

CONTENTS

CHAPTER 1 – THE CHANGING WORLD OF ELECTRONICS ASSEMBLY

Systems, vision and components in electronics assembly	3
Manging automated electronics assembly	6
C-H. Mangin	

CHAPTER 2 – CIRCUIT BOARDS

PCB production equipment	13
H. W. Markstein	
Modern platers and etchers	15
H. W. Markstein	
Chemicals in PCB manufacturing	20
S. L. Spitz	
Cleaning PCBs for higher quality	25
S. L. Spitz	
Producing quality multilayer PCBs	32
M. Friedman and W. Berry	
Plasma desmearing	33
T. Dixon	
Chip-on-Board	
Chip-on-board technology	41
R. Keeler	
Chip-and-wire technology	45
G.L. Ginsberg	
TAB and flip-chip technology	52
G. L. Ginsberg	

CHAPTER 3 – COMPONENT INSERTION

Component insertion equipment	59
T. Thompson	
Workstations	64
R. Keeler	
Automatic component insertion/placement systems	70
H. W. Markstein	
Automated pin insertion	76
B. Corner	
Automated placement techniques	79
N. Andreiev	

Robotic Assembly

Assembly challenges	85
C-H. Mangin	
Robots in the electrical and electronics industry	86
G. Bornecke	
Consistency and quality using robots	93
R. Pound	
Robot hand exchangers	99
T. Petronis	
Vision-guided assembly	103
R. Pound	

Robotic Application

Vibratory insertion process: A new approach to non-standard component insertion	115
B. D. Hoffman, S. H. Pollack and B. Weissman	

CHAPTER 4 – SURFACE-MOUNT TECHNOLOGY

SMT growth	123
D. Brown, J. Bracken, A. Manna and J. Brasch	
Realizing the benefits of SMT	129
T. Dixon	
Designing reliability into surface-mount assemblies	137
C. Capillo	
Design solutions	143
M. Kastner and V. Solberg	
Choosing SMT and setting up a facility	150
H. W. Markstein	
SMT advantages	156
H. W. Markstein	
Pick-and-place machines	163
R. Pound	
Surface-mount assembly using machine vision	169
S. L. Spitz	
SMD placement using machine vision	175
C. Cullen, J. Field and J. Payne	
The Demands of SMT	
Hot-air leveling	183
D. A. Elliott	
Testability circuit and board access problems	190
J. Turino	
Conductive epoxy for SMT solder replacement	195
R. Pound	
The removal and replacement of SMCs	201
L. Walgren	

CHAPTER 5 – HYBRID CIRCUITS

New applications	207
D. Brown and M. Freedman	
New materials and equipment	211
J. E. Sargent	
Integral substrate package technology	216
A. W. Koszykowski	

CHAPTER 6 - SOLDERING AND CLEANING

Solder/cleaning, test and rework	221
Solder Quality Definition	
Solder joint acceptability	227
J. Keller	
Wave solder defects	230
J. G. Davy	
Wave Soldering	
Soldering system trends	239
R. Pound	
Wave soldering: A study in process control	245
L. Cox	
Optimizing the wave soldering process	252
K. M. Lin and R. N. Kacker	
Computerized soldering systems	259
S. L. Spitz	
Re-examination of soldering techniques	263
T. Dixon	

Adhesives

Adhesives for SMD wave soldering 275
R. Keeler

Adhesive evaluation 280
E. St. Peter, F. C. Martin and W. A. Reyes

The Role of Solder Paste

Solder coating and leveling 285
R. Keeler

Screen printing 293
R. Keeler

Cleaning Soldered Assemblies

Solvent flushing 303
R. Pound

Rosin solder flux residues 309
E. Westerlaken

Aqueous cleaning 317
R. Keeler

Cleaning surface-mounted assemblies 324
C. A. Capillo

Repairing Soldered Assemblies

Desoldering components 333
H. W. Markstein

CHAPTER 7 – TEST AND INSPECTION

Verification of Incoming Components and Circuit Boards

Bare-board testing 343
N. Andreiev

Automatic optical inspection systems	346
H. Gilutz	
Machine vision	352
R. Keeler	
Verifying Component Quality	
Component testers and handlers	363
R. Keeler	
Handlers	371
S. L. Spitz	
Lead Inspection	
Lead scanning	379
E. J. Penn	
Special Problems of Hybrid and SMT Inspection	
Probe design and test fixturing	385
C.M. Tygard	
Inspecting Soldered Joints	
Inspection equipment	393
R. Pound	
Image processing and non-destructive testing	395
R. Pound	
Special Problems of Surface-Mounted and Hybrid Circuit Construction	
Design of SMA for testability	405
J. L. Turino	
Test and inspection of hybrid microcircuits	411
J. E. Sergeant, H. H. Chiles and R. Power	

Testing Completed Assemblies

In-circuit and functional ATE 419
R. Keeler

Functional test 424
R. Keeler

Automating the Test Function

Test program development and processing power 433
R. Pound

Robotic automated-test workcells 440
R. Woodcock

CHAPTER 8 – ENVIRONMENTAL CONCERNS IN ELECTRONICS ASSEMBLY

Clean Rooms

Clean room technology 453
S. Crum

Modular clean rooms 458
G. J. Horky, B. O. Williams and J. R. Block

Personal Discipline

Clean room air monitoring 463
S. Crum

Protection Against Electrostatic Damage

ESD control 469
J. Harris

Static shielding techniques 474
R. Berson

CHAPTER 9 – THE ROLE OF CAE/CAD/CAM IN ELECTRONICS MANUFACTURING

Computer control of modern factory operations H. W. Markstein	481
Electronics CAE/CAD/CAM	491
CAD/CAM for PCB manufacturing R. L. Myers	500
Designing PCBs for surface-mount assemblies M. Marsh	504
CAD in hybrid production J. E. Sergeant, H. H. Chiles and P. P. Molkenthin	510
Discrete wired circuit board production A. Filippone	515

CHAPTER 10 – AUTOMATING ELECTRONICS MANUFACTURING

Automating the assembly of electronic products	525
Test, rework and inspection management costs C-H. Mangin	530
Flexible manufacturing S. L. Spitz	533
Computer simulation R. Pound	537
Local area networks T. Dixon	543
Physical Integration	
Materials handling accessories H. W. Markstein	551

Automated PCB handling R. Osterhout	557
Automated guided vehicle systems G. A. Koff	562
Case Histories in Electronic Assembly Automation	
Batch-of-one assembly W. H. Schwartz	571
FMS for PCB assembly A. M. Freer	576
PCB assembly and test R. D. McCleary	581
Factory control and robotic systems R. N. Hosier and J. A. Henderson	589
Authors' organizations and addresses	601
