LIST OF TABLES

1	INTRODUCTION	
1.1	An introduction to the problem	1
1.2	Outline of the book	3
2	THE HISTORY OF TRANSFER PAYMENTS FOR THE OLD	
2.1	Introduction	8
2.2	The history of old-age transfers before government intervention	8
2.2.1	Introduction	8
2.2.2	Agricultural societies as insurance systems	9
2.2.3	The industrial revolution: breakdown of voluntary transfer systems	11
2.2.4	Social assistance during the industrial revolution	13
2.2.5	General factors explaining the rise of public pension schemes	14
2.3	The history of three public pension plans compared	16
2.3.1	Introduction	16
2.3.2	Germany	16
2.3.3	The Netherlands	20
2.3.4	The United States of America (US)	25
2.3.5	The history of the schemes compared	31
2.4	What can we learn from history?	34
2.5	Summary	36
3	THE CASE FOR GOVERNMENT INTERVENTION	
3.1	Introduction	37
3.2	Market failure	38
3.3	Paternalism	42
3.4	Redistribution	45
3.4.1	Introduction	45
3.4.2	Intragenerational redistribution	46
3.4.3	Intergenerational redistribution	47
3.5	Administrative efficiency	50

3.6	Political and economic arguments compared	52
3.7	Summary	54
4	THE CHOICE OF FINANCING METHOD: ECONOMIC MOTIVES	
4.1	Introduction	56
4.2	Economic considerations	56
4.3	The generalized Aaron-condition	61
4.4	Conversion policies	63
4.4.1	Introduction	63
4.4.2	Conversion policy in a closed economy	65
4.4.3	Conversion policies in a small open economy	66
4.4.4	Qualifications	72
4.5	Summary	73
5	THE CHOICE OF FINANCING METHOD: POLITICAL MOTIVES	
5.1	Introduction	75
5.2	Decision-making in a direct democracy	76
5.3	A simple decision-making model	79
5.3.1	Introduction	79
5.3.2	Decision-making on the financing system	79
5.3.3	Decision-making on the benefit level	82
5.4	An application to the Netherlands	83
5.5	Generalizations and other models	89
5.5.1	Introduction	89
5.5.2	Imperfections of the capital market	90
5.5.3	Demand for other public goods	91
5.5.4	Hu's model of uncertainty	94
5.5.5	Decision-making as a dynamic game between generations	96
5.6	Summary	98
6	TAX-TRANSFER VIEW, ALTRUISM AND POLITICAL POWER	
6.1	Introduction	101
6.2	The tax-transfer versus the insurance vision	102
6.3	Altruism and the public pension scheme	104
6.3.1	Introduction	104
6.3.2	The premium rate	106

6.3.3	The Aaron-condition	110
6.3.4	The steady-state	112
6.3.5	Concluding remarks	114
6.4	Collective decision-making and public pensions	114
6.4.1	Introduction	114
6.4.2	Public pensions in a representative democracy	115
6.4.3	A model of representative democracy	118
6.5	Altruism and imperfect capital markets	121
6.5.1	Introduction	121
6.5.2	The premium rate	122
6.5.3	The steady-state	128
6.6	Summary	133
Appendix 6A	Altruism and the Aaron-condition (the non-cooperative case)	137
Appendix 6B	Stackelberg-behavior and future positive savings	139
7	UNCERTAINTY AND REDISTRIBUTION	
7.1	Introduction	142
7.2	Financing method and redistribution	143
7.2.1	The mechanism of redistribution	143
7.2.2	The independence of financing method and redistribution	146
7.3	Risk aversion and public pension plans	148
7.3.1	Introduction	148
7.3.2	Intragenerational redistribution	149
7.3.3	Intergenerational redistribution	154
7.3.4	Fixed-benefit rate versus fixed-premium rate	158
7.3.5	Constitutional and parliamentary decision-making	160
7.4	Summary	161
Appendix 7A	Redistribution and financing method: Z generations	164
Appendix 7B	Intragenerational redistribution	172
Appendix 7C	Intergenerational redistribution	173
8	THE RISE AND EVOLUTION OF PAYG-SYSTEMS	
8.1	Introduction	178
8.2	Survey of models	179

8.3	A decision-making model with uncertainty and constant Aaron-variable	182
8.3.1	Introduction	182
8.3.2	Expectations with regard to the behavior of future generations	183
8.3.3	Decision-making with uncertainty about future behavior	185
8.3.4	Convergence to the steady-state	191
8.4	Public pension plans under a non-constant Aaron-variable	193
8.4.1	Introduction	193
8.4.2	Model I: 'altruism by habit' as an explanatory variable	194
8.4.3	Model II: altruism or political power as explanatory variables	199
8.5	The future of the PAYG-system	204
8.5.1	Introduction	204
8.5.2	Pessimistic expectations	205
8.5.3	Optimistic expectations	207
8.5.4	Concluding remarks	209
8.6	Discussion and summary	210
9	PUBLIC PENSIONS IN A SMALL OPEN ECONOMY	
9.1	Introduction	213
9.2	The model	214
9.3	A simulation: consumers are certain of the future of the PAYG-scheme	218
9.4	Conversion policies	223
9.5	Decision-making under uncertainty	227
9.6	Summary	231
10	AN EVALUATION	
10.1	Introduction	233
10.2	The facts to be explained	233
10.3	Explanations offered in the literature on public pension schemes	234
10.4	The model used	236

10.5 The results obtained	238
10.6 Will PAYG-financed public pension schemes continue to exist?	241
