

| | |
|--|-----------|
| Preface | xi |
| 1 ENERGY CONSUMPTION, CONSERVATION, AND RESOURCES | 1 |
| 1.1 Historical Patterns | 2 |
| 1.2 Potential for Energy Savings | 6 |
| 1.3 Alternative Energy Sources | 13 |
| 1.4 Summary | 18 |
| References | 18 |
| 2 ENERGY AUDITS AND ENERGY CONSERVATION | 20 |
| 2.1 Introduction: The Energy Audit Concept | 20 |
| 2.2 Elements of Energy Audits | 21 |
| 2.3 Presentation of Energy Audit Results | 43 |
| 2.4 Conclusions | 47 |
| References | 47 |
| Problems | 47 |
| 3 ECONOMIC ANALYSIS | 49 |
| 3.1 Economic Investment Analysis | 49 |
| 3.2 Utility Rate Structures | 70 |
| | v |

| | | |
|----------|--|------------|
| 3.3 | Summary | 81 |
| | Glossary | 81 |
| | References | 82 |
| | Problems | 82 |
| 4 | MANAGEMENT AND ORGANIZATION OF ENERGY CONSERVATION PROGRAMS | 86 |
| 4.1 | The Human Aspect of Energy Conservation | 86 |
| 4.2 | Elements of an Energy Management Program | 88 |
| 4.3 | Organization of Energy Conservation Programs | 105 |
| 4.4 | Summary | 110 |
| | References | 110 |
| 5 | ANALYSIS OF THERMAL-FLUID SYSTEMS | 112 |
| 5.1 | Thermodynamics | 112 |
| 5.2 | Heat Transfer | 137 |
| 5.3 | Fluid Mechanics | 146 |
| 5.4 | Summary | 154 |
| | Nomenclature | 154 |
| | References | 157 |
| | Problems | 157 |
| 6 | ENERGY CONSERVATION IN COMBUSTION SYSTEMS | 164 |
| 6.1 | Introduction | 164 |
| 6.2 | Boiler and Heater Performance | 165 |
| 6.3 | Principles of Combustion Analysis | 170 |
| 6.4 | Combustion Constants | 175 |
| 6.5 | Fuels and Their Properties | 181 |
| 6.6 | Combustion System Efficiency Calculations | 193 |
| 6.7 | Testing Combustion Equipment Efficiency | 212 |
| 6.8 | Efficiency Improvement of Combustion Systems | 219 |
| 6.9 | Conclusion | 239 |
| | References | 240 |
| | Problems | 240 |
| 7 | ENERGY CONSERVATION IN STEAM AND CONDENSATE SYSTEMS | 242 |
| 7.1 | Introduction | 242 |
| 7.2 | Thermal Properties of Steam | 245 |
| 7.3 | Estimating Steam Usage and Its Value | 255 |
| 7.4 | Steam Traps and Their Application | 267 |
| 7.5 | Condensate Recovery | 282 |

| | | |
|-----------|--|------------|
| 7.6 | Summary | 296 |
| | References | 296 |
| | Problems | 297 |
| 8 | HEAT EXCHANGERS | 300 |
| 8.1 | Classification of Heat Exchangers | 301 |
| 8.2 | The NTU- ϵ Design Method | 316 |
| 8.3 | Fouling | 319 |
| 8.4 | Heat Transfer Augmentation | 323 |
| 8.5 | Summary | 332 |
| | Nomenclature | 333 |
| | References | 334 |
| | Problems | 335 |
| 9 | HEAT RECOVERY | 338 |
| 9.1 | Constraints on Heat Recovery | 339 |
| 9.2 | Waste Heat Classification | 347 |
| 9.3 | Practical Limitations on Heat Recovery | 349 |
| 9.4 | Waste Heat Surveys | 358 |
| 9.5 | Heat Recovery Equipment | 362 |
| 9.6 | Energy Cascade Systems | 381 |
| 9.7 | Summary | 382 |
| | References | 382 |
| | Problems | 383 |
| 10 | INDUSTRIAL INSULATION | 387 |
| 10.1 | Physics of Thermal Insulation | 387 |
| 10.2 | Properties and Characteristics of Insulation | 392 |
| 10.3 | Insulation Selection | 396 |
| 10.4 | Economical Thickness of Insulation | 403 |
| 10.5 | Summary | 408 |
| | Glossary | 409 |
| | References | 409 |
| | Problems | 410 |
| 11 | ENERGY CONSERVATION IN INDUSTRIAL BUILDINGS | 413 |
| 11.1 | Energy Loads in Buildings | 414 |
| 11.2 | Reduction in Plant Energy Usage | 417 |
| 11.3 | Lighting | 425 |
| 11.4 | Compressed Air | 433 |
| 11.5 | Summary | 437 |
| | References | 438 |
| | Problems | 439 |

| | | |
|-------------------|---|------------|
| 12 | INDUSTRIAL COGENERATION | 442 |
| 12.1 | Introduction: The Cogeneration Concept | 442 |
| 12.2 | Cogeneration Alternatives | 445 |
| 12.3 | Technical and Economic Evaluation of Cogeneration Systems | 453 |
| 12.4 | Other Considerations in Cogeneration | 468 |
| 12.5 | Conclusion | 469 |
| | References | 469 |
| 13 | POWER CIRCUITS AND ELECTRICAL MACHINERY | 471 |
| 13.1 | Introduction | 471 |
| 13.2 | Fundamental Characteristics of Power Circuits | 471 |
| 13.3 | AC Circuit Analysis | 476 |
| 13.4 | Power in AC Circuits | 481 |
| 13.5 | Three-Phase Circuits | 487 |
| 13.6 | Power Circuit Components and Energy Conversion Devices | 493 |
| | Nomenclature | 513 |
| | References | 514 |
| | Problems | 514 |
| 14 | ELECTRICAL ENERGY CONSERVATION | 516 |
| 14.1 | Sources of Losses | 516 |
| 14.2 | Variable-Speed Drives | 530 |
| 14.3 | Demand Control | 534 |
| | Nomenclature | 540 |
| | References | 541 |
| | Problems | 541 |
| 15 | INDUSTRIAL ENERGY USE PROFILES | 544 |
| 15.1 | Introduction | 544 |
| 15.2 | The Foods Industry | 546 |
| 15.3 | Primary Metals | 552 |
| 15.4 | The Paper Industry | 561 |
| 15.5 | The Chemicals Industry | 569 |
| 15.6 | Petroleum Refining | 571 |
| 15.7 | The Cement Industry | 584 |
| 15.8 | Summary | 591 |
| | References | 591 |
| APPENDIXES | | |
| A | Some Conversion Factors | 593 |
| B | Thermodynamic Properties | 597 |
| C | Thermochemical Properties | 622 |

| | | |
|-------|--|-----|
| D | Thermophysical Properties of Solids | 625 |
| E | Thermophysical Properties of Saturated Liquids | 634 |
| F | Thermophysical Properties of Gases | 637 |
| G | Radiative Properties | 641 |
| H | Electrical Characteristics and Properties | 645 |
| I | Standard Pipe and Tubing Sizes | 655 |
| Index | | 659 |
