

CONTENTS

	Page
Foreword (First Edition)	III
Acronyms	VI
1 The Global Positioning System	1
1.1 Preamble	1
1.2 GPS Measurement Types	3
1.3 Measurement Differencing	4
1.4 GPS Orbit Considerations	8
1.5 Suggested Reading List	9
2 GPS Receiver Technology	11
2.1 GPS Signal Structure	11
2.2 GPS Measurement Modes	12
2.3 GPS Instrumentation	17
3 Surveying with GPS	24
3.1 Introduction	24
3.2 Survey Planning	25
3.3 Survey Execution	27
3.4 Post-Survey Processing	29
3.5 Impact of GPS on Surveying	33
4 Time, Earth Rotation, Reference Systems and Geodetic Datums	40
4.1 Definitions of Time	40
4.2 Celestial and Terrestrial Reference Systems	43
4.3 Relating the Conventional Terrestrial System to Geodetic Datums	50
5 GPS Data Processing	55
5.1 GPS Phase Observables	55
5.2 Analysis of GPS Observations	64
5.3 Error Analysis	79
5.4 Dual-Frequency Observations	82

6	Height Determination Using GPS	86
6.1	Introduction	86
6.2	Geoid Computation Techniques	87
6.3	Remarks on "Absolute" Geoid Determination	94
6.4	Relative Heights from GPS	95
7	Satellite Orbital Motion	98
7.1	Motion of a Near-Earth Orbiting Satellite	98
7.2	Motion of GPS Satellites	102
7.3	Computation of Satellite Orbits	109
7.4	GPS Ephemerides	115
	References	121
