------------------------------	----

Chapter 1 - Introduction

1.1 Introduction	1
1.2 Our Approach	3
1.3 Likelihood Versus Probability	4
1.4 Maximum-Likelihood Method	5
1.5 Comments	5

Chapter 2 - Convolutional Model

2.1 Introduction	7
2.2 The Seismic Convolutional Model	7
2.3 Input	9
2.3.1 Gaussian White Sequences	11
2.3.2 Bernoulli White Sequences	12
2.3.3 Bernoulli-Gaussian White Sequences	13
2.3.4 Bernoulli-Gaussian Plus Backscatter Sequences	14
2.4 Channel Model IR (Seismic Wavelet)	15
2.5 Measurement Noise	18
2.6 Other Effects	18
2.7 Mathematical Model	20
2.8 Summary	23

Chapter 3 - Likelihood

3.1 Introduction	25
3.2 Loglikelihood	25
3.3 Likelihood Function	26
3.4 Using Given Information	26
3.5 Message for the Reader	27
3.6 Mathematical Likelihood Functions	27
3.7 Mathematical Loglikelihood Functions	29
3.8 Summary	30

Chapter 4 - Maximizing Likelihood

4.1	Introduction.....	31
4.2	A Rationale.....	31
4.3	Block Component Search Algorithms	33
4.4	Mathematical Fact.....	38
4.5	Separation Principle.....	38
4.6	Update Random Parameters	41
4.7	Binary Detection	42
	4.7.1 Threshold Detector.....	43
	4.7.2 Single Most-Likely Replacement Detector	45
	4.7.3 Multiple Most-Likely Replacement Detector	46
	4.7.4 Single Spike Shift Detector.....	48
	4.7.5 Other Detectors.....	50
4.8	Update Wavelet Parameters.....	50
4.9	Update Statistical Parameters.....	56
4.10	Message for the Reader	58
4.11	Summary.....	58

Chapter 5 - Properties and Performance

5.1	Introduction.....	61
5.2	Minimum-Variance Deconvolution.....	61
5.3	Detectors	64
	5.3.1 Threshold Detector.....	65
	5.3.2 SMLR Detector	65
5.4	A Modified Likelihood Function	67
5.5	An Objective Function.....	68
5.6	Marquardt-Levenberg Algorithm.....	69
5.7	Convergence.....	70
5.8	Entropy Interpretation	73
5.9	Summary.....	74

Chapter 6 - Examples

6.1	Introduction.....	77
6.2	Some Real Data Examples.....	77
6.3	Minimum-Variance Deconvolution.....	85
6.4	Detection.....	93
6.5	Block Component Method	100
6.6	Backscatter	107
6.7	Noncausal Channel Models	109
6.8	Summary.....	124

Chapter 7 - Mathematical Details for Chapter 4

7.1	Introduction.....	127
7.2	Mathematical Fact.....	127
7.3	Separation Principle.....	128
7.4	Minimum-Variance Deconvolution	133
7.5	Threshold Detector.....	138
7.6	Single Most-Likely Replacement Detector	143
7.7	Single Spike Shift Detector.....	145
7.8	SSS-SMLR Detector	150
7.9	Marquardt-Levenberg Algorithm.....	151
7.10	Calculating Gradients.....	152
	7.10.1 Gradients of \mathcal{M} with Respect to \mathbf{a} and \mathbf{b}	153
	7.10.2 Gradients of \mathcal{L} with Respect to \mathbf{a} and \mathbf{b}	159
	7.10.3 Derivatives of \mathcal{M} with Respect to Variances.....	161
	7.10.4 Derivatives of \mathcal{L} with Respect to Variances.....	163
7.11	Calculating Second Derivatives.....	164
	7.11.1 Pseudo-Hessian of \mathcal{M} with Respect to \mathbf{a} and \mathbf{b}	164
	7.11.2 Pseudo-Hessian of \mathcal{L} with Respect to \mathbf{a} and \mathbf{b}	165
	7.11.3 Second Derivatives of \mathcal{M} with Respect to Variances	166
	7.11.4 Second Derivatives of \mathcal{L} with Respect to Variances	167
7.12	Why \mathbf{v}_r Cannot be Estimated: Maximization of \mathcal{L} or \mathcal{M} is an Ill-Posed Problem	167
7.13	An Algorithm for λ	170

Chapter 8 - Mathematical Details for Chapter 5

8.1	Introduction.....	173
8.2	MVD Filter Properties	173
	8.2.1 Derivation of $F(\omega)$	173
	8.2.2 Undershoot Property	175
8.3	Threshold Detector.....	178
8.4	Modified Likelihood Function.....	179
8.5	Separation Principle for P and Derivation of N from P	180
8.6	Why \mathbf{v}_r Cannot be Estimated: Maximization of P or N is not an Ill-Posed Problem.....	180
8.7	SMLR ¹ Detector Based on N.....	182
8.8	Quadratic Convergence of the Newton-Raphson Algorithm.....	183
8.9	Wavelet Identifiability.....	184
8.10	Convergence of Adaptive SMLR Detector.....	185

Chapter 9 - Computational Considerations

9.1 Introduction.....	187
9.2 Recursive Processing	191
9.2.1 A Recursive Wavelet Model	191
9.2.2 Recursive MVD Algorithm	195
9.2.2.1 Input Estimator.....	196
9.2.2.2 Backward-Running Filter	196
9.2.2.3 Innovations Process.....	196
9.2.2.4 Kalman Predictor.....	197
9.2.3 Detection.....	198
9.2.4 Likelihood and Objective Functions.....	198
9.2.5 Gradients of \mathcal{L} and \mathcal{M}	202
9.2.5.1 Gradients of \mathcal{L}	202
9.2.5.2 Gradients of \mathcal{M}	203
9.2.6 Pseudo-Hessians of \mathcal{L} and \mathcal{M}	204
9.2.6.1 Pseudo-Hessian of \mathcal{L}	204
9.2.6.2 Pseudo-Hessian of \mathcal{M}	204
9.2.7 Computational Requirements for Recursive Processing.....	205
9.3 Summary.....	208
References	209
Bibliography	213
Index.....	225
