

Contents

List of Contributors	xvii
Chapter 1. Physiology of Zinc: General Aspects	
<i>M. J. Jackson</i>	1
Introduction.....	1
Distribution of Zinc within the Body.....	2
Factors Affecting Body Distribution of Zinc.....	4
Whole-Body Zinc Homeostasis.....	8
Transport of Zinc within the Body	10
Chapter 2. An Introduction to the Biochemistry of Zinc	
<i>R. J. P. Williams</i>	15
Introduction.....	15
Availability of Metal Ions	18
Types of Protein Associated with Zinc	19
The Number of Binding Ligands to Zinc	22
Zinc as a Catalytic Group	22
Why are there Zinc Enzymes?	23
Why have Zinc as a Cross-link?	24
Use of Zinc in Biology Space and Time	24
Export of Zinc Proteins	27
Zinc Concentrations and Pumps.....	27
Zinc and Hormonal (Trigger) Activities.....	28
Joint Role for Zinc and Copper Enzymes?.....	29
Zinc in Cross-linking of Extracellular Soft Matrices	29
Zinc in Solid-State Devices.....	30
Conclusion.....	31
Chapter 3. Intestinal Absorption of Zinc	
<i>B. Lönnerdal</i>	33
Introduction.....	33
Postulated Mechanisms of Zinc Absorption – “Zinc Carriers”	33
Factors Regulating Zinc Absorption.....	38
Conclusions	52

Chapter 4. Promoters and Antagonists of Zinc Absorption	
<i>Brittmarie Sandström and B. Lönnerdal</i>	57
Methodological Considerations	57
Interacting Minerals and Trace Elements	61
Organic Substances Modifying Absorption	64
Nutrient Interactions	71
Synthetic Chelating Agents and Drugs.....	73
Concluding Remarks	73
Chapter 5. Systemic Transport of Zinc	
<i>R. J. Cousins</i>	79
Zinc in the Systemic Circulation.....	79
Cellular Uptake from the Systemic Circulation	85
Chapter 6. Systemic Interactions of Zinc	
<i>I. Bremner and P. M. May</i>	95
Introduction.....	95
Binding of Zinc to Low-Molecular-Weight Ligands.....	95
Indirect Effects.....	99
The Relationship between Binding in the High- and Low- Molecular-Weight Fractions	99
Binding of Zinc to High-Molecular-Weight Ligands	100
Zinc-Vitamin Interactions	105
Chapter 7. Biochemistry of Zinc in Cell Division and Tissue Growth	
<i>J. K. Chesters</i>	109
Animal and Tissue Growth.....	109
Mechanisms	113
Conclusion.....	116
Chapter 8. Zinc in Cell Division and Tissue Growth: Physiological Aspects	
<i>Barbara E. Golden</i>	119
Introduction.....	119
Body Zinc Store	121
Tissue Growth and Composition.....	122
Conclusion.....	127
Chapter 9. Biochemical Pathologies of Zinc Deficiency	
<i>M. S. Clegg, C. L. Keen and Lucille S. Hurley</i>	129
Introduction.....	129
Histological Lesions of Zinc Deficiency	130
Cell Division and DNA Synthesis	131
Gene Expression	134

RNA and Protein Synthesis.....	136
Other Zinc Metalloenzymes.....	140
Zinc and Membrane Stability.....	140
Chapter 10. Zinc and Iron in Free Radical Pathology and Cellular Control	
<i>R. L. Willson</i>	147
Free Radicals and Disease.....	147
What are Free Radicals?.....	149
How are Biological Free Radicals Formed?.....	149
What can Free Radicals Do?.....	150
Protection Against Free Radical Damage.....	153
Zinc and Metallothionein in Protection against Free Radical Damage	153
Zinc and Superoxide Dismutase in Protection against Free Radical Damage	154
“Normal” Zinc Levels: Natural Protection against Deleterious Iron–Thiol Interactions.....	156
Zinc, Thiols and Iron in Cell Control and Carcinogenesis.....	158
“Abnormal” Zinc Levels: Metabolic Disturbances and Cell Sensitivity.....	161
Zinc in Free-Radical-Related Disorders: Is there any Evidence?.....	162
Concluding Remarks	166
Chapter 11. Zinc Status and Food Intake	
<i>B. L. O’Dell and P. G. Reeves</i>	173
Introduction.....	173
Zinc Status, Growth Rate and Food Intake.....	173
Behavioural Patterns of Food Intake in Zinc Deprivation.....	175
Possible Mechanisms by which Zinc Status Affects Food Intake.....	177
Future Research Needs.....	178
Conclusions	179
Chapter 12. Zinc and Reproduction: Effects of Deficiency on Foetal and Postnatal Development	
<i>C. L. Keen and Lucille S. Hurley</i>	183
Introduction.....	183
Congenital Malformations in Zinc-Deficient Mammals	183
Marginal Deficiencies of Zinc During Development in Experimental Animals	193
Disease-Induced Deficiencies of Zinc During Pregnancy.....	203
Zinc Deficiency in Human Pregnancy.....	206
Conclusions	211
Chapter 13. A Note on Zinc and Immunocompetence	
<i>R. A. Good</i>	221

Chapter 14. Zinc and Behaviour	
<i>Sandra E. File</i>	225
Introduction.....	225
Effects of Zinc Deficiency on Aggressive Behaviour, Stress, Open-Field Behaviour and Conditioned Emotional Response.....	226
Avoidance Learning.....	229
Maze Learning.....	230
Cognitive Performance (Miscellaneous Tasks).....	231
Conclusions.....	232
Chapter 15. Neurobiology of Zinc	
<i>I. E. Dreosti</i>	235
Introduction.....	235
Zinc and Brain Development.....	237
Zinc and Brain Function.....	238
Zinc Metabolism in the Brain.....	241
Onset of Zinc Deficiency in the Brain.....	242
Chapter 16. Zinc in Endocrine Function	
<i>G. E. Bunce</i>	249
Introduction.....	249
Gonadotropins, Sex Hormones and Zinc.....	249
Insulin and Zinc.....	253
Summary.....	255
Chapter 17. Severe Zinc Deficiency	
<i>P. J. Aggett</i>	259
Clinical Features.....	259
Clinical Situations in which Severe Zinc Deficiency has been Encountered.....	266
Deranged Zinc Metabolism in Renal Disease.....	273
Treatment of Zinc Deficiency.....	274
Chapter 18. Mild Zinc Deficiency in Human Subjects	
<i>K. M. Hambidge</i>	281
Introduction.....	281
Theoretical Considerations.....	282
Evidence for the Occurrence of Mild Deficiency of Zinc in Man.....	283
Circumstances in which Mild Zinc Deficiency has been Reported.....	284
Clinical Significance.....	289
Conclusions and Future Research Needs.....	292
Chapter 19. Putative Therapeutic Roles for Zinc	
<i>N. W. Solomons, M. Ruz and C. Castillo-Duran</i>	297
Introduction.....	297

Methodology of Inquiry and Review	297
Survey of Putative Roles for Oral Zinc Therapy	299
Conclusions and Recommendations.....	314
Chapter 20. The Diagnosis of Zinc Deficiency	
<i>M. H. N. Golden</i>	323
Introduction.....	323
Zinc Deficiency – The Diagnostic Problem.....	324
Conclusion.....	332
Chapter 21. Human Zinc Requirements	
<i>Janet C. King and Judith R. Turnlund</i>	335
Introduction.....	335
Basic Concepts.....	335
Adaptation of Zinc Requirements.....	337
True “Physiological” Requirement for Zinc.....	339
Recommended Dietary Intakes of Zinc	346
Summary.....	348
Chapter 22. Dietary Pattern and Zinc Supply	
<i>Brittmarie Sandström</i>	351
Introduction.....	351
Zinc Content of Human Food Sources	351
Zinc Intake and Zinc Status	354
Diet Composition and the Absorption and Utilization of Zinc	355
Dietary Pattern and Zinc Supply	357
Needs for Future Research.....	360
Chapter 23. Zinc Excess	
<i>M. R. S. Fox</i>	365
Background	365
Effects of Excess Zinc in Animals	365
Effects of Excess Zinc in Humans	366
Unresolved Problems.....	369
Chapter 24. The Biological Significance of Zinc for Man: Problems and Prospects	
<i>C. F. Mills</i>	371
The Functional Roles of Zinc	371
Clinical Manifestation of Zinc Deficiency.....	373
Biochemical Criteria of Zinc Status.....	374
Zinc Utilization and Zinc Requirements	375
Zinc “Availability” from Foods	378
Conclusion.....	379
Subject Index	382
