

Contents

1 Introduction	1
Characterization of Research Papers by Data Analysis Techniques <i>W. Gaul and M. Schader</i>	3
The Interface Among Data Analysis, Marketing, and Representation of Knowledge <i>P. Arabie and J. Daws</i>	10
2 Decision Support for Marketing Problems	17
PROLOG-Based Decision Support for Data Analysis in Marketing <i>I. Böckenholt, M. Both and W. Gaul</i>	19
Market-Share Analysis: Communicating Results Through Spreadsheet-Based Simulators <i>L.G. Cooper</i>	35
A PROLOG-Based PC-Implementation for New-Product Introduction <i>W. Gaul and A. Schaer</i>	42
Exploring the Possibilities of an Improvement of Stochastic Market Models by Rule-Based Systems <i>A. Geyer-Schulz, A. Taudes and U. Wagner</i>	54
The Development of a Knowledge Based Media Planning System <i>A.A. Mitchell</i>	67
3 Decision Support Systems, Knowledge Representation, Applications other than Marketing	81
KREDIT: KEE-Based Support for Credit Decisions in a Mail-Order Firm <i>O. Büring, M. Schader</i>	83
A Decision Support System for Vehicle Scheduling in Public Transport <i>J.R. Daduna</i>	93
Developing a Decision Support System for Personnel Disposition in a Garage —Experiences Using the KEE Shell <i>M. Demann, M. Schader and U. Tüshaus</i>	103
MIDAS: An Expert Debt Management Advisory System <i>M.A.H. Dempster and A.M. Ireland</i>	116
Incorporating Knowledge in Decision Support Systems <i>F. Esposito</i>	128
Statistical Structures for Analyzing Time-Dependent Observations <i>K.A. Froeschl and W. Grossmann</i>	145
Data Analysis and Expert Systems: Generating Rules from Data <i>M. Gettler-Summa, H. Ralambondrainy and E. Diday</i>	161
Fuzzy Reasoning for Classification: An Expert System Approach <i>C. Granger</i>	174

OPTRAD: A Decision Support System for Portfolio Management in Stock and Options Markets	
<i>S. Trautmann</i>	185
Decision Support for Qualitative Data Analysis—KEE Shell Linked to FORTRAN Programs	
<i>U. Tüshaus</i>	204
4 Data Analysis and Marketing	213
Marketing Application of Sequencing and Partitioning of Nonsymmetric and/or Two-Mode Matrices	
<i>P. Arabie, S. Schleutermann, J. Daws and L. Hubert</i>	215
Multidimensional Scaling in Marketing Research: An Illustrative Application to a Telecommunications Pricing Problem	
<i>J.D. Carroll, B.B. Hollister, R.T. Iosso, S. Pruzansky, J.A. Rotondo and S.L. Weinberg</i>	225
Inferring an Ideal-Point Product-Market Map from Consumer Panel Data	
<i>T. Elrod</i>	240
An Individual Importance Weights Model for Conjoint Analysis	
<i>P.E. Green, F.J. Carmone and C.M. Schaffer</i>	250
Dominated Options in Consumer Tradeoff Modeling: Is Their Occurrence Recognized?	
<i>P.E. Green, A.M. Krieger and C.M. Schaffer</i>	258
Market Segmentation by Dual Scaling Through Generalized Forced Classification	
<i>S. Nishisato</i>	268
Asymmetric Multidimensional Scaling of Car Switching Data	
<i>A. Okada</i>	279
Evolving Principal Clusters: Theory and Application to Management Monitoring	
<i>Y. Schecktmann and A. Ibrahim</i>	291
The Importance of Unidimensional Unfolding for Marketing Research	
<i>W.H. van Schuur</i>	299
5 Data Analysis	317
The Effect of Measurement Error on Determining the Number of Clusters in Cluster Analysis	
<i>M.C. Cooper and G.W. Milligan</i>	319
On the Use of Simulated Annealing for Combinatorial Data Analysis	
<i>G. De Soete, L. Hubert and P. Arabie</i>	329
Some Thoughts on Comparing Multivariate Data with the Map Locations at which they are Observed	
<i>K.R. Gabriel</i>	341
Classification of Microcomputers and Marketing Interpretation	
<i>J. Janssen and P. Van Brussel</i>	355
Second Order Regression and Distance Analysis	
<i>J.J. Meulman and W.J. Heiser</i>	368
