	<b>List of Contributors</b> .....	XV
<b>I</b>	<b>Tissue Specific Gene Expression: A Summary</b> .....	1
	E.-L. WINNACKER	
I.1	Introduction .....	1
I.2	A General Summary of Eukaryotic Transcriptional Activation .....	1
I.3	Some Selected Methods for the Analysis of Eukaryotic Gene Control ..	4
I.3.1	Transgenic Animals .....	4
I.3.2	DNA/Protein Interactions .....	5
I.3.3	Purification of DNA-binding Proteins and Cloning of Corresponding Genes .....	7
I.3.4	Functional Studies of Transcription Factors .....	8
I.4	Future Developments .....	9
	References .....	10
<b>1</b>	<b>Chromatin Remodeling During Immunoglobulin Gene Activation</b> .....	13
	W. T. GARRARD	
1.1	Introduction .....	13
1.1.1	The Biology of B Cell Differentiation .....	13
1.1.2	The Mouse $\kappa$ Immunoglobulin Light Chain Gene Locus .....	13
1.1.3	Active and Inactive Chromatin Structure and Composition .....	15
1.2	Experimental Results .....	16
1.2.1	Nuclear Proteins Partition Nonrandomly During Chromatin Fractionation .....	16
1.2.2	Immunoglobulin Gene Sequences Partition Nonrandomly During Chromatin Fractionation .....	16
1.2.3	The Entire Active $\kappa$ Immunoglobulin Gene Locus Occupies a Common Subnuclear Compartment .....	19

1.2.4	A Disrupted Nucleosomal Chromatin Structure Spans the Entire Active $\kappa$ Immunoglobulin Gene Locus .....	20
1.2.5	Chromatin Remodeling is Dependent on Differentiation but Independent of Active Transcription .....	21
1.2.6	Unusual Chromatin Phenotype in the Active $\kappa$ Immunoglobulin Gene Locus .....	23
1.2.7	Chromosomal Loop Organization of the $\kappa$ Immunoglobulin Gene Locus .....	25
1.3	Concluding Remarks and Prospectus .....	27
1.4	Summary .....	29
	Acknowledgements .....	29
	References .....	29
<b>2</b>	<b>Octamer Transcription Factors Mediate B-Cell Specific Expression of Immunoglobulin Heavy Chain Genes .....</b>	<b>33</b>
	<b>E. SCHREIBER, M.M. MÜLLER, W. SCHAFFNER and P. MATTHIAS</b>	
2.1	Introduction .....	33
2.2	B-Cell Specific Expression of the Immunoglobulin Heavy Chain Gene ..	34
2.3	Role of the IgH Enhancer for Ig Transcription .....	34
2.4	Composition of the Mouse IgH Enhancer .....	36
2.5	The V <sub>H</sub> Promoter: Role of the Octamer Motif .....	39
2.6	The Octamer-Paradox .....	40
2.7	Octamer Binding Proteins .....	40
2.8	Molecular Cloning of a Gene Coding for the Lymphoid Specific Octamer Binding Protein OTF-2A .....	44
2.9	OTF-2 is a Homeobox Protein .....	44
2.10	Functional Expression of the OTF-2 Gene in non B-Cells .....	45
2.11	Is OTF-1 a Multi-purpose Factor and OTF-2A a Single-purpose Factor?	47
2.12	Concerted Action of Promoter and Enhancer Bound Transcription Factors Directs Expression of Immunoglobulin Heavy Chain Genes in B-Cells .....	49
2.13	What is the Nature of Synergism? .....	50
2.14	Future Perspectives .....	50
	Acknowledgements .....	51
	References .....	51

<b>3</b>	<b>Positive and Negative Factors Contribute to the Tissue-specific Activities of the Immunoglobulin Heavy-chain and Polyoma-virus Enhancers</b> . . . .	<b>55</b>
	B. WASYLYK, J. L. IMLER, J. PEREZ-MUTUL, E. UGARTE, C. WASYLYK, B. CHATTON, M. MACCHI and C. SCHATZ	
3.1	Introduction . . . . .	55
3.2	IgH Enhancer . . . . .	55
3.2.1	Introduction . . . . .	55
3.2.2	Identification of Proteins which Interact with the IgH Enhancer . . . . .	57
3.2.3	Motifs E1-4, C1-3, OC and E Contribute to Enhancer Activity in Myeloma Cells . . . . .	57
3.2.4	Interactions Between Transcription Factors are Required for IgH Enhancer Activity . . . . .	61
3.2.5	Some of the IgH Enhancer Motifs are Functional in Fibroblasts . . . . .	62
3.3	The Polyoma-virus Enhancer . . . . .	62
3.3.1	Introduction . . . . .	62
3.3.2	The $\alpha$ -Domain Interacts with two Cell-specific Factors, PEA 1 and PEA 2 . . . . .	63
3.3.3	PEA 2 is a Labile Repressor of a $\alpha$ -Domain Activity in Fibroblasts . . . . .	65
3.3.4	PEA 1 is a Positive Inducible Transcription Factor . . . . .	68
3.4	Conclusions . . . . .	69
	Acknowledgements . . . . .	70
	References . . . . .	70
<b>4</b>	<b>Studies on the Immunoglobulin <math>\kappa</math> Gene Promoter</b> . . . . .	<b>73</b>
	R. MOCIKAT, F. G. FALKNER and H. G. ZACHAU	
4.1	Introduction . . . . .	73
4.2	Expression of a $\kappa$ Gene in Monkey Cells Under the Control of the SV40 Promoter . . . . .	73
4.3	An Immunoglobulin $\kappa$ Gene is Correctly Transcribed from its own Promoter After Transfer into Lymphoid Cells . . . . .	75
4.4	Conserved Sequence Elements in the $\kappa$ Gene Promoter . . . . .	75
4.5	Tissue Specific Initiation of $\kappa$ Gene Transcription . . . . .	77
4.6	The Decamer Element is Recognized by Nuclear Proteins . . . . .	78
4.7	Cell-type Specific and Ubiquitous dc Binding Proteins . . . . .	81
4.8	An ACCC-containing Binding Site is Located in the Neighbourhood of the Decanucleotide of Several $\kappa$ Gene Promoters . . . . .	82

4.9	Concluding Remarks .....	83
	Acknowledgements .....	84
	References .....	84
5	<b>Regulation of MHC Class II Gene Expression: X, Y and Other Letters of the Alphabet</b> .....	87
	C. BENOIST and D. MATHIS	
5.1	Introduction .....	87
5.2	The E <sub>α</sub> <sup>k</sup> Gene .....	89
5.3	The Promoter-proximal Stretch .....	90
5.3.1	The X and Y Boxes .....	91
5.3.2	Other Motifs .....	93
5.3.3	How Does the Promoter-proximal Stretch Operate? .....	93
5.4	The Promoter-distal Stretch .....	94
5.4.1	Functional Importance .....	94
5.4.2	The X' and Y' Boxes .....	94
5.4.3	The W Sequence .....	95
5.4.4	Other Motifs .....	97
5.4.5	How Does the Promoter-distal Stretch Work? .....	97
5.5	A Model .....	98
	Acknowledgements .....	99
	References .....	99
6	<b><i>cis</i> and <i>trans</i> Determinants of Chicken β-Globin Transcription</b> .....	103
	J. L. GALLARDA, Z. YANG, D. H. ENDEAN, K. P. FOLEY and J. D. ENGEL	
6.1	Introduction .....	103
6.2	Genetics of β-Globin Transcriptional Regulation .....	104
6.3	Biochemistry of β-Globin Enhancer Regulation .....	105
6.4	Biochemistry of the β-Globin Promoter .....	107
6.5	A General Strategy for Cloning <i>trans</i> -acting Factor Genes .....	109
6.5.1	Reverse RIA Model Studies .....	110
6.5.2	<i>in vitro</i> Immunization Model Studies .....	113
6.6	Monoclonal Antibodies to β-Globin Enhancer Binding Proteins .....	113

6.7	Summary and Conclusions .....	117
	Acknowledgements .....	120
	References .....	120
7	<b>The Regulation of the Human <math>\beta</math>-Globin Domain</b> .....	123
	F. GROSVELD, M. ANTONIOU, G. BLOM VAN ASSENDELFT, F. CATALA, P. COLLIS, E. DE BOER, N. DILLON, D. GREAVES, O. HANSCOMBE, J. HURST, M. LINDENBAUM, E. SPANOPOULOU, D. TALBOT and L. WALL	
7.1	Introduction .....	123
7.2	The Structure and Genetic Defects of the Human $\beta$ -Globulin Gene Family .....	124
7.3	Regulatory Regions Flanking the Human $\beta$ -Globin Genes .....	124
7.4	The Promoter of the Human $\gamma$ -Globin Gene .....	129
7.5	The Dominant Control Region (DCR) Flanking the $\beta$ -Globin Gene Domain .....	130
7.6	The Role of the DCR and the Regulation of Stage-specific Expression .	132
7.7	Conclusions .....	133
	Acknowledgements .....	134
	References .....	134
8	<b>Tissue Specific Expression of the Growth Hormone Gene</b> .....	137
	M. KARIN	
8.1	Introduction .....	137
8.2	Differentiation of the Somatotropic Lineage .....	138
8.3	Cell-type Specific Expression .....	139
8.4	Extinction of GH Expression .....	140
8.5	Interactions Between GHF-1 and Hormone Responsive Factors .....	141
8.6	Purification and Characterization of GHF-1 .....	143
8.7	Structure and Expression of GHF-1 .....	144
8.8	Summary – A Model for GH Gene Activation .....	145
	Acknowledgements .....	146
	References .....	146

<b>9</b>	<b><i>cis</i>-Elements and <i>trans</i>-acting Factors Involved in the Tissue-specific Expression of the Human <math>\alpha</math>1-Antitrypsin Gene</b> .....	<b>149</b>
	P. MONACI, A. NICOSIA and R. CORTESE	
9.1	Introduction .....	149
9.2	Alternative Cell-specific Promoters Direct $\alpha$ 1 AT Gene Expression .....	149
9.3	The $\alpha$ 1 AT Gene is Efficiently Expressed and Correctly Regulated in Transgenic Mice .....	150
9.4	Multiple <i>cis</i> -acting elements are Responsible for the Tissue-specific Expression of $\alpha$ 1 AT Promoter in Human Hepatoma Cell Lines .....	151
9.5	The Same <i>cis</i> -acting Elements are Responsible for $\alpha$ 1 AT Promoter Activity <i>in vivo</i> and <i>in vitro</i> .....	152
9.6	Transcription from the $\alpha$ 1 AT Promoter in Liver Nuclear Extract is Dependent on the Presence of Liver-specific Transcriptional Factors ...	155
9.7	LF-A1 and LF-B1 Play a Role in the Liver-specific Expression of Several Genes .....	156
9.8	Is $\alpha$ 1 AT Transcription also Negatively Controlled? .....	158
9.9	Modular Structure of Liver-specific Promoters .....	160
9.10	The Organization of the Mouse $\alpha$ 1-Antitrypsin Promoter .....	160
9.11	Conclusions .....	161
	Acknowledgements .....	162
	References .....	162
<b>10</b>	<b>The Regulation of Albumin Gene Expression in Mammals</b> .....	<b>165</b>
	P. HERBOMEL and M. YANIV	
10.1	Introduction .....	165
10.2	Temporal and Spatial Distribution of Albumin and AFP Expression in Rodents .....	166
10.2.1	Liver .....	166
10.2.2	Yolk Sac .....	167
10.2.3	Other Organs .....	167
10.3	Chromatin Structure of the Albumin/AFP Locus .....	168
10.3.1	General Sensitivity of the Albumin/AFP Locus .....	168
10.3.2	Hypersensitive Sites at the AFP Locus .....	168
10.3.3	Hypersensitive Sites at the Albumin Locus .....	169

10.4	Transgenic Mice .....	169
10.5	Hepatoma Cell Lines and Their Genetics .....	170
10.5.1	Dedifferentiation of Hepatocytes in Culture .....	170
10.5.2	The H4II Family .....	171
10.5.3	The Extinction Phenomenon .....	172
10.5.4	Effect of Ploidy: The Reexpression/Activation Phenomenon .....	173
10.5.5	Transcription and State of the Albumin Gene in the H4II Family .....	173
10.6	The Albumin Promoter: Studies in Cell Culture .....	174
10.6.1	A Short Albumin 5' Flanking Region is an Efficient and Tissue Specific Promoter .....	174
10.6.2	Activity of a Transfected Albumin Promoter in Hepatoma Cell Lines of Other Origins .....	175
10.6.3	Activation of the Albumin Promoter by the SV40 Enhancer .....	176
10.6.4	Functional Anatomy of the Albumin Promoter .....	176
10.7	The Albumin Promoter: <i>in vitro</i> Studies .....	179
10.7.1	Tissue Specific <i>in vitro</i> Transcription .....	179
10.7.2	Correlation of <i>in vivo</i> and <i>in vitro</i> Binding Studies with Nuclear Factors .....	179
10.7.3	Identity of the Factors Involved .....	180
10.7.4	APF/HNF-1 Versus V-APF/V-HNF-1 .....	181
10.8	Addendum .....	182
	Acknowledgements .....	183
