Foreword

Automatic identification technologies

New families of identification systems feature modularity and growing standardisation 3

J.M. Hill, Logisticon Inc., USA

Encoding information 7

RJS Enterprises Inc., USA

Decoding information 17

D.J. Czaplicki, Intermec Corporation, USA

Planning and implementing automatic identification systems

The human factors in an automatic identification project 25

L.A. Klaisner, Intermec Corporation, USA

Improving data collection through optical scanning systems 29

B.J. Armstrong, Data Composition Inc., USA

Development of successful automatic identification systems 33

R. Bravman, Symbol Technologies Inc., USA

Integrating bar code data collection with shop floor control systems 41

W. Ford, Computer Identics Corporation, USA

A bar code system for improving inventory control and customer service in a random manufacturing environment 47

D. Castle, Hybritech Inc., USA, and A. Dahi, Signet-Armorlite Inc., USA

Bar coding

Bar code technology 55

R.C. Palmer, Intermec Corporation, USA

The economic benefits of bar coding 63

M. Aston, Arthur Andersen & Co., UK

Bar codes in harsh manufacturing environments 71

B.R. Wray, Computype Inc., USA

Data collection from production workers provides a basis for better decision making 79

G.A. Twedt, Data Collection Systems Inc., USA

Introduction of bar codes for automatic printed circuit board manufacture 87

A. Krupp, Siemens AG, Federal Republic of Germany

The use of automatic data retrieval for order assembly using bar codes 93

S.J. Robinson, Avon Cosmetics Ltd, UK

Radio frequency tagging

Radio frequency transponder technology 101
S. Curtis, Eureka Systems, UK

Automatic identification systems using radio frequency coded tags: an international perspective S.M. Evans, Cotag International Ltd, UK 105

Automatic identification and information systems 111
K. Murphy and J. Kay, Cranfield Institute of Technology, UK

A flexible manufacturing system user's application of intelligent code tags 117
P.G. Hudson and S. Webb, AMECAS, UK

PREMID: the key to the automation concept adopted by BMW in Munich 123
N.V. Philips Nederland B.V., The Netherlands

Magnetic, IC and optical card technologies

Magnetic, IC and optical cards: data storage in your wallet 133
Y. Kageyama, Omron Tateisi Electronics Co., Japan

Technical trends and applications of the IC card 137
S. Asano, National Centre for Science Information Systems, University of Tokyo, Japan

Smart cards: a critical decision point 143
J. Svigals, Jerome Svigals Inc., USA

Optical memory cards: the ultimate identification and security documents 155
R.B. Barnes, Drexler Technology Corporation, USA

Glossary of terms

A glossary of automatic identification terminology 163
AIM Europe, UK

Authors' organisations and addresses 171

Source of material 173
