

Contents

General Introduction	v
Contributors	xi

Section I. DNA Replication and Recombination

Chapter 1

Enzymes of DNA Precursor Synthesis and the Control of DNA Replication

<i>Christopher K. Mathews</i>	3
-------------------------------------	---

Chapter 2

Replication Fork Propagation in *Escherichia coli*

<i>Russell J. DiGate and Kenneth J. Marians</i>	21
---	----

Chapter 3

The Role of RecA Protein in Homologous Genetic Recombination

<i>Michael M. Cox</i>	43
-----------------------------	----

Chapter 4

The SV40 Large Tumor Antigen

<i>Arnold Jay Levine</i>	71
--------------------------------	----

Chapter 5

Replication of the Human Immunodeficiency Virus

<i>Charles S. McHenry</i>	97
---------------------------------	----

Section II. Gene Transcription**Chapter 6*****Escherichia coli* Repressor Proteins*****Kyle L. Wick and Kathleen S. Matthews* 133****Chapter 7****Eukaryotic RNA Polymerases*****Ekkehard K.F. Bautz and Gabriele Petersen* 157****Chapter 8****Applications of Monoclonal Antibodies to the Study of
Eukaryotic RNA Polymerases*****Nancy E. Thompson and Richard R. Burgess* 180****Chapter 9****RNA Polymerase III and Transcription of 5S Ribosomal DNA*****John J. Furth* 207****Chapter 10****Structure and Function of Rho Factor and Its Role in
Transcription Termination*****Alicia J. Dombroski and Terry Platt* 224****Chapter 11****The Mechanism and Control of Pre-mRNA Splicing*****Jonathan C.S. Noble and James L. Manley* 243****Chapter 12****Ribonucleoproteins and the Structure of Nascent Transcripts*****Stanley F. Barnett, Stephanie J. Northington, and
Wallace M. LeStourgeon* 262****Section III. Chromosome Organization****Chapter 13****Spatial Distribution of Chromosomes in Human Mitotic Cells*****Kenneth W. Adolph* 283**

Chapter 14	
Structure/Function Relationships in the Bacteriophage T4 Single-Stranded DNA-Binding Protein	
<i>Yousif Shamoo, Kathleen M. Keating, Kenneth R. Williams, and William H. Konigsberg</i>	302
Chapter 15	
Crystallographic Studies of Two Proteins That Bind Single-Stranded DNA	
<i>Alexander McPherson</i>	323
Chapter 16	
Histone and Nucleosome Function in Yeast	
<i>Michael Grunstein, Min Han, Ung-Jin Kim, Tillman Schuster, and Paul Kayne</i>	347
Chapter 17	
Mammalian Protamines: Structure and Molecular Interactions	
<i>Rod Balhorn</i>	366
Chapter 18	
Molecular Biology of Structural Chromosomal Proteins of the Mammalian Testis	
<i>Norman B. Hecht</i>	396
Index	421
