

Table of Contents

1	Introduction	1
1.1	Perception, Surfaces, and Range Images	1
1.2	Low-Level vs. High-Level Processing	5
1.3	Data-Driven Range Image Analysis	6
1.4	Qualitative Algorithm Description	10
1.5	Overview	13
1.6	Literature Review	15
2	Object Recognition and Segmentation	34
2.1	Three-Dimensional Object Recognition	34
2.2	Mathematical Recognition Problem	37
2.3	Recognition System Components	43
2.4	Capabilities of an Ideal System	46
2.5	Segmentation into Surface Primitives	47
2.6	Mathematical Segmentation Problem	48
2.7	Segmentation Errors	56
2.8	Range Image Segmentation and Recognition	58
2.9	Summary	62
3	Surface Curvature Characteristics	63
3.1	Visible Invariance	63
3.2	Differential Geometry Review	65
3.3	Surface Curvature	76
3.4	Graph Surface Curvature from Derivatives	85
3.5	Estimating Derivatives of Digital Surfaces	88
3.6	Other Surface Characteristics	92
3.7	Summary	95
3.8	Experimental Surface Characterization Results	96
4	From Surface Labels to Surface Primitives	116
4.1	Problems with HK-Sign Maps	117
4.2	Segmentation Algorithm Philosophy	121
4.3	Segmentation Algorithm Description	124
4.4	Approximating Function Selection	129

4.5	Noise Estimation and Threshold Specification	134
4.6	Seed Region Extraction	143
4.7	Iterative Variable Order Surface Fitting	147
4.8	Region Growing	153
4.9	Hemisphere Surface Example	160
4.10	Termination Criteria and Convergence	161
4.11	Surface Acceptance and Rejection Decisions	169
4.12	Summary	175
5	Description Combination and Region Merging	176
5.1	Region Description Combination	177
5.2	Region Adjacency Graphs	180
5.3	Region Merging	181
5.4	Final Region Segmentation Output	189
6	Region Edges	190
6.1	Edge Detection and Dimensionality	191
6.2	Edge Algorithm Description	195
6.3	Edge Definition	196
6.4	Edge Characterization	198
6.5	Approximating Function Selection	199
6.6	Error Tolerance Specification	201
6.7	Seed Interval Extraction	201
6.8	Iterative Variable Order Edge Fitting	201
6.9	Edge Interval Growing	204
6.10	Termination Criteria	206
6.11	Edge Interval Acceptance	207
6.12	Interval Merging and Interval Connections	207
6.13	Summary	208
7	Experimental Results	210
7.1	Real Range Images	212
7.2	Synthetic Range Images	219
7.3	Intensity Images	222
7.4	Segmentation Results	226
8	Conclusions and Future Directions	289
8.1	Range Image Understanding	291
8.2	Algorithm Properties	292
8.3	Final Data Description	293
8.4	Future Directions	294
A	Surface Curvature Invariance Theorems	298
B	Discrete Intrinsic Properties	302

C	Least Squares Surface Fitting	305
D	Equal Angle Increment Sampling	311
E	A Metric Space of Image Regions	317
F	Software Implementation	320
G	Iterative Region Growing Algorithm	325
