
5.5.1	The Processing of the Activity by the Brain . . . . .	68
5.5.2	Physiological Aspects of Mass Activity . . . . .	69
 <b>Part II Physics and the Brain . . . . .</b>		 <b>73</b>
<b>6.</b>	<b>A First Approach: Statistics . . . . .</b>	<b>75</b>
6.1	Identification of a Framework of Laws . . . . .	75
6.1.1	Chance and Determination . . . . .	76
6.2	Statistics and Neuroscience . . . . .	78
6.2.1	Statistical Mechanics and the Brain . . . . .	80
6.2.2	Spontaneous and Ongoing Activity . . . . .	82
6.2.3	Gibbs Ensembles and Steady State Motion . . . . .	85
6.3	Thermodynamics and Brain Function: The Onsager Representation, . . . . .	86
6.3.1	The Problems of Entropy and Forces . . . . .	89
<b>7.</b>	<b>States of the Brain . . . . .</b>	<b>92</b>
7.1	States and Stationarity . . . . .	92
7.2	Identification of Brain States . . . . .	93
7.2.1	Discrete Physiological States . . . . .	95
7.2.2	Redefinition of the Concept of State . . . . .	97
7.3	Quantum State Principles and the Brain . . . . .	100
7.3.1	States and Vectors . . . . .	103
<b>8.</b>	<b>Dynamic Laws and Transformations of Brain States . . . . .</b>	<b>105</b>
8.1	Statistical Laws and Deterministic Laws . . . . .	105
8.2	Dynamic and Nervous Parameters . . . . .	106
8.2.1	Generalized Coordinates and Energy . . . . .	108
8.3	The Dynamic Forces in the Nervous System . . . . .	109
8.3.1	Nervous Generalized Coordinates . . . . .	112
8.4	States and Vector Relationships . . . . .	113
8.4.1	Transformations in the Mechanics of States . . . . .	115
8.4.2	Operators and Brain States . . . . .	117

<b>9.</b>	<b>Reference Systems for Brain Function . . . . .</b>	<b>120</b>
9.1	Problems of the Brain Space . . . . .	120
9.2	Properties of the Gaussian Coordinate System . . . . .	122
9.3	Invariant Functions in the Central Nervous System . . . . .	123
9.3.1	Which Functions Are Invariant? . . . . .	126
9.3.2	Time and Space Measurements . . . . .	127
9.4	Closing Comments . . . . .	130
<b>10.</b>	<b>The Continuum in the Central Nervous System . . . . .</b>	<b>132</b>
10.1	A Few Basic Ideas . . . . .	132
10.2	Factors Shaping the Fields of Force in the Nervous System . . . . .	133
10.3	A Fundamental Concept: The Tensor . . . . .	134
10.3.1	The Metric Tensor . . . . .	136
10.3.2	The Metric Tensor in the Central Nervous System . . . . .	137
10.4	Physiological Forces and Tensors in the Central Nervous System . . . . .	139
<b>11.</b>	<b>Outlines of a Theory . . . . .</b>	<b>142</b>
11.1	The Physiological Fundaments . . . . .	142
11.2	Steady States and Transformations . . . . .	144
11.3	Methods . . . . .	147
11.4	Perspectives . . . . .	149
11.5	Gathering the Threads . . . . .	150
<b>12.</b>	<b>On this Side of the Border: Relativistic Aspects . . . . .</b>	<b>153</b>
12.1	Is There a Brain Relativity? . . . . .	153
12.2	Time . . . . .	154
12.3	The Velocity " $c$ " in the Nervous System . . . . .	155
12.3.1	The Velocities " $v$ " in the Nervous System . . . . .	156
12.3.2	Mass, Velocity and Energy in the Central Nervous System . . . . .	157
12.4	Inertial and Accelerated Systems in the Brain . . . . .	158
12.4.1	The "Observers" in the Brain . . . . .	161
<b>Appendix</b>	<b>Beyond the Border: Metaphysics and the Brain</b>	
	<b>A Sample of Problems . . . . .</b>	<b>163</b>
A. 1	Introducing the Problems . . . . .	163
A. 2	Man and Animals . . . . .	167
A. 3	The Intellect . . . . .	171
A. 4	The Continuum . . . . .	174
A. 5	Theology and Neuroscience . . . . .	175
A. 6	Tension . . . . .	180
A. 7	Determination and Free Will . . . . .	183
