

Contents

1	Introduction	1
2	Alcohol Metabolism: Biochemistry and Genetic Variations	6
2.1	Absorption, Body Distribution, and Elimination of Ethanol	6
2.1.1	Absorption	6
2.1.2	Tissue Distribution	8
2.1.3	Excretion and Elimination	9
2.2	Biochemical Pathways of Ethanol Degradation	11
2.2.1	Microsomal Ethanol-Oxidizing System	12
2.2.2	Catalase	12
2.2.3	Alcohol Dehydrogenase (ADH)	13
2.2.4	Aldehyde Dehydrogenase (ALDH)	23
3	Alcohol-Metabolizing Enzymes and Acute Reactions to Alcohol	52
3.1	Ethanol- and Acetaldehyde-Mediated Acute Response to Alcohol	52
3.2	Ethnic Differences in Acute Response to Alcohol ...	53
3.2.1	Familial Resemblances in Flushing Response	55
3.3	Mechanism of Alcohol Sensitivity	55
3.3.1	Relationship to Ethanol- and Acetaldehyde-Oxidizing Capacity	55
3.3.2	Alcohol Absorption Rate	56
3.3.3	Alcohol Metabolism and Clearance Rate	57
3.3.4	Variation in ADH	57
3.3.5	Variation in ALDH	58

3.3.6	Prostaglandin- and Histamine-Mediated Flushing Reactions to Alcohol	59
3.4	Racial-Ethnic Patterns of Alcohol Abuse and Alcoholism	60
3.4.1	Drinking Patterns and Ethnic Background	60
3.4.2	Correlations Between Flushing Response, ALDH I Isozyme Abnormality, Alcohol Use, and Alcoholism	60
3.4.3	Aldehyde Dehydrogenase I Isozyme Abnormality and Alcoholism	63
3.4.4	Gene-Culture Coevolution of Alcohol Usage	65
3.4.5	Implications	65
4	Biochemical Aspects of Alcoholism	67
4.1	Alcohol-Related Metabolic Derangements	67
4.1.1	Organ Dysfunction	67
4.2	Metabolic Changes	70
4.2.1	Lipid Metabolism	71
4.2.2	Protein Metabolism	73
4.2.3	Carbohydrate Metabolism	73
4.2.4	Endocrine Effects of Alcohol	74
4.2.5	Carcinogenetic and Mutagenic Effects of Ethanol	75
4.3	Changes in Alcohol-Metabolizing Enzymes in Alcohol-Related Disorders	76
4.3.1	Alcohol Dehydrogenase	76
4.3.2	Microsomal Ethanol-Oxidizing System	77
4.3.3	Aldehyde Dehydrogenase	77
4.4	Biochemical Markers of Alcohol Abuse and Alcoholism	87
4.4.1	Conventional Markers	88
4.4.2	Test Combinations	92
4.4.3	Coming Markers	93
5	Neuropsychopharmacology of Alcoholism	96
5.1	Alcohol Effects in the CNS	96
5.1.1	Electrophysiological Actions of Ethanol	96

Contents	IX
5.1.2 Neuropsychological Impairments in Alcoholics	97
5.2 Addiction, Tolerance, and Dependence	98
5.2.1 Biochemical Basis of Addiction to Ethanol	98
5.2.2 Biogenic Amine-Aldehyde Condensation Products	99
5.2.3 Membrane Actions	100
5.2.4 Alcohol and Neurotransmitters	101
5.2.5 Neuropeptide Effects on Tolerance	102
5.2.6 Role of Prostaglandins in Alcoholism	103
5.3 Metabolic Factors	104
5.3.1 Alcohol Metabolism in the Brain	104
5.3.2 Acetaldehyde Metabolism in the Brain	104
5.3.3 Metabolism of Biogenic Aldehydes	105
6 Genetic Factors in Alcoholism	107
6.1 Ethnic and Cultural Variables	107
6.2 Familial and Nonfamilial Alcoholism	108
6.3 Genetic Contributions	108
6.3.1 Family Studies	109
6.3.2 Adoption Studies	110
6.3.3 Twin Studies	112
6.3.4 What Is Inherited	114
6.3.5 Mode of Inheritance	114
6.4 Genetic and Environmental Interactions in Alcoholism	115
6.5 Biological Mediators of Alcoholism	116
6.5.1 Biomedical Markers of Alcoholism	117
6.5.2 Characterization of High-Risk and Low-Risk Individuals	117
6.5.3 Some Baseline Metabolic Differences Presaging Alcoholism	119
6.5.4 Neurophysiological and Neuropsychological Differences	120
6.5.5 Metabolic Variables	121
6.5.6 Genetic and Serological Markers of Alcoholism	122
6.5.7 Altered Alcohol Metabolism	124
6.5.8 Adenylate Cyclase	125

7	Experimental Section	126
7.1	Subjects and Materials	126
7.1.1	Patients	126
7.1.2	Healthy Subjects	127
7.1.3	Biopsy Material	127
7.1.4	Autopsy Material	127
7.1.5	Blood Samples	127
7.1.6	Hair Root Follicles	127
7.2	Methods	128
7.2.1	Alcohol Sensitivity Questionnaire	128
7.2.2	Alcohol Dehydrogenase	128
7.2.3	Aldehyde Dehydrogenase	130
7.2.4	Protein Determination	141
7.2.5	Separation of Erythrocytes Based on Cell Age	141
7.2.6	Densitometry	141
7.2.7	Cloning and Sequencing of ALDH I-cDNA	142
7.2.8	Chromosomal Localization of ALDH I Isozyme	142
7.2.9	Genotyping of ALDH I Alleles	144
