Foreword

Introduction

- Understanding the connection between productivity and quality in a competitive business environment** 3
J. A. Edosomwan, IBM Corporation, USA
- SPC principles and prospects** 7
J. F. Hill, University of Warwick, UK
- Systematic quality control** 13
D. Harrison, Management and Quality Consultant, UK
- SPC: A tool to assist the pursuit of quality** 19
The late T. J. Vickerstaff, Jaguar Cars Ltd, UK
- Statistical process control: Why we need it** 23
D. A. Marker and D. Morganstein, Westat, USA

The Management of Quality

- The role of SPC in total quality management** 31
J. S. Oakland, University of Bradford, UK
- New dimensions of quality management** 35
S. Shiba, International Institute for Applied Systems Analysis, Austria and
Institute of Socio-Economic Planning, University of Tsukuba, Japan
- Introducing SPC in a total quality management environment** 39
J. I. Evans, Dow Corning Ltd, UK
- Teams in quality** 47
J. S. Pickup, Consultant, former Chairman of the National Society of
Quality Circles, UK
- SPC – Education and training implications** 51
M. H. Owen, Bristol Polytechnic, UK

SPC in Design and Development

- Taguchi methods for design stage quality** 59
A. Bendell and J. Disney, Trent Polytechnic, UK
- Industrial statistics: Some applications within the Philips company** 63
P. M. Upperman, Philips BV, The Netherlands
- Extending statistical techniques to development** 71
A. J. Collins, PA Technology, UK

Verification-in-process	77
P. Menig, Eaton Corporation, USA	
How SPC smooths the way for CIM	87
J. Houston, DataMyte, USA	
Implementing SPC	
The implementation and evolution of statistical process control	93
B. J. McKennon, Austin Rover Group Ltd, UK	
Installing and operating an SPC system: Ten simple steps to improving quality	101
M. Eckard, Honeywell – Industrial Control Division, USA	
Using computers in SPC	109
J. Cullen, Coopers & Lybrand, UK	
A description of an on-line statistical quality control package	117
J. R. Rushing Jr, Setpoint Inc, USA	
SPC in Action	
Lies, damned lies and statistics	125
S. McCausland, Pasco Quality Assurance, formerly Electrolux Ltd, UK	
Statistical process control in a small batch environment	129
G. W. Cooper, Eaton Ltd, UK	
Automating for quality	133
R. Dowding, CAP Industry Ltd, UK	
Tolerances and SPC	139
E. H. Lanke, Wisconsin Coil Spring Inc., USA	
SPC in the Process Industry	
Statistical process control in the manufacture of polymers	151
S. H. Coulson and J. A. Cousans, Exxon Chemicals International, UK	
From SQC to SPC in the brewing industry	157
J. L. Rees, University of Edinburgh, UK	
SPC and the Role of the Supplier	
Introducing SPC into a ‘traditional’ manufacturing company	165
D. Finch, Wellworthy Ltd, UK	
The development of SPC and supplier relationship	173
H. W. Mueller, Ford of Europe, UK	
Statistical process control: Forging the application	177
J. R. Creed, Cameron Iron Works Ltd, UK	
Authors’ organisations and addresses	185
Source of material	187
