

Table of Contents

Preface	VI
Acknowledgement	VII
Surveys and Tutorials	
<i>K. Kempf</i> Practical Applications of Artificial Intelligence in Manufacturing	1
<i>B. Neumann</i> Configuration Expert Systems: a Case Study and Tutorial	27
<i>J.-P. Müller</i> Planning for Artificial Intelligence Based Robots	69
Research Projects and Applications	
Autonomous Robots	
<i>K. Konolige</i> Integrating Perception, Action, and Intention: the ICA Project	95
<i>J.-P. Müller</i> MARS: Mobile Autonomous Robot Systems	103
Flexible Manufacturing	
<i>C. V. Rusca</i> The IRMA Project: Towards a Robust Parallel Logic Programming Environment in Robotics	113
<i>R. R. Bless / M. A. Müller</i> Automated Robotic Assembly	129
<i>E. Gmür / H. Bunke</i> PHI-1: a Robot Vision System Based on CAD-Modells	145
Configuration Expert Systems	
<i>P. Rixhon</i> Integrated Configuration Systems: the „Mehrstrom Experience“	165
Subject Index	177
Reference Index	181
Author's Addresses	183
About the Editor	185
