

Contents

Chapter 1

Cold Adaptation in Ectotherms: Regulation of Membrane Function and Cellular Metabolism

J.R. Hazel (With 15 Figures)

1	Introduction	1
2	Homeoviscous Adaptation to Temperature in Ectotherms	3
3	Adaptations in the Rates and Patterns of Cellular Energy Metabolism	32
4	Conclusions	40
	References	41

Chapter 2

Freeze Tolerance and Freeze Avoidance in Ectotherms

K.B. Storey and *J.M. Storey* (With 7 Figures)

1	Introduction	52
2	Low Temperature and Freezing	52
3	Freeze Avoidance	56
4	Freeze Tolerance	65
5	The Choice of Freeze Tolerance Versus Freeze Avoidance	78
	References	79

Chapter 3

Biochemical Mechanisms and Control of Cold-Induced Cellular Thermogenesis in Placental Mammals

B.A. Horwitz (With 4 Figures)

1	Introduction	83
2	"Categories" of Thermogenesis	84
3	Acute Cold Exposure	84
4	Sustained Cold Exposure	99
5	Seasonal Changes in NST Capacity	105
6	Conclusion	107
	References	108

Chapter 4**Neurophysiological Aspects of Thermoregulation***J.A. Boulant, M.C. Curras, and J.B. Dean (With 14 Figures)*

1	Introduction	118
2	Whole Body Thermoregulatory Responses	120
3	Sensitivity of Neurons Involved in Temperature Regulation ...	126
4	Neuronal Integration of Central and Peripheral Thermal Signals	131
5	Role of Afferent Input in Determining Neuronal Populations	136
6	Neural Mechanisms of Cold Adaptation	152
	References	155

Chapter 5**Neurochemical Aspects of Thermoregulation***R.D. Myers and T.F. Lee (With 4 Figures)*

1	Introduction	162
2	Catecholamines	163
3	Indole Amines	170
4	Acetylcholine	174
5	Histamine	176
6	Peptides	178
7	Cations	187
8	Conclusion	191
	References	194

Chapter 6**Avian Adjustments to Cold***R.L. Marsh and W.R. Dawson (With 8 Figures)*

1	General Introduction	206
2	Avian Body Temperature (T_b) and its Control	206
3	Thermogenic Responses	210
4	Substrate Metabolism in the Cold	220
5	Control of Thermolysis	226
6	Summary and Perspective	240
	References	242

Chapter 7

Responses to Cold of Monotremes and Marsupials

T. J. Dawson (With 14 Figures)

1 Historical Perspective	255
2 Monotremes in the Cold.....	256
3 Marsupials in the Cold	266
4 Insights into the Evolution of Homeothermy?.....	283
References	284

Chapter 8

Aquatic Mammals in Cold

R. A. MacArthur (With 8 Figures)

1 Introduction	289
2 Diversity of Aquatic Mammals	290
3 Thermal Challenges of the Aquatic Medium	291
4 Thermoregulatory Performance of Aquatic Mammals	294
5 Temperature Regulation Tactics	299
6 Summary and Conclusions.....	320
References	321

Chapter 9

Terrestrial Mammals in Cold

D. D. Feist and R. G. White (With 10 Figures)

1 Introduction	328
2 Basal Metabolic Rate	329
3 Thermal Conductance and Insulation	332
4 Peripheral Heterothermy.....	339
5 Heat Production	343
6 Adaptations of Humans to Cold	349
7 Conclusions.....	353
References	354

Chapter 10

Ecological, Physiological, and Biochemical Aspects of Torpor in Mammals and Birds

L. C. H. Wang (With 6 Figures)

1 Introduction	361
2 Physiological Manifestations in a Torpor Bout	367

3	Energetics of Torpor	371
4	Physiological and Biochemical Adaptations	373
5	Summary	392
	References	393

Chapter 11

Cold, Energetics, and Populations

D.M. Lavigne, R.J. Brooks, D.A. Rosen, and D.A. Galbraith

(With 4 Figures)

1	Introduction	403
2	Distribution Patterns	405
3	Abundance	415
4	Energy Budgets and Population Parameters	417
5	Summary and Conclusions	426
	References	428

	<i>Subject Index</i>	433
