# Contents

Introduction
The Fundamental Issues Involved ..... xv

Chapter One

The Object of Choice under Uncertainty ..... 1

A The Basic Decision-Theoretic Approach ..... 1
1. The Ordering of Alternatives ..... 1
2. Action Results under Uncertainty ..... 4

B Probabilities ..... 6
1. Probabilities as Degrees of Confidence ..... 6
2. Objective Probability and Real Indeterminateness ..... 11
3. The Assessment of Equivalent Objective Probabilities ..... 17
3.1. Completely Unknown Probabilities ..... 18
3.1.1. The Ellsberg Paradox ..... 18
3.1.2. The Axiom of Independence ..... 21
3.1.3. A Rehabilitation of the Principle of Insufficient Reason ..... 26
3.1.4. Equivalent Probabilities in Tree Diagrams ..... 30
3.1.5. Criticism of the Principle of Insufficient Reason . 33
3.2. Partially Known Probabilities: The Step Theory of Probability ..... 35
3.2.1. Completely Known Probability Hierarchies ..... 36
3.2.2. Partly Known Probability Hierarchies ..... 38
3.3. Result ..... 39

Chapter Two

Rational Behavior under Risk ..... 41

A The Two-Parametric Substitutive Criteria ..... 46

Bibliografische Informationen
http://d-nb.info/890820430

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

1. Lange's Criterion ..... 47
2. The Domar-Musgrave Criterion ..... 48
3. The $(\mu, \sigma)$ Criterion ..... 50
4. The Mean-Semivariance Criterion ..... 51
5. The Criterion of Equivalent Gains and Losses ..... 52
5.1. Shackle's Approach ..... 52
5.2. The Krelle-Schneider Approach ..... 53
6. Limits and Possibilities of the Statistical Criteria ..... 55

B The Lexicographic Criterion ..... 59
1. The Unconditional Maximization of the Probability of Survival ..... 59
1.1. The Formal Approach ..... 59
1.2. The Problem of the Disaster Level ..... 63
2. Aspiration Levels and Saturation Probabilities: A Pragmatic View ..... 64

C The Expected-Utility Criterion ..... 69
1. The Approach of G. Cramer and D. Bernoulli ..... 70
1.1. The Basic Idea ..... 70
1.2. Examples ..... 72
1.3. An Illustrative Measure of Risk Aversion: The Intensity of Insurance Demand ..... 76
1.4. The Problem of Cardinal Utility ..... 77
1.5. Specific Risk Preference ..... 78
2. The von Neumann-Morgenstern Index ..... 79
2.1. The Axioms ..... 80
2.2. The Derivation of the Expected-Utility Rule from the Axioms ..... 81

D Comparison of Preference Functionals ..... 86
1. Expected Utility versus Lexicographic Preference: The Decision for a Decision Criterion ..... 86
2. Expected Utility and the Two-Parametric Substitutive Criteria: Searching for an Operational Alternative ..... 90
2.1. Common Preference Structures ..... 90
2.1.1. The Domar-Musgrave Criterion ..... 91
2.1.2. The Criterion of Krelle and Schneider ..... 92
2.1.3. The $(\mu, \sigma)$ Criterion ..... 96
2.1.4. The Mean-Semivariance Criterion ..... 99
2.1.5. Result ..... 101
2.2. The Local Quadratic Approximation ..... 102
2.2.1. The Asymptotic Efficiency of the Variance ..... 102
2.2.2. Examples ..... 108

2.2.3. The Shape of the Pseudo Indifference Curves in the $(\mu, \sigma)$ Diagram ..... 110
2.3. Indifference Curves in the $(\mu, \sigma)$ Diagram for Linear Distribution Clásses ..... 115
2.4. Conclusions: The $(\mu, \sigma)$ Criterion as Proxy for the Expected-Utility Criterion ..... 119
Appendix 1 ..... 120
Appendix 2 ..... 122

Chapter Three

The Structure of Risk Preference ..... 123

A Psychological Aspects of Risk Evaluation ..... 124
1. Psychological Relatively Laws ..... 124
1.1. Bernoulli's Relatively Law ..... 124
1.2. The Relativity of Stimulus Thresholds ..... 127
1.3. The Psychophysical Law ..... 130
1.3.1. Fechner's Law ..... 130
1.3.2. Stevens's Law ..... 132
1.3.3. The Missing Numeraire ..... 135
1.3.4. Fechner's Law versus Stevens's Law: The Empirical Evidence ..... 137
1.3.5. Result ..... 144
1.4. The Common Basis: Weber's Relativity Law ..... 145
2. Risk Preference and Weber's Relativity Law ..... 147
2.1. The Relativity Law and the von Neumann-Morgenstern Function ..... 148
2.2. The Relatively Law in the $(\mu, \sigma)$ Diagram ..... 153
2.3. Implications for the Intensity of Insurance Demand .... 159
2.3.1. The Influence of Subjective Risk Aversion ..... 159
2.3.2. The Influence of Wealth ..... 160
2.4. Result ..... 162

B The BLOOS Rule ..... 163
1. The Complete Preference Ordering under Weak Risk Aversion $(0 < \varepsilon < 1)$: The True Reason for Risk Loving ..... 164
1.1. The Derived Utility Function for Gross Wealth Distributions ..... 164
1.2. Indifference Curves in the $(\mu, \sigma)$ Diagram for Linear Distribution Classes ..... 167
1.3. Critique of the Subjectivist Foundation of Risk Preference ..... 175
2. The Complete Indifference-Curve System in the Case of

Strong Risk Aversion ($\varepsilon \geq 1$): The Implicit Lexicographic Ordering ..... 178

C Arrow's Hypothesis of Increasing Relative and Decreasing Absolute Risk Aversion ..... 182
1. The St. Petersburg Paradox ..... 184
2. The Utility Boundedness Theorem ..... 186
3. The Missing Behavioral Implications of the Utility Boundedness Theorem ..... 189
Appendix 1 ..... 195
Appendix 2 ..... 196
Appendix 3 ..... 200
Appendix 4 ..... 204

Chapter Four

Multiple Risks ..... 207

A Simultaneous Risks ..... 208
1. The Law of Large Numbers and the Mean-Value Criterion .. 208
2. The Correlation of Risks ..... 210
3. Weber's Relativity Law as the Proper Basis of the Mean-Value Criterion in the Case of Large Numbers ..... 212
4. Conclusions ..... 219

B Sequential Risks ..... 219
1. Optimal Multiperiod Planning of a Pure Investment Program under Uncertainty ..... 223
1.1. The Growth Optimum Model ..... 223
1.2. The Solution by Means of Stochastic Dynamic Optimization ..... 225
2. Optimal Multiperiod Planning of a Consumption-Investment Program ..... 230
2.1. The Multiperiod Preference Functional ..... 230
2.1.1. Specific Risk Preference in Multiperiod Planning 233
2.1.2. A Preference Functional According to Fechner's Law ..... 237
2.2. The Recursive Solution ..... 240
2.3. Interpretation of the Solution ..... 244
2.3.1. The Rehabilitation of the One-Period Approach . 244
2.3.2. Time and Risk Aversion ..... 246
2.3.3. The Optimal Consumption Strategy ..... 250
2.4. Result: The Surprising Simplicity of Multiperiod Planning ..... 252

Chapter Five

Areas of Application ..... 255

A Portfolio Theory ..... 255
1. The Decision Problem ..... 255
2. On the Applicability of the $(\mu, \sigma)$ Approach for Portfolio Management ..... 258
3. Implications of an Optimal Portfolio Structure ..... 261
3.1. The Advantage of Diversification ..... 261
3.2. The Age Dependence of the Optimal Portfolio Structure 266
3.3. The Wealth Independence of the Optimal Portfolio Structure ..... 268
3.3.1. The Apparent Rejection of the Relativity Axiom by the Observation of a Decreasing Velocity of Money Circulation ..... 269
3.3.2. A Risk-Theoretic Wealth Effect of a Government Budget Deficit ..... 272
4. Summary ..... 274

B The Theory of Currency Speculation ..... 275
1. The Basic Problems of the Spot and Forward Speculators ... 275
1.1. Forward Speculation ..... 275
1.2. Spot Market Speculation ..... 277
1.3. Interest Arbitrage as the Link Between Spot and Forward Speculation ..... 277
1.4. Integrating the Speculation Problem into the Basic Multiperiod Approach ..... 278
2. Optimal Speculation in the Ideal Case ..... 280
2.1. The Two-Sided $(\mu, \sigma)$ Diagram ..... 280
2.2. The Reaction of the Demand for Forward Currency to Changes in Expectations ..... 283
2.2.1. Changes in the Expected Spot Rate ..... 284
2.2.2. Changes in the Variance of the Future Spot Rate ..... 286
2.3. The Wealth Effect and the Stability Problem ..... 286
3. On the Possibility of an Excessively Short Position ..... 288
4. Summary ..... 294

C Theory of Insurance Demand ..... 295
1. Insurance Demand for Given Risks ..... 296
1.1. The Basic Calculus of the Insurance Purchaser ..... 296
1.2. The Maximum Willingness to Pay for a Full-Coverage Insurance Contract ..... 299
1.3. The Optimal Degree of Coverage ..... 304

1.4. The Age Dependence of Insurance Demand ..... 309
2. Insurance and the Size of Risk ..... 310
2.1. The Insurance-Induced Substitution Effect under Ideal Conditions ..... 311
2.2. Moral Hazard ..... 315
2.2.1. Deliberate Destruction of the Object Insured .... 316
2.2.2. The Excess Burden of the Cost-Compensation Principle ..... 316
2.2.3. The Optimal Loss Prevention Policy under Community Rating ..... 319
2.3. The Allocation of Liability Risks ..... 326
2.3.1. The Incentive to Shift Risk ..... 326
2.3.2. The Role of the Coase Theorem ..... 329
2.3.3. The Advantage of Compulsory Insurance ..... 331
3. Summary ..... 332
List of Abbreviated Journals ..... 335
Bibliography ..... 337
Author Index ..... 351
Subject Index ..... 355
