Chapter 1

THE COMPLETE BLOW MOLDING OPERATION

D. V. Rosato

1	The Complete Blow Molding Operation
7	Basics in Blow Molding
15	Basic Processing Concepts
16	Extrusion
22	Injection
27	Stretch Blow Mold
34	Blow Molding Processes
34	Extrusion Blow Molding
36	Injection Blow Molding
38	Biaxially Oriented PET
39	Biaxially Oriented PVC
39	Coextrusion
40	Industrial Blow Molding
41	Multi-Layer Containers via Coextrusion, Coinjection, Coating
42	Mono-Layer
42	Coatings
43	Multi-Layer
43	Barrier Materials
44	Manufacturing Technologies
44	Coextrusion
44	Coextrusion Blow Molding
49	Coinjection Blow Molding
51	Coinjection Stretch Blow Molding
51	Conclusions on Barrier Containers
52	Stretch Blow Molding
56	Definition for Plastics
57	Plastics Growth
58	Economics
59	Safety
59	Consumer Need

59	Plastic Molding Materials
60	Cost of Processing Melt
61	Checking Plastics Received
61	Compounding and Coloring In-Plant
62	Interfacing Machine Performance
64	Start-up and Shut-down Procedures
64	Start-up (HDPE)
64	Shut-down
65	Degradation Problems
65	Process Control
71	Molding/Volume Processing Diagrams
73	Handling Regrind
74	Size Reduction Needs
74	Safety Guides/Standards
79	Rules
79	Rules to Remember
79	Rules to Forget
79	Blow Molding Plants
80	Blow Molded Products
86	Conversion English/Metric
88	Metric Letters Can Misrepresent Contents
91	Blow Molding Nomenclature
96	References

Chapter 2

BLOW MOLDING MACHINES

*P. R. Wingard,
Mid-Atlantic Plastics
Systems, Inc.*

97	Blow Molding Machines
97	Extrusion Blow Molding
99	Extrusion Heads
101	Blow Molding Presses
107	Selecting Presses
109	Stretch Blow Molding
111	Injection Blow Molding
112	Coextrusion Blow Molding
112	Chemical Market
112	Food Market
114	Large Containers and Industrial Parts

Chapter 3

INJECTION STRETCH BLOW MOLDING

*Y. Nakamura,
Nissei ASB Machine
Co. Ltd.*

117	Injection Stretch Blow Molding
117	Single Layer
118	Heat Resistant PET Bottle Specifications
118	How to Mold Heat Resistant PET Bottles
122	Heat Resistant PET Bottle Performance

122	Blow Mold Temperature and PET Bottle Shrinkage
123	Parison Temperature
124	Bottle Weight
124	Neck Design
124	Shrinkage
126	Physical Properties of Heat Resistant PET Bottles
126	Density and Crystallinity
126	Degree of Orientation (X-ray-analysis)
127	Heat-Set PET Bottle Production
127	Characteristics of the Hot Parison Process and ASB Machine
129	Multi-Layers
129	“T”-Series Multilayer ASB Machine
130	Comparison of Barrier Resins
132	CO ₂ Permeation Tests With Bottles of Different Barrier Resins
141	Oxygen Permeation Test for Wine Bottle
142	Oxygen Permeation Check for Wine Bottle
142	CO ₂ Permeation Test for Wine Bottle
143	Three Layer PET Bottles for Pasteurization
144	Designing a Hot Fill PET Bottle
146	Wide Mouth PET Containers

Chapter 4

PLASTICATING SCREW PROCESS

<i>P. N. Colby, Spirex Corporation, and D. V. Rosato</i>	149	Plasticating Screw Process
	149	Nomenclature
	154	Metering Screw
	154	Feed Section
	158	Transition Section
	158	Melting
	159	Compaction and Elimination of Voids
	159	Pressure Build-Up
	159	Metering Section
	159	Metering
	160	Shear Rate
	161	Pressure Holding
	161	Mixing Devices
	163	Dulmage Mixer
	163	Mixing Pins
163	Union Carbide Mixer	
165	Pulsar Mixer	
165	Barrier Screws	

Chapter 5

CONTROLS FOR BLOW MOLDING

<i>H. E. Harris,</i>	169	Controls for Blow Molding
<i>Harrel, Inc.</i>	170	Machine Controls
	170	Temperature
	170	Placement of Sensors
	171	Dual Sensors
	172	Control Characteristics
	173	On/Off
	174	Proportional Control
	175	Automatic Reset
	176	Types of Sensors
	176	Thermocouple
	176	Resistance Temperature Detector (RTD)
	177	Automatic Tuning
	178	RPM Speed Regulation
	179	Timing and Sequencing
	179	Process Controls
	179	Melt Temperature Process Control
	180	Melt Pressure
	180	Melt Pump
	180	Parison Programming
	181	Parison Length Control
	181	Product Controls
	181	Weight Control
	182	Thickness Control
	182	Plantwide Control and Management
	182	References

Chapter 6

DESIGNING BLOW MOLDED PRODUCTS

<i>D. V. Rosato</i>	185	Designing Blow Molded Products
	185	Overview
	186	Interrelation of Material and Process with Design
	187	Design Shape and Stiffness
	189	Residual Stress and Stress Relaxation
	191	Design Parameters
	192	Biaxial Orientation
	192	Interrelation of Design and Resin with Processing
	193	Practical Engineering Approach
	194	Advanced Engineering Approach
	195	Design Guidelines
	199	Basics in Design
	203	Closures
	205	Handles for Extrusion and Injection Blow Molded Containers

206	Hinges
208	Snap Fits
209	Plastics with a Memory
209	Behavior of Plastics
211	Viscoelastic Behavior
213	Isochronous Stress-Strain Relationships
214	Boltzmann Superposition Principle
214	Summary
215	References

Chapter 7

DESIGNING AND MANUFACTURING OF DIES/MOLDS

<i>D. V. Rosato</i>	217	Designing and Manufacturing of Dies/Molds
	223	Extrusion Blow Molding
	227	Flow of Parison
	232	Die and Mandrel Design
	238	Die Shaping
	241	Accumulator Head
	243	Parison Swell
	247	Calculating Die and Mandrel Dimensions
	250	Coextrusion Dies
	251	Parison Thickness Control
	259	Blowing the Parison
	263	Clamping Molds
	265	Mold Design Basics
	266	Shrinkage
	267	Parting Line
	268	Pinch-Off
	273	Molded Neck Prefinishing
	279	Flash Trimming
	282	Venting and Mold Surface
	288	Negative Pressure and Double Wall Blow Molds
	289	Clamp Tonnage
	290	Shrinkage
	290	In-Mold Labeling
	291	Part Ejection
	292	Tolerances and Fits
	293	Mold Construction
	299	Cooling Blown Product
	299	Mold Cooling
	303	Internal Cooling
	303	Injection Blow Mold
	313	Preform Mold Construction
	318	Blow Mold Design
	320	Coinjection
	320	Stretched Blow Molds
	321	Extrusion Stretch Blow
	324	Injection Stretch Blow

327	Cleaning Molds/Dies
327	Manual Cleaning
328	Options
328	Solvent Cleaning
328	Ultrasonic Solvent
328	Salt Baths
329	Ovens
329	Fluidized Bed Cleaning
329	Assembling the Die/Mold
329	Computer-Aided Mold and Part Design
331	References

Chapter 8

BLOW MOLDS AND OPERATION

<i>D. V. Rosato</i>	333	Blow Molds and Operation
	333	Overview
	337	Blow Mold Basics and Operations
	338	Mold Materials
	338	Fast Mold Cooling
	339	Mold Cooling Analysis – Computer-Aided Design
	341	Pinch-Off
	341	High Quality/Undamaged Cavity Finish
	341	Effects of Air and Moisture Trapped in the Mold
	342	Injection of the Blowing Air
	342	Part Injection Used in Mold Action
	343	Large-Part Post Cooling
	344	Conveyor Systems and Finishing Equipment
	345	Treating and Printing
	346	Using Geometric Tolerancing
	347	References

Chapter 9

CAD/CAM/CAE FOR BLOWN PARTS AND DIE/MOLD DESIGN

<i>J. E. Gosztyla,</i>	349	CAD/CAM/CAE for Blown Parts and Die/Mold Design
<i>Computervision</i>	349	Introduction
<i>Corporation</i>	353	Benefits of CAD/CAM/CAE in Design
<i>and</i>	355	Basics in CAD/CAM Modeling
<i>D. V. Rosato</i>	356	Basics in CAE
	357	Flow Analysis
	358	Cooling Analysis
	360	Economic Plant Operating Analysis with CIM
	361	Modeling Methods
	361	Wire Frame Modeling
	363	Surface Modeling

364	Solids Modeling
365	Computer Capabilities for Part and Mold Design
365	Finite Element Modeling
366	Modal Analysis Modeling
366	System Simulation Modeling
367	Group Technology Modeling
367	Digitizing Technique
368	Layering Technique
368	Large-Scale Multiple Geometry Technique
368	Other Capabilities
369	Illustration of the Design Process
370	Manual/Paper Method
372	CAD/CAM Method
375	On-Line Data Bases
377	Conclusion
377	References

Chapter 10

MOLD COOL AND FLOW ANALYSIS

*K. R. Schauer,
AEC Corporation*

379	Mold Cool and Flow Analysis
379	Introduction
379	System Operation
379	Case Example
379	Operation Data File
380	Mold Geometry File
382	Optimization
386	Mold Cooling Analysis
387	Fundamentals of Cooling Analysis and Design
387	Cooling the Melt
388	Conduction in the Mold Wall
389	Convection Cooling in the Waterline
390	Combining the Three Effects
390	References

Chapter 11

AUXILIARY EQUIPMENT

D. V. Rosato

391	Auxiliary Equipment
392	Material Handling
392	Types of Equipment
394	Automated Systems
396	Manufacturing Performance
398	Dryers
399	Hot Air Dryers
400	Dehumidifying Dryers
401	PET Drying Systems

401	Controlling Acetaldehyde Levels
402	Molding Nylon – Special Moisture Problems
404	Chillers and Coolers
404	Heat-Transfer Calculations
405	Requirements Vary With Materials
406	Do Not Neglect Water Recovery
407	Types of Chillers
408	Why Have a Cooling Tower
408	Water Treatment
409	Evaluating Equipment Before You Buy
409	Payback in Under a Year
410	Calculation of the Cooling Load
410	Cooling Water Temperature Requirements
410	The Thermal Properties of Plastics
412	Refrigerated Compressed Air Dryers
412	The Properties of Air
413	Dew Point
413	Effect of Change in Air Properties
415	Heat Pump Chillers
416	Operation of the Heat Pump System
416	Mold Dehumidification
418	Dew Point
418	Mold Surface Temperature
419	Air-Conditioning and Desiccant Dehumidification
419	Dehumidification System
420	Adaptability for Molding Operations
420	Economic Analysis – Case Study for Dehumidifier
421	Static Eliminator
422	Eliminating Static
422	Granulators
424	Plastics Characteristics
426	Cutting Chamber
426	Bearings
426	Cutting Chamber Assembly
427	Screen Chambers
427	Safety
427	Reclaim PET Bottles
431	Decorating
431	In-Mold Labeling
437	Blow Molding Automation
439	Transfer and In-Line Trim
441	Economics
441	Advantages and Disadvantages
443	Industrial Large Parts
443	In-Mold Labeling
447	Quick Mold Change
447	Dedicated Lines
448	Basics in Secondary Operations
450	Detecting Leakage in Containers
454	Pressure Sensing
456	Applications

457	Analyzing Blow-Down Graphically
458	References

Chapter 12

PROCESSING PLASTIC MATERIALS

D. V. Rosato

461	Processing Plastic Materials
462	Types of Plastics
465	Crystalline
466	Amorphous
466	Spherulites
467	Glass Transition Temperature
468	Commodity and Engineering Plastics
468	Interrelate Plastic, Processing and Properties
469	Fundamentals of Processing
470	Rheology
472	Elasticity
473	Shear Sensitivity
475	Behavior of Plastics
476	Compounds, Alloys, Additives
477	Compounding
479	Alloying/Blending
481	Additives
484	Coextrusion and Coinjection or Multilayer Plastic Composites
486	Type of Barrier
488	Status of EVAL Resins
488	Barrier Polymers
490	Barrier Packaging
491	Gas Barrier Properties
492	Mechanical and Optical Properties
492	Oil and Organic Solvent Resistance
492	Fragrance and Odor Protection
492	Processing
493	Regulatory Approvals
494	Packaging Structures
494	Fluorination
494	New Business for Blow Molders
495	Coextrusion
497	Coinjection
499	Coated Containers
500	PET Bottles
501	PVDC Coating Performance
501	Coating Process
502	Other Barrier Coatings
502	Coextrusion
502	Hot-Melt Extrusion Coating
502	Metallizing
502	Materials for Blow Molding

503	Properties
504	ABS
504	Introduction
505	Blow Molding Equipment Advances
505	Considerations for Blow Molding ABS
505	Drying
505	Screw Design
505	Processing Temperatures
505	Die Swell
506	Viscosity
507	Accumulator Head
507	Press
507	Regrind Use
508	Mold Temperature
508	Shrinkage
508	Melt Strength
508	ABS Material Selection
508	Conclusions
508	Nylon
510	Non-crystalline, Transparent Nylon
510	A Modified Non-crystalline Nylon
511	A Semi-crystalline Homopolymer
512	Comparison of Melt Properties
512	General Information on Nylons
513	Acetal
514	Polycarbonate
517	Thermoplastic Elastomers (TPE's)
519	Acrylonitrile
519	Ionomer
520	Liquid Crystal Polymer
521	Recycling Plastics
523	Recyclers
525	Guide for Identification of Plastics
526	References

Chapter 13

POLYOLEFINS: LDPE, EVA, LLDPE, HDPE, and PP

<i>D. V. Rosato</i>	529	Polyolefins: LDPE, EVA, LLDPE, HDPE, and PP
	529	Introduction
	529	Heat Stabilizers
	529	Other Additives
	530	Processing
	530	Mold Surfaces
	530	Melt Index
	531	How Processing Affects Properties
	532	Parison Formation
	532	Melt Temperature
	532	Surging

532	Defects
532	Parison Velocity
534	Swell
534	Blowing Process
534	Controlling Variables
534	Blow Pressure
534	Blow Time
535	Cycle Time
535	Exhaust Time
535	How Resin Parameters Affect Properties
535	Melt Flow Rate
535	Molecular Weight
535	Density
536	Stress Crack Resistance
536	Molecular Weight Distribution
537	Swell
538	Markets

Chapter 14

POLYETHYLENE TEREPHTHALATE (PET)

<i>D. V. Rosato</i>	539	Polyethylene Terephthalate (PET)
	539	Overview
	540	Simplified Guide to PET Processing
	545	Processing PET
	548	Processing PET Preforms
	551	Potential Disadvantages
	552	Free Blowing PET Preforms
	553	Effect of Time on Bottle Properties
	558	Multi-layer Improves Shelf-life
	559	Aging of PET Bottles
	563	PET Bottle History and Forecast
	565	History
	566	Creativity and Engineering
	568	References

Chapter 15

POLYVINYL CHLORIDE

<i>D. V. Rosato</i>	571	Polyvinyl Chloride
	571	Overview
	572	Compounding
	572	Impact Modifiers
	573	Heat Stabilizers
	574	Lubricants
	574	Processing Aids
	575	Compounding Formulations
	578	Food Grades

578	Types of PVC
578	General Purpose
579	High Impact
579	Chemical Resistance
579	Food Grade
579	Material Stability
583	Nonhazardous PVC
584	FDA Withdraws Ban
585	Solid Waste
586	Processing PVC
587	Stretch Blow Mold PVC
588	Extrusion Stretch Blow
590	Preform Temperature
590	Stretch and Blow-up Ratio
590	Bottle Shape
590	Economics of Extrusion Stretch
592	Injection Stretch Blow
594	Economics of Injection Stretch
596	Extruders for PVC
597	Twin Screw
597	Single Screw
598	PVC Future
599	References

Chapter 16

POLYMER STRUCTURE IN BLOW MOLDING: PROCESSING AND PROPERTIES

<i>R. D. Deanin, W. J. Donovan, K. A. Goeken, University of Lowell</i>	601	Polymer Structure in Blow Molding: Processing and Properties
	601	Synthesis and Structure of Polymers
	603	Relationship Between Polymer Structure and the Blow Molding Process
	603	Individual Atoms and Functional Groups
	610	C-C Single Bond
	610	C = C Double Bond
	611	C-H Bond
	611	C-O-C Bonds
	612	Peroxides
	612	C-N Bonds
	612	Nitriles
	613	Chlorine
	613	Sulfur
	614	Silicones
614	Molecular Weight	
614	Average Molecular Weight	
616	Molecular Weight Distribution	
616	Branching	
617	Other Effects of Molecular Weight	

617	Thermal Stability
617	Thermal Conductivity
618	Coefficient of Thermal Expansion
618	Melting and Crystallization
618	Molecular Flexibility
624	Main-Chain Structure
624	Side-Chain Structure
624	Size and Shape
625	Polarity
625	Effects of Molecular Flexibility on Processing and Properties
625	Processing
627	End-Use Properties
627	Orientation and Crystallinity
628	Orientation in Blow Molding
628	Processing
629	Effects on Properties
630	Crystallization in Blow Molding
630	Processing
633	Effects on Properties
634	Intermolecular Bonding
634	London Dispersion Forces
635	Polarity
636	Hydrogen-Bonding
637	Orientation and Crystallinity
639	Ionic Bonding
639	Cross-Linking
639	Additives, Impurities and Macrostructure
639	Additives
640	Impurities
641	Macrostructure
641	References

Chapter 17

MELT RHEOLOGY AND BLOW MOLDING

<i>K. F. Wissbrun, Celanese Research Co., and J. M. Dealy, McGill University</i>	645	Melt Rheology and Blow Molding
	645	Introduction
	646	Rheological Behavior of Molten Plastics
	646	Viscosity
	648	Non-Newtonian Fluids – Viscoelasticity
	652	Shear Rate Dependence of Viscosity: Normal Stress Differences
	655	Extrudate Swelling (Die Swell)
	656	Melt Fracture
	657	Extensional Flow
	660	Effects of Molecular Structure on Melt Rheology
	663	Melt Flow in Blow Molding
	663	Flow in the Die

663	Parison Formation
664	Parison Swell
668	Parison Sag
669	Pleating
669	Parison Inflation
669	Stretch Blow Molding
670	Evaluation of Resin Processability
670	Introduction
670	Resin Selection Tests
673	Quality Control Tests
675	Instruments for the Measurement of Rheological Properties
675	Melt Indexers
676	Capillary Viscometers
677	Rotational Rheometers
678	Extensional Rheometers
678	References
680	Appendix: Addresses of Manufacturers and Their Agents

Chapter 18

TROUBLESHOOTING – PROCESSING PROBLEMS AND SOLUTIONS

D. V. Rosato

683	Troubleshooting – Processing Problems and Solutions
685	Detail Failure Analysis
685	Rocker Bottoms and Oval Necks
686	Defects Within the Blown Wall
686	Bubbles
686	Cold Spots
686	Poor Weld or Pinch-Off
686	Thinning
687	Tearing
687	Cutting
687	Indented Parting Lines
687	Poor Bottle Surface
688	Curtaining and Webbing
689	Blow-Outs
690	Parison Curl, Stringing, Hooking, Sag, and Length Consistency
691	Foreign Matter in the Melt
691	Look for Exterior Sources of Contamination First
691	Degraded Resin – Many Sources
692	Culprit – Man or Machine
693	Die Lines or Streaking in the Parison
693	Shrinkage
693	Causes of Stress Cracking
694	Environmental Stress Cracking
694	Solvent Stress Cracking
694	Mechanical Stress Cracking
695	Heat – Too Much or Too Little and What To Do About It

696	Instrument Recalibration
696	Surging
697	Sharkskin
699	Screw Wear Affects Performance
699	Inspection Rollers
699	Diameters
700	Depths
700	Concentricity and Straightness
700	Hardness
702	Finishing and Coating Thickness
702	Screw Manufacturing Tolerances
702	Barrel Inspection
702	Inside Diameter
702	Straightness and Concentricity
704	Barrel Hardness
704	Barrel Specifications
704	References
705	Appendix
705	Simplified Guide to Troubleshooting Polyethylene Bottles
707	Simplified Guide to Troubleshooting PE Dairy Gallon
708	Troubleshooting Guide for Extrusion Blow Molding
708	Part Defects
713	Parison Defects
716	Troubleshooting Guide for Injection Blow Molding
720	Troubleshooting Guide for Stretched Injection Blow Molding
722	Troubleshooting Guide for Auxiliary Equipment
722	Dryers
723	Granulators
724	Conveying Equipment
726	Metering/Proportioning/Feeding Equipment
727	Chillers/Mold Temperature Controllers
728	Dehumidifying Dryer Performance
729	Analyzing Stress Crack Failures in HDPE Bottles

Chapter 19

TESTING AND QUALITY CONTROL

D. V. Rosato

731	Testing and Quality Control
736	Testing Materials and Containers
738	Environmental Stress-Cracking Resistance
738	Impact Resistance
739	Permeation Resistance
739	Chemical Resistance
740	The Stress Factor
742	Characterizing Properties/Performance
742	Density

742	Morphology/Amorphous and Crystalline
742	Molecular Structure
743	Viscoelastic Properties
744	Rheology/Viscosity and Flow
746	Thermal Properties
746	Temperature Limits
747	Glass Transition
749	Thermal Conductivity
749	Heat Capacity
749	Coefficient of Linear Thermal Expansion
750	Temperature Dependence of Mechanical Properties
752	Diffusion/Transport Properties
752	Permeability
753	Melt Index/Density
756	Analytical, Thermoanalytical and Spectroscopy Tests
757	Liquid Chromatography (LC)
757	Gel Permeation Chromatography (GPC)
757	Gas Chromatography (GC)
757	Ion Chromatography (IC)
758	Thermogravimetric Analysis (TGA)
758	Differential Scanning Calorimeter (DSC)
761	Thermomechanical Analysis (TMA)
762	Dynamic Mechanical Analysis (DMA)
762	Infrared (IR) Spectroscopy
763	X-Ray Spectroscopy
763	Nuclear Magnetic Resonance (NMR) Spectroscopy
763	Mechanical Properties
764	Tensile Testing
764	Creep Data
765	Apparent Modulus of Elasticity
765	Fatigue
766	Microtoming/Optical Analysis
766	Electrical Tests
768	Chemical Tests
768	Predicting PET Bottle CO ₂ Shelf Life
771	Sagging Test
771	Container Collapse
772	Nondestructive Testing (NDT)
772	Radiography
772	Ultrasonics
773	Liquid Penetrants
773	Acoustics
773	Photoelastic Stress Analysis
774	Vision Inspection
776	Computer Image Processor
776	Quality Control Applications
778	Summary
779	Standardized Tests
780	Chemical Resistance (ASTM)
781	Analyze Failures
782	References

Chapter 20

STATISTICAL PROCESS/QUALITY CONTROL

<i>D. V. Rosato</i>	785	Statistical Process/Quality Control
	785	Overview in Statistical Control
	787	Gather and Analyze Data
	789	Process Control and Process Capability
	790	Control Charts
	791	Defect Prevention
	792	Understanding Modern Methods of Control
	793	Standard Deviations
	794	Frequency Distribution
	797	Control Chart
	799	Standard Deviation vs. Range
	800	A Successful SPC System
	801	Production Controls Process
	802	Direction
	802	SPC Step One – Raw Material
	802	Single Test Measurement
	802	Time Dependent Sampling
	802	SPC Step Two – Material Handling
	802	Drying
	802	Blending
	803	SPC Step Three – Injection Molding
	803	Weight
	803	Operator
	803	Primary Problem

Chapter 21

PRODUCTION PLANT DESIGN AND OPERATION

<i>A. C. Alberghini,</i>	809	Production Plant Design and Operation
<i>Sewell Plastics, Inc.</i>	809	Philosophy
	809	Business Focus
	809	Blow Molding Plant Operation
	810	Two-Step Blow Molding Operations
	811	One-Step Blow Molding Operations
	812	Plant Layout
	814	Systems Flowcharting

- 814 **Utilities**
815 **Air Compressors**

Chapter 22

BLOW MOLDING HIGHLY IRREGULAR SHAPED PARTS

- D. L. Peters* 817 **Blow Molding Highly Irregular Shaped Parts**
and 817 **Moving Mold Sections**
J. R. Rathman, 817 **Integral HDPE Handle Lid**
Phillips 66 Co. 819 **Integral Handle, Double Wall, Internally Threaded
HDPE Lid**
820 **Drum Integral Handling HDPE Ring**
822 **Multiple Parting Lines**
822 **Moving Sections**
823 **Fixing the Moving Sections**
824 **The New Technology**
826 **References**

Chapter 23

EVOLUTION OF AN IMAGINATIVE TECHNOLOGY – DOUBLE WALL BLOW MOLDING

- J. Rathgeber,* 827 **Evolution of an Imaginative Technology –
Double Wall Blow Molding**
Illinois Tool Works 827 **Overview**
830 **Industrial Double Wall Blow Molding Operations –
Current Developments**
832 **Mold Preparation and Other Considerations**
832 **Mold Preparation**
833 **Other Considerations**
833 **Resins, Blends, Alloys**
834 **Double Wall Blow Molded Products**

Chapter 24

TECHNICAL COST MODELING

- J. V. Busch* 839 **Technical Cost Modeling**
and F. R. Field III, 839 **Introduction to Technical Cost Modeling**
Massachusetts Institute 840 **Cost Analysis Method**
of Technology 840 **Material Times Two**
and IBIS Consulting 841 **Material Cost Plus Shoptime**
841 **Material Cost Plus Loaded Shoptime**
842 **Quotes**
842 **Summary**
842 **Technical Cost Analysis**

843	Variable Cost Elements
843	Material
843	Direct Labor
843	Energy
843	Fixed Costs
844	Main Machine Cost
845	Auxiliary Equipment Cost
845	Tooling Cost
846	Building Cost
846	Overhead Labor Cost
846	Maintenance Cost
847	Cost of Capital
848	Summary of Fixed and Variable Costs
848	Process Parameters
849	Summary of Technical Cost Analysis
850	Blow Molding Cost Model
851	Model Structure
852	Model Input
853	Component Specifications
855	Exogeneous Cost Factors
856	Process Related Factors
857	Model Output
859	Variable Cost Elements
860	Fixed Cost Elements
863	Summary of the Blow Molding Cost Model
864	Blow Molding Sensitivity Analysis
864	Sensitivity of Cost to Cycle Time
866	Sensitivity of Cost to Annual Production Volume
866	Summary
867	Comparative Cost Analysis – Case Study
868	Injection Molding
868	Structural Foam
869	Thermoforming
869	Blow Molding
869	Summary of Cost Comparisons
870	Summary

Chapter 25

EFFECTIVE PLANT MANAGEMENT FINANCIAL CONTROL

<i>T. R. Ozan,</i>	873	Effective Plant Management Financial Control
<i>Partner Ernst & Whinney</i>	873	Organizing for Control
<i>and</i>	874	Cost Control/Management
<i>D. V. Rosato</i>	876	Product Costing and Cost Control
	879	Profit Planning and Budgeting
	881	Materials Management Responsibility/Objective
	882	Ordering Processing and Production Scheduling
	883	Purchasing
	884	References

Chapter 26

PROFIT THROUGH TECHNOLOGICAL ADVANCES

<i>D. V. Rosato</i>	885	Profit Through Technological Advances
	885	Markets for Blow Molded Plastics
	889	Manufacturing Machine Census
	891	Large Blow Moldings
	892	450 gallon (1703 l) Tank
	893	Chemical Containers
	895	Small Bottles Offer Fast Growth
