PREFACE . . . . .	vii
-------------------	-----

## OPENING REMARKS

<i>J. S. Schneider:</i> Functions of the Basal Ganglia: An Overview . . . . .	1
--	---

## SECTION I: STUDIES OF THE NEOSTRIATUM

<i>R. Malach and A. M. Graybiel:</i> The Somatic Sensory Corticostriatal Projection: Patchwork of Somatic Sensory Zones in the Extrastriosomal Matrix . . . . .	11
<i>G. M. Krauthamer, D. S. Yamasaki and R. W. Rhoades:</i> Does the Neostriatum Self-Regulate its Sensory Input? The Role of the Superior Colliculus . . . . .	17
<i>M. O. West, A. J. Michael, S. E. Knowles, J. K. Chapin and D. J. Woodward:</i> Striatal Unit Activity and the Linkage Between Sensory and Motor Events . . . . .	27
<i>E. T. Rolls and G. V. Williams:</i> Sensory and Movement-Related Neuronal Activity in Different Regions of the Primate Striatum . . . . .	37
<i>I. Divac, G. E. Öberg and C. E. Rosenkilde:</i> Patterned Neural Activity: Implications for Neurology and Neuropharmacology . . .	61

## SECTION II: SENSORIMOTOR INTEGRATION

<i>F. Viallet, E. Trouche, D. Beaubaton, E. Legallet and R. Khalil:</i> Visual Feedback and Motor Performance in Human and Animal Basal Ganglia Dysfunction . . . . .	71
<i>G. Chevalier and J. M. Deniau:</i> The Striato-Nigro-Collicular Pathway: A Route for Facial Information to Oculo and Cephalic Motor Circuits . . . . .	83
<i>J. P. Huston, S. Morgan and H. Steiner:</i> Plasticity in Crossed Efferents from the Substantia Nigra as Related to Behavioral Reorganization . . . . .	89
<i>J. S. Schneider:</i> Basal Ganglia-Motor Influences: Role of Sensory Gating . . . . .	103
<i>T. I. Lidsky and C. Manetto:</i> Context-Dependent Activity in the Striatum of Behaving Cats . . . . .	123

<i>H. P. Zeigler:</i> The Trigeminal System and Sensorimotor Integration . . . . .	135
---	-----

### SECTION III: NONMOTOR FUNCTIONS OF THE BASAL GANGLIA

<i>A. Jayaraman:</i> The Basal Ganglia and Cognition: An Interpretation of Anatomical Connectivity Patterns . . . . .	149
<i>C. H. Markham:</i> The “Motor” vs. “Sensory” Enigma in Parkinson’s Disease . . . . .	161
<i>Y. Stern:</i> The Basal Ganglia and Intellectual Function . . . . .	169
<i>R. J. Carey:</i> Effect of Dopamine Denervation of the Basal Ganglia on an Animal’s Response to Reward and Aversive Stimulation . . . . .	175
<i>J. Siegel:</i> Striatal and Limbic Modulating Influences: A Search for Target Sites . . . . .	183

### CONCLUDING REMARKS

<i>T. I. Lidsky:</i> Functional Analyses of the Basal Ganglia . . . . .	197
INDEXES . . . . .	201
