Contents

Part I: Systemtheoretical Approach to Dynamical Networks

W. Ebeling
Selforganization and information-processing by networks.....9

M. Peschel/A. R. Druschke/F. Breitenecker/I. Santibanez-Koref
Simulation of dynamical networks with generalized exponentials..... 27

E. O. Voit
Theory and applications of S-Systems..... 37

P. Bergmann/W. Paul/L. Thiele
An information theoretic approach to computer vision.....52

Part II: Neural Networks

M. Peschel/H. M. Voigt/H. Herzel
Properties of Networks with chaotic neurons.....59

M. Opper
Learning rules and learning times in neural networks.....66

J. L. van Hemmen
Storage and retrieval dynamics of temporal sequences in a neural network.....76

A. Engel/H. Englisch/A. Schütte
Improved retrieval in neural networks with thresholds and ternary neurons.....91

W. Weller
Organization of neural networks by learning..... 101

Part III: Network Applications

M. van der Meer
Concept for the realisation of a learning network..... 118

Th. Pöschel
Simulation of network machines..... 128

E. Körner/H. M. Gross/H. Shimizu/I. Tsuda
The firmware model of a neocortical column as a selfregulating control structure for autonomous recognition and learning..... 138

J. G. Reich
The performance landscape of a metabolic network.....147

U. Behn/J. L. van Hemmen
On the theory of networks for the immune system..... 162

St. Schuster
Time hierarchy in enzymatic reaction networks as derived from an extremum principle..... 173

Bibliografische Informationen
http://d-nb.info/900462868

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

E. Bruckner/A. Scharnhorst
A general dynamic network model of evolutionary change- applied to processes of development of science..... 184

Part IV: Solving Complex Problems by Network Strategies

H. M. Voigt/I. Santibanez-Koref
Combinatorial optimization by selection pressure controlled replicator networks.....193

T. Bosenink
Thermodynamical and biological optimization.....202

Ch. Schiemangk
Stochastic approximation of simulated annealing..... 213
